## Quiz 2026 Fortinet EMEA-Advanced-Support: Fortinet EMEA Advanced Support Exam Authoritative Exam Simulations

It is known to us that the privacy is very significant for every one and all companies should protect the clients' privacy. Our company

has the highly authoritative and experienced team. In order to let customers enjoy the best service, all EMEA-Advanced-Support exam prep of our company were designed by hundreds of experienced experts. Our EMEA-Advanced-Support Test Questions will help customers learn the important knowledge about exam. If you buy our products, it will be very easy for you to have the mastery of a core set of knowledge in the shortest time, at the same time, our EMEA-Advanced-Support test torrent can help you avoid falling into rote learning habits.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q29-Q34):

### NEW QUESTION # 29

What is the role of the FortiGate 'set srcintf' command in a firewall policy?

- A. Defines the destination interface for traffic
- B. Sets the source IP address range
- C. Configures the source NAT interface
- **D. Specifies the source interface for traffic matching**

**Answer: D**

Explanation:

The 'set srcintf' command in a FortiGate firewall policy specifies the source interface from which traffic originates, helping define the policy's scope. It does not set the destination interface (B), source IP range (C), or NAT interface (D). Exact extract: "The 'set srcintf' command in a firewall policy specifies the source interface for incoming traffic, allowing FortiGate to match packets based on their entry interface."

### NEW QUESTION # 30

What are the advantages of using a hub-and-spoke IPSec VPN configuration instead of a fully-meshed set of IPSec tunnels? (Select all that apply below)

- A. Using a hub and spoke topology provides stronger encryption.
- **B. Using a hub and spoke topology simplifies configuration because fewer tunnels are required.**
- **C. The routing table management is simpler because of fewer routes compared to a fully meshed node.**
- D. Using a hub and spoke topology is required to achieve full redundancy.

**Answer: B,C**

Explanation:

Hub-and-spoke IPsec VPN reduces the number of tunnels needed (one per spoke to hub instead of  $n(n-1)/2$  in full mesh), simplifying configuration and routing tables with summarized routes at the hub. It does not inherently provide stronger encryption or require for redundancy (though can be made redundant). Exact extract: I want to have a way to quickly (preferably automated) setup VPN's to my 2 hubs from each spoke.

However we do not want/need VPNs between spokes. Hub Configuration: Configure the FortiGate unit as the hub. Set up IPsec VPN tunnels for each spoke. Use preshared keys for authentication. The purpose of this document is to describe the requirements and general information for building a Hub & Spoke architecture using FortiGate-VM on Oracle Cloud ... The remote sites do not need to have connectivity to each other nor does the customer want them to have connectivity to each other. Given these ... This article gives a brief configuration example from one spoke to other spoke using IPsec, through the Hub firewall.

### NEW QUESTION # 31

In a FortiGate high availability (HA) cluster, what happens if the primary unit fails?

- A. The cluster switches to active-passive mode
- B. Traffic is rerouted through an external gateway
- **C. A secondary unit takes over as the primary unit**
- D. The cluster is disabled, and traffic stops

**Answer: C**

Explanation:

In a FortiGate HA cluster (active-active or active-passive), if the primary unit fails, a secondary unit automatically takes over as the primary, ensuring continuity of traffic with minimal disruption. Option A is incorrect as traffic continues, C is incorrect as the mode

doesn't change post-failure, and D is unrelated. Exact extract: "In a FortiGate HA cluster, if the primary unit fails, a secondary unit is elected as the new primary, taking over all roles to maintain traffic flow and session continuity."

### NEW QUESTION # 32

Which parts of the IKE protocol below are responsible for authenticating the User (username/password) of a dialup IPsec tunnel? (Check all correct answers)

- A. IKEv2 SA\_INIT
- B. IKEv2 EAP
- C. IKEv1 phase2
- D. IKEv1 Xauth
- E. IKEv1 phase1

**Answer: B,D**

Explanation:

For user authentication in dialup IPsec, IKEv1 uses XAuth (Extended Authentication) after Phase 1 for username/password. IKEv2 uses EAP (Extensible Authentication Protocol) for similar user auth. Phase 1 and SA\_INIT are for peer auth, Phase 2 for child SA negotiation. Exact extract: XAuth increases security by requiring remote dialup client users to authenticate in a separate exchange at the end of phase 1. IPsec IKEv2 VPNs now support certificate authentication and EAP authentication at the same time from a dialup FortiClient. With the eap-cert-auth setting ... IPsec IKEv2 VPNs now support certificate authentication and EAP authentication at the same time from a dialup FortiClient. IPsec IKEv1 uses XAUTH for user authentication, and IPsec IKEv2 uses EAP for user authentication. Only EAP-TTLS is interoperable with LDAP. For LDAP based user ... In your scenario, the user cannot authenticate by providing both a PSK and their credentials (using one of multiple EAP methods).

### NEW QUESTION # 33

What happens when a FortiGate detects a SYN flood attack?

- A. It redirects traffic to a backup gateway
- B. It enables proxy-based inspection
- C. It drops all incoming packets
- D. It applies rate limiting to SYN packets

**Answer: D**

Explanation:

When FortiGate detects a SYN flood attack, it applies rate limiting to SYN packets via a DoS policy, dropping excessive packets to mitigate the attack. It does not drop all packets (A), enable proxy inspection (B), or redirect traffic (D). Exact extract: "FortiGate mitigates SYN flood attacks using DoS policies, which apply rate limiting to SYN packets to prevent overwhelming the system."

### NEW QUESTION # 34

.....

Our company also arranges dedicated personnel to ensure the correctness of our EMEA-Advanced-Support learning quiz. As you know, our EMEA-Advanced-Support study materials are certified products and you can really use them with confidence. On one hand, our company always hire the most professional experts who will be in charge of compiling the content and design the displays. On the other hand, we will ask for some volunteers to study with our EMEA-Advanced-Support learning prep to test the pass rate.
