Sharing-and-Visibility-Architect対応受験 & Sharing-and-Visibility-

Architect日本語pdf問題

Sharing-and-Visibility-Architect試験問題のヒット率は非常に高く、もちろん合格率も非常に高くなります。製品を選択する前に、独自の合格率を比較しておく必要があります。Sharing-and-Visibility-Architect学習資料は、リストの一番上に表示される必要があります。また、Sharing-and-Visibility-Architect学習クイズの合格率は99%です。これは私たちの努力の結果であり、ユーザーへの最高の贈り物です。私たちのSharing-and-Visibility-Architect学習教材は非常に高い合格率を持つことができ、すべてのメンバーが最初に顧客の概念を支持するのは段階的な結果です。Sharing-and-Visibility-Architectトレーニング準備の試用版を使用する場合は、購入することをお勧めします！

Salesforce Sharing-and-Visibility-Architect試験は、Salesforceプラットフォームとその共有と可視性の機能について深い理解が必要な厳密な認定試験です。この試験に合格し、Salesforce Certified Sharing and Visibility Architectとして認定された個人は、自分の分野の専門家として認められ、Salesforceプラットフォームを使用して複雑な共有と可視性のソリューションを実装することを目指す雇用主から高く求められます。

Salesforce Certified Sharing and Visibility Architect 認定 Sharing-and-Visibility-Architect 試験問題 (Q31-Q36):

質問 #31

Universal Containers (UC) is a fast-growing company that sells containers globally. It has thousands of dealerships throughout the world where local dealers service containers. UC implemented a new Partner Community for its dealers. Each dealership has a dealer manager who manages the service agents. The community-sharing model is private.

What is the optimal option to give dealer managers visibility to customer cases only raised by their service agents?

- A. Create a sharing set to share cases created by service agents with their dealer manager.
- B. Change external organization-wide default of case object to public read only.
- C. Using the role hierarchy, the cases raised by service agents will be visible to their relevant dealer managers.
- D. Create a sharing rule to share cases created by service agents with their dealer manager.

正解: A

質問 #32

An architect has a requirement to create a criteria-based sharing rule based on the customer Social Security Number. However, when setting up the rule in Contact Sharing, the field is not shown on the list of available fields.

What is causing this issue?

- A. The architect's profile does not have Field Level Security for this field.
- B. The field has been configured for encryption.
- C. The architect does not have permission to Compliance fields.

正解: B

質問 #33

Universal containers (UC) service reps are assigned to a profile which has View All in Case object (Private OWD). To make sure service reps have access to all relevant information to attend to customer requests, Which two details should Salesforce Architects consider? Choose 2 answers:

- A. Service reps will not be able to access all UC contact records if they are controlled by parent.
- B. Service reps will not be able to access all the UC Account records because Account OWD is private.
- C. Service reps will be able to access all UC contact records if they are controlled by parent.
- D. Service rep will be able to access all the UC Account records due to Implicit Sharing.

正解: A、B

解説:

Explanation

Service reps will not be able to access all UC contact records if they are controlled by parent and service reps will not be able to access all UC account records because account OWD is private are two details that Salesforce Architects should consider in this

scenario. Since service reps are assigned to a profile which has View All in Case object (Private OWD), they can access all case records regardless of ownership or sharing rules. However, this does not grant them access to related contact or account records, unless they have View All or Modify All permissions on those objects as well. If contact records are controlled by parent (account), their sharing settings will depend on the account OWD and sharing rules. If account OWD is private, service reps will only be able to access account records that they own or are shared with them. Implicit sharing does not apply to internal users. Option A and C are incorrect, since service reps will not be able to access all UC contact or account records due to the reasons explained above.

質問 # 34

Universal Containers has expanded to sell virtual containers for data storage. Virtual container work orders are provisioned immediately by the system and therefore cannot be changed by a sales representative. What is an optimal approach to implement these requirements?

- A. Implement a sharing rule that changes access for all Work Order to Read.
- **B. Remove the Work Order Edit permission from the sales representative Profile.**
- C. Change the record type/page layout assignment for Work Order to be Read Only.
- D. Remove the edit button from the work order page layout.

正解: B

解説:

Explanation

Removing the Work Order Edit permission from the sales representative profile is the optimal approach to implement these requirements, as it will prevent sales representatives from changing virtual container work orders that are provisioned immediately by the system. Option B is incorrect, since removing the edit button from the work order page layout would not prevent sales representatives from editing work orders using other methods, such as inline editing or data loader. Option C is incorrect, since changing the record type/page layout assignment for Work Order to be Read Only would not affect the edit permission, but only the layout configuration. Option D is incorrect, since implementing a sharing rule that changes access for all Work Order to Read would not prevent sales representatives from editing work orders that they own.

質問 # 35

Universal Containers has developed an AppExchange managed package for their distribution partners, which required a private key to be generated for each partner and used by the code. Universal Containers support representatives must be able to access the private key value to debug connection issues, but it must not be possible for the partner to access the value. How can the Architect best support this requirement?

- A. Store the value in an encrypted field on a custom object in the package.
- **B. Store the value in the text field on a list custom setting in the managed package.**
- C. Store the value in a text field on a protected custom setting in the package.
- D. Store the value in a static variable in a class included in the managed package.

正解: B

質問 # 36
