## Selecting Sample C-SEC-2405 Questions Pdf - Get Rid Of SAP Certified Associate - Security Administrator

In the modern world, obtaining C-SEC-2405 certification is essential. With the growing popularity of SAP, the demand for professionals holding this SAP Certified Associate - Security Administrator (C-SEC-2405) certification holders has increased significantly. Unfortunately, many candidates fail to pass the C-SEC-2405 Exam due to outdated SAP Certified Associate - Security Administrator (C-SEC-2405) exam study material. Such failure can lead to the loss of time, money, and confidence.

### SAP Certified Associate - Security Administrator Sample Questions (Q52-Q57):

#### NEW QUESTION # 52

Which optional components can be included when transporting a role definition from the development system to the quality assurance system? Note: There are 3 correct answers to this question.

- A. Direct user assignments
- B. Generated profiles of single roles
- C. Indirect user assignments
- D. Generated profiles of dependent roles
- E. Personalization data

**Answer: A,B,E**

Explanation:

When transporting a role definition from the development system to the quality assurance system in SAP, optional components that can be included are Direct user assignments, Generated profiles of single roles, and Personalization data. Direct user assignments link specific users to the role, allowing these assignments to be transported for testing purposes, though this is typically avoided in production to maintain centralized user management. Generated profiles of single roles, which contain the authorization data for the role, are included to ensure the role's permissions are correctly tested in the target system. Personalization data, such as user-specific settings or preferences, can also be transported to preserve role-specific configurations. Generated profiles of dependent roles are not typically included, as they relate to composite roles, and Indirect user assignments are managed separately, often via organizational structures. These optional components provide flexibility in role transport, ensuring that the quality assurance system accurately reflects the development environment while supporting secure and efficient role testing.

#### NEW QUESTION # 53

Which user types can log on to the SAP S/4HANA system in interactive mode? Note: There are 2 correct answers to this question.

- A. Service User
- B. Dialog User
- C. Communication User
- D. System User

**Answer: B,C**

#### NEW QUESTION # 54

In SAP S/4HANA Cloud Public Edition, what can you do with the Display Authorization Trace? Note: There are 3 correct answers to this question.

- A. Analyze authorization check results for already assigned authorizations
- B. Adjust role restrictions to further limit access when performing forensic analysis
- C. Display business roles granting specific access
- D. Analyze authorization check results for missing authorizations
- E. Adjust role restrictions to account for missing authorizations

**Answer: A,C,D**

#### NEW QUESTION # 55

Which solution is NOT used to identify security recommendations for the SAP Security Baseline?

- A. SAP Code Vulnerability Analyzer
- B. SAP EarlyWatch Alert
- C. SAP Security Optimization Service
- D. SAP Security Notes

**Answer: A**

#### NEW QUESTION # 56

Which of the following functions within SAP GRC Access Control support access certification and review?

Note: There are 2 correct answers to this question.

- A. Role Review
- B. User Reaffirm
- C. SOD Review
- D. Role Reaffirm

**Answer: B,C**

Explanation:

In SAP GRC Access Control, the functions that support access certification and review are SOD Review and User Reaffirm. SOD (Segregation of Duties) Review enables organizations to analyze roles and user assignments for potential conflicts, ensuring that access does not violate SoD policies. This review process involves certifying that roles or users do not have conflicting permissions, supporting compliance with security standards. User Reaffirm is used to periodically certify user access, requiring managers or administrators to confirm that users' assigned roles and permissions remain appropriate for their job functions. This reaffirmation process is critical for access governance, ensuring ongoing compliance and security. Role Review, while related to role maintenance, is not a specific GRC function for access certification, and Role Reaffirm is not a standard term in SAP GRC. By leveraging SOD Review and User Reaffirm, SAP GRC Access Control provides robust tools for maintaining secure and compliant access management, addressing both role-based and user-based risks.

#### NEW QUESTION # 57

.....
