## **Salesforce Certified Slack Administrator Sample Questions (Q197-Q202):**

### **NEW QUESTION # 197**

You're an Org Admin for an organization with an Enterprise Grid plan. You receive a list of several full members who will be leaving the organization in 5 days, with the instruction to deactivate their accounts after their departure. What is the best way to do this?

- A. Request the Primary Org Owner do this, as they are the only one who can perform this action.
- B. Contact Slack via /feedback to get the members deactivated.
- C. Deactivate the members in the Organization Settings 'Members' tab.
- D. **Deactivate the members utilizing the SCIM API.**

**Answer: D**

Explanation:

Slack recommends:

"When using SCIM provisioning, admins can automate the deactivation of user accounts through the SCIM API, ensuring synchronization with identity provider (IdP) data." Deactivating manually through the Org Settings (A) is possible but less efficient and scalable. Contacting Slack via /feedback (B) is not appropriate for standard admin tasks. Deactivation is not limited to Primary Org Owners only (D).

(Reference: Slack Administration Study Guide - User Lifecycle Management with SCIM)

**NEW QUESTION # 198**

You're an Org Admin at a security-conscious financial services company. You're rolling out Enterprise Mobility Management (EMM) across the organization.

Leadership asks if it is possible to require guests to use the Slack for EMM app.

How should you respond to this request?

(Select the best answer.)

- A. Guests can only login through the desktop app to access your workspaces.
- B. **It's not possible to require guests to use the Slack for EMM app.**
- C. Guests are required to use the Slack for EMM app by default.
- D. Guests can be required to use the Slack for EMM app.

**Answer: B**

Explanation:

Slack's documentation on EMM policies specifies:

"Enterprise Mobility Management (EMM) requirements apply only to full members of your Slack organization. Guest accounts (Single-Channel or Multi-Channel Guests) are not required to use the Slack for EMM app." Thus, guests are exempt from EMM enforcement. Options B and C incorrectly state guests can be controlled via EMM. D is unrelated.

**NEW QUESTION # 199**

Your company is conducting an internal security assessment of Slack prior to implementation. Which of the following is true about security in Slack?

- A. **Slack data is encrypted at rest and in transit.**
- B. Workspace Admins can see all direct message content at any time through the Admin console.
- C. Slack members can only access Slack when on the corporate network.
- D. Slack data is stored on your company's servers.

**Answer: A**

Explanation:

Slack ensures that all customer data:

"Is encrypted at rest and in transit, using industry-standard encryption protocols." Workspace Admins cannot access direct messages unless data exports or eDiscovery tools are properly configured and approved. Slack data is stored on Slack-managed servers (AWS infrastructure) and not on customers' own servers by default. Access is not restricted solely to the corporate network unless additional security tools (like Slack Enterprise Mobility Management or VPNs) are enforced.

**NEW QUESTION # 200**

You're a Workspace Admin on a Slack Enterprise Grid plan.

Your marketing team is working with an external contractor for a new product launch.

The contractor does not have Slack access, and multiple internal teams need to collaborate with them.

Which type of access should you recommend for the contractor?

- A. Single-Channel Guest with access to one project channel
- B. Full member with access to the marketing workspace
- C. Slack Connect direct message (DM) between the contractor and project lead
- D. **Multi-Channel Guest with access to all relevant project channels**

**Answer: D**

Explanation:

Slack best practices recommend:

"For external users who need access to multiple channels but not the entire workspace, a Multi-Channel Guest account is the ideal solution." Full member access (D) is inappropriate for external users. Slack Connect DMs (B) would not provide full channel collaboration. Single-Channel Guest (C) would limit the contractor unnecessarily.

## NEW QUESTION # 201

Your organization enabled data residency and chose to host your organization's data in the Montreal, Canada region.

Which specific data types will be uniquely stored in this geographic region? (Select the best answer.)

- A. Messages, files, data used for analytics, snippets and posts
- B. Messages, files, snippets, workspaces and channel membership information
- C. Messages, files, snippets, posts and files
- D. **Messages, files, snippets, posts and member profiles**

**Answer: D**

Explanation:

With Slack's data residency, the following data types are stored in the selected region:

"Messages, files, snippets, posts, and member profiles."

Data used for analytics and some metadata may still be processed globally, but the primary user-generated content is kept within the specified region.
