Customizable mock tests comprehensively and accurately represent the actual Salesforce Plat-Arch-202 certification exam scenario.

## Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q28-Q33):

### NEW QUESTION # 28

Universal Containers is looking to construct a continuous integration process to help manage code quality. Which three tools should be used to enable this? Choose 3 answers

- A. Full Sandbox Environment
- B. Source Control Tool
- C. Continuous Integration Build Tool
- D. Project Management Tool
- E. Force.com Migration Tool

**Answer: B,C,E**

#### NEW QUESTION # 29

Universal Containers (UC) is embarked on an enterprise Salesforce transformation journey. UC would like to streamline and automate deployment to different sandboxes during the build phase. Upon customer acceptance in UAT, the company requested to automate the production deployment as well.

As the deployment architect, what is the recommendation to satisfy the customer requirements?

- A. Recommend using the Continuous integration and the Continuous deployment tool and build the pipeline to deploy to sandboxes and production.
- B. Recommend using SFDX and documents the deployment commands with steps to be executed for each environment.
- C. Recommend using the ANT script and build a custom application to run the script and use change sets to deploy supported metadata.
- D. Recommend using an AppExchange solution that packages the deployment components and you can run the deployment wizard to track deployment result.

**Answer: A**

#### NEW QUESTION # 30

Universal Containers has multiple minor and major releases in a year. Minor releases have sample configuration changes, while major releases involve large number of complex code components. What is the deployment tools should an architect recommend for both types of releases?

- A. Change sets for minor releases and metadata API for major releases.
- B. Force.com IDE for minor releases and metadata API for major releases.
- C. Change sets for minor releases and Force.com IDE for major releases.
- D. Change sets for both minor releases and major releases.

**Answer: A**

#### NEW QUESTION # 31

Universal Containers are concerned that after each release, reports and dashboards seem to roll back to previous versions. Executives spend many hours crafting these dashboards to perfectly meet their needs, and are now questioning the Salesforce platform's ability to save things, even data records.

What can the Salesforce architect advise to stop the rollbacks from happening?

- A. Back up all the reports just before the release, then reimport them after the release,
- B. Remove the executive's ability to change reports, and only allow developers to do that.
- C. Use a third-party data warehouse.
- D. Ensure report metadata is exported daily and that it is merged into the developer branches

**Answer: D**

#### NEW QUESTION # 32

Sales and Service products will be created by two teams that will use second-generation managed package(s). The Sales team will use a specific function of the Service product, but the architect wants to ensure that this team will only use the functions exposed by the Service team. No other team will use these same functions.

What should an architect recommend?

- A. Create a managed package with both products and create a code review process with an approver from each team.

- B. Create two second generation managed packages with the same namespace and set the methods that should be shared with the @namespaceAccessible annotation.
- C. Create two managed packages. Create an authentication function in the Service package that will return a token if a Sales user is authorized to call the exposed function. Validate the token in the Service functions.
- D. Create two managed packages with Sales and service namespaces. Set the methods to be shared with the salesAccessible annotation

**Answer: C**

### NEW QUESTION # 33

.....
