Topic 5	<ul style="list-style-type: none"> <li>• Advanced Topics: Troubleshooting configuration issues, diagnosing system integration problems, and resolving deployment obstacles.</li> </ul>

## Salesforce Order Management Administrator Accredited Professional Sample Questions (Q65-Q70):

### NEW QUESTION # 65

What type of relationship exists between FulfilmentOrder and Location?

- A. One-to-many Lookup (Location) FulfilledFromLocation
- **B. One-to-one Lookup (Location) FulfilledFromLocationId**
- C. Junction (Many to Many)
- D. Many-to-One Lookup (Location) FulfilledfromLocationId

**Answer: B**

### NEW QUESTION # 66

An administrator needs to import Order Summary records containing historical data but does not want them to be actioned on by Order Management. Which feature supports this use case?

- A. Order Life Cycle Type Picklist
- B. Order Management Type Picklist
- **C. Unmanaged Order Checkbox**
- D. Custom checkbox

**Answer: C**

Explanation:

The feature that supports this usecase is the Unmanaged Order Checkbox. This is a standard field on the Order Summary object that indicates whether the order is managed by Order Management or not. If this field is checked, then the order is not actioned on by Order Management, and it doesnot trigger any flows or processes. The administrator can use this field to import Order Summary records containing historical data without affecting the order lifecycle. Verified Reference:[https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_order\\_summary.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_order_summary.htm&type=5)

### NEW QUESTION # 67

Which option is available for an admin to use as middleware to import data to, or export data from Order Management?

- A. Use the Developer console
- B. Find an application on AppExchange
- C. Use Workbench to access the database
- D. Write Apex classes to query the database and write to a file
- **E. Use Data Loader**

**Answer: E**

Explanation:

Use Data Loader. Data Loader is a client application that allows administrators to bulkimport or export data from Salesforce using

CSV files. The administrator can use Data Loader to import data into Order Management objects, such as Order Summary, Order Item Summary, Fulfillment Order, etc., or export data from these objects for backup or analysis purposes.

Verified Reference: <https://appexchange.salesforce.com/> [https://help.salesforce.com/s/articleView?id=sf.data\\_loader.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.data_loader.htm&type=5)

#### NEW QUESTION # 68

Which data type is the Status field on an Order Summary object?

- A. String
- **B. Picklist**
- C. Number
- D. Text

**Answer: B**

Explanation:

The Status field on an Order Summary object is a picklist data type. A picklist is a field that allows users to select one value from a predefined list of values. The Status field on an Order Summary object indicates the current state of the order, such as Draft, Activated, Completed, or Cancelled. The values for the Status field are defined in the OrderStatus picklist field on the Order object. Reference: Order Management Objects, [Picklist Fields]

#### NEW QUESTION # 69

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- A. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance
- B. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations
- **C. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs**
- D. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance

**Answer: C**

Explanation:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability. Reference: Order Fulfillment Flows, Partner Community

#### NEW QUESTION # 70

.....

As the old saying tells that, he who doesn't go advance will lose his ground. So you will have a positive outlook on life. All in all, abandon all illusions and face up to reality bravely.
