SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which of the following activities are part of the key process flow for Scheduling Agreements in Procurement (I3MR)? Note: There are 3 correct answers to this question.

- A. Maintain quota arrangement
- B. Monitor down payment process
- C. Maintain service entry sheet
- D. Create or change scheduling agreement
- E. Maintain delivery schedule

Answer: A,D,E

Explanation:

The key process flow for Scheduling Agreements in Procurement (I3MR) involves several activities to manage procurement schedules effectively. Below are the three correct activities:

* Maintain quota arrangement (Option A): Quota arrangements define how procurement quantities are distributed among multiple sources of supply. This is often used in conjunction with scheduling agreements to allocate quantities based on predefined quotas. The SAP Scheduling Agreement Guide confirms this activity.

* Create or change scheduling agreement (Option B): Scheduling agreements are long-term procurement agreements with predefined delivery schedules. Creating or modifying these agreements is a core activity in the process. The same SAP Scheduling Agreement Guide documents this step.

* Maintain delivery schedule (Option E): Delivery schedules specify the quantities and dates for deliveries under a scheduling agreement. Maintaining these schedules ensures timely and accurate deliveries. The SAP Scheduling Agreement Guide confirms this activity.

* C. Monitor down payment process: Monitoring down payments is part of financial processes and is not directly related to scheduling agreements.

* D. Maintain service entry sheet: Service entry sheets are used for confirming services rendered and are not part of the scheduling agreement process.

* SAP Scheduling Agreement Guide: Explains the key activities involved in managing scheduling agreements, including quota arrangements and delivery schedules. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on scheduling agreements and their role in procurement processes.

Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 28

You want to inform purchasers automatically when an RFQ is close to the quotation deadline but only a low number of supplier quotations have been received. How can you notify purchasers easily in SAP S/4HANA Cloud Public Edition?

- A. By developing an application using APIs to send notifications
- B. By creating new RFQs and sending with email
- C. By defining a workflow using flexible workflows
- D. By using the situation template in situation handling standard framework

Answer: D

Explanation:

To notify purchasers automatically when an RFQ is close to the quotation deadline but only a few quotations have been received, the Situation Handling Framework in SAP S/4HANA Cloud Public Edition is the most efficient solution. Below is an explanation of

the correct answer:

* By using the situation template in situation handling standard framework (A):The Situation Handling Framework allows you to configure predefined templates to monitor specific conditions, such as low response rates to RFQs. When the condition is met, the system automatically notifies relevant users.

* By defining a workflow using flexible workflows (B):While flexible workflows can be configured for notifications, they require more setup and are less suited for real-time monitoring compared to the Situation Handling Framework.

* By developing an application using APIs to send notifications (C):Developing a custom application is time-consuming and unnecessary when standard tools like the Situation Handling Framework are available.

* By creating new RFQs and sending with email (D):Manually creating new RFQs and sending emails is inefficient and does not address the need for automated notifications.
