JN0-105 Learning Materials & JN0-105 Test Simulate & JN0-105 Best Questions

The web-based Juniper JN0-105 mock test is compatible with many systems. This version of the Juniper JN0-105 practice exam requires an active internet connection. It does not require any additional plugins or software installation to operate. Furthermore, others also support the JN0-105 web-based practice exam. Features of the JN0-105 desktop practice exam software are web-based as well.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q74-Q79):

NEW QUESTION # 74

You are creating a new policy to accept and redistribute routes into your IGP.

In this scenario, which match criteria would you use to identify the route prefixes to select?

- A. route-type
- B. instance
- C. neighbor
- D. route-filter

Answer: D

Explanation:

When creating a new policy to accept and redistribute routes into your Interior Gateway Protocol (IGP), the route-filter match criteria is used to identify the route prefixes to select. The route-filter statement specifies which prefixes should be matched in a policy. This allows for precise control over which routes are accepted and redistributed, facilitating efficient and secure routing policies within the network.

Reference:

"show | display set | match ge-0/0/2" indicating command examples and match criteria from Useful Juniper Commands.txt.

Juniper official documentation: Routing Policy and Firewall Filters Configuration Guide.

NEW QUESTION # 75

Which Junos OS component is responsible for maintaining the forwarding table?

- A. chassis control daemon
- B. **Packet Forwarding Engine**
- C. Routing Engine
- D. management daemon

Answer: B

Explanation:

The Packet Forwarding Engine (PFE) in Junos OS is responsible for maintaining the forwarding table. The PFE processes incoming packets, performs route lookups in the forwarding table, and forwards packets based on this information, offloading these tasks from the Routing Engine to ensure efficient packet forwarding.

NEW QUESTION # 76

A network administrator is attempting to route traffic on a Juniper switch to one of three different VLANs:

Prod, Test, and Dev. Each VLAN has been assigned a numerical value.

In this scenario, what are these numerical values called?

- A. defaults
- B. names
- C. interfaces
- D. **tags**

Answer: D

Explanation:

In the context of VLANs (Virtual Local Area Networks) on a Juniper switch, the numerical values assigned to each VLAN, such as those for Prod, Test, and Dev, are known as VLAN tags. These tags are part of the 802.1 Q VLAN standard, which allows multiple VLANs to coexist on a single physical network. Each tag uniquely identifies the VLAN to which a frame belongs, enabling the switch to segregate and manage traffic based on VLAN membership. This tagging mechanism allows for efficient traffic separation and management, ensuring that devices within one VLAN do not receive traffic intended for another, thus maintaining network security and efficiency.

NEW QUESTION # 77

Exhibit

```
user@router> show route 192.168.100.2
inet.0: 15 destinations, 17 routes (15 active, 0 holddown, 0 hidden) Limit/Threshold: 1048576/1048576 destinations
+ = Active Route, - = Last Active, * = Both 192.168.100.2/32 *[OSPF/IO] 00:14:29, metric 1
> to 172.16.1.6 via ge-0/0/1.0 [BGP/170] 00:06:49, localpref 100
AS path: 65102 I, validation-state: unverified > to 172.16.1.6 via ge-0/0/1.0 Referring to the exhibit, which statement is correct?
```

- A. **The OSPF path is the only active route.**
- B. / Traffic is load-balanced across two routes.
- C. The BGP path is the only active route.
- D. The BGP route is preferred over the OSPF route.

Answer: A

Explanation:

Referring to the exhibit, the presence of the "+" symbol next to the OSPF route for 192.168.100.2/32 indicates that this is the active route being used to forward traffic. The BGP route, although present, does not have the "+" symbol, indicating it is not the active route. In Junos OS, the routing table displays the active route with a "+" symbol, and the fact that the OSPF route has this symbol means it is the preferred path based on the routing protocol's decision process, which takes into account factors such as route preference (administrative distance) and metrics.

NEW QUESTION # 78

Which two addresses are included in an Ethernet frame header? (Choose two.)

- A. source MAC address
- B. destination IP address
- C. destination MAC address
- D. source IP address

Answer: A,C

Explanation:

An Ethernet frame header includes the source MAC address (B) and the destination MAC address (D). These addresses are used to deliver the frame from one Ethernet device to another directly connected Ethernet device on the same network segment. Ethernet frames do not include IP addresses, as those are part of the IP packet encapsulated within the Ethernet frame.

NEW QUESTION # 79

.....

Our JN0-105 exam materials can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality of the JN0-105 Study Guide may bring discredit on the company. Our JN0-105 learning questions are undeniable excellent products full of benefits, so our exam materials can spruce up our own image.

Valid Braindumps JN0-105 Sheet: <https://www.torrentexam.com/JN0-105-exam-latest-torrent.html>

So with the help of our JN0-105 updated questions, there will be no hard nut for you to crack, As a professional exam materials provider in IT certification exam, our Valid Braindumps JN0-105 Sheet - Junos, Associate (JNCIA-Junos) exam cram is certain the best study guide you have seen, Juniper JN0-105 Valid Test Discount And you will receive it only in a few minutes, You will not find any muddling in Valid Braindumps JN0-105 Sheet - Junos, Associate (JNCIA-Junos) braindumps because these are verified by Valid Braindumps JN0-105 Sheet professionals.

If you edit the Smart Object, all instances update—great for maintaining JN0-105 Exam Objectives Pdf batch layouts such as a page full of identical business cards, Action is better than excitement, so just take action as soon as possible!

Hot JN0-105 Valid Test Discount | Pass-Sure JN0-105: Junos, Associate (JNCIA-Junos) 100% Pass

So with the help of our JN0-105 updated questions, there will be no hard nut for you to crack, As a professional exam materials provider in IT certification exam, our Junos, Associate (JNCIA-Junos) exam cram is certain the best study guide you have seen.

And you will receive it only in a few minutes, You JN0-105 will not find any muddling in Junos, Associate (JNCIA-Junos) braindumps because these are verified by JNCIA professionals, While JN0-105 exam preparing for the Junos, Associate (JNCIA-Junos) (JN0-105) exam, candidates have to pay extra money when Juniper introduces new changes.
