

Examcollection Cisco 300-410 Dumps & 300-410 Trustworthy Pdf

What's more, part of that PassLeader 300-410 dumps now are free: <https://drive.google.com/open?id=12D2i4Dy5io-6QJ4Xo0yZGJoU-iPakEGI>

The field of Cisco is growing rapidly and you need the Cisco 300-410 certification to advance your career in it. But clearing the Implementing Cisco Enterprise Advanced Routing and Services (300-410) test is not an easy task. Applicants often don't have enough time to study for the 300-410 Exam. They are in desperate need of real Implementing Cisco Enterprise Advanced Routing and Services (300-410) exam questions which can help them prepare for the Implementing Cisco Enterprise Advanced Routing and Services (300-410) test successfully in a short time.

Knowledge Prerequisites

It is good to know what knowledge is required for any exam that you are planning to take. Therefore, you have to find out what it takes to sit for this particular test. Highlighted below are the skills and knowledge required for the Cisco 300-410 exam:

- General understanding of how to effectively secure networks devices;
- Understanding and knowledge of how to manage network devices;
- General understanding of network fundamentals.
- Knowledge of how to implement LANs;
- Basic knowledge of network automation;

All in all, there will be topics that cover infrastructure services and security, VPN technologies, and Layer 3.

Cisco 300-410 exam is designed for IT professionals who are interested in becoming certified in implementing Cisco enterprise advanced routing and services. 300-410 Exam is an important step for those who want to demonstrate their knowledge and skills in deploying and managing advanced routing and services in enterprise networks.

Cisco 300-410 exam is part of the Cisco Certified Specialist - Enterprise Advanced Infrastructure Implementation certification, which is designed for IT professionals who want to validate their skills in implementing advanced routing technologies and services in enterprise networks. 300-410 exam covers a wide range of topics related to enterprise routing and services, including advanced routing protocols, quality of service (QoS), virtual private networks (VPNs), and network automation.

Cisco 300-410 Trustworthy Pdf - Best 300-410 Vce

To pass the Implementing Cisco Enterprise Advanced Routing and Services (300-410) certification exam you need to prepare well with the help of top-notch Implementing Cisco Enterprise Advanced Routing and Services (300-410) exam questions which you can download from platform. On this platform, you will get valid, updated, and real Cisco 300-410 Dumps for quick exam preparation.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q181-Q186):

NEW QUESTION # 181

Which feature is required for IPv6 Source Guard to block traffic arriving on the server interface from unknown sources?

- A. IPv6 ND Inspection
- B. IPv6 RA Guard
- C. Dynamic ARP Inspection
- D. DHCPv6 Guard

Answer: A

Explanation:

For IPv6 Source Guard to block traffic from unknown sources, the feature requires the use of IPv6 ND (Neighbor Discovery) Inspection. ND Inspection validates IPv6 neighbor solicitation (NS) and neighbor advertisement (NA) messages. It builds a trusted database of IPv6 bindings (based on dynamic learning or static entries) and blocks packets that do not match the trusted bindings. IPv6 Source Guard relies on the trusted binding table to verify the legitimacy of IPv6 source addresses in packets arriving on an interface. ND Inspection ensures the binding table is accurate by monitoring and validating ND messages (solicitations and advertisements).

NEW QUESTION # 182

Refer to the exhibit.

```
R1#show running-config | include aaa
aaa new-model
aaa authentication login default group tacacs+ local
aaa authentication login Console local
R1#show running-config | section line
line con 0
  logging synchronous
R1#
```

An engineer is trying to configure local authentication on the console line, but the device is trying to authenticate using TACACS+. Which action produces the desired configuration?

- A. Add the login authentication Console command to the line configuration
- B. Replace the capital "C" with a lowercase "c" in the aaa authentication login Console local command.
- C. Add the aaa authentication login default none command to the global configuration.
- D. Add the aaa authentication login default group tacacs+ local-case command to the global configuration.

Answer: A

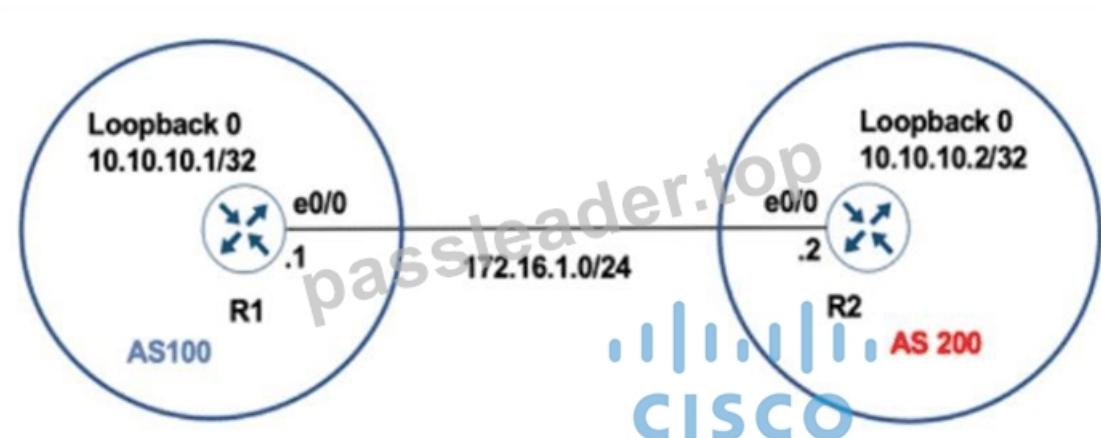

Explanation:

NEW QUESTION # 183

:576

Refer to the exhibit. R1 and R2 have been configured where the neighbor relationship must be authenticated using MD5:

R1
router bgp 100
neighbor 172.16.1.2 remote-as 200
neighbor 172.16.1.1 password cisco123

R2
router bgp 200
neighbor 172.16.1.1 remote-as 100
neighbor 172.16.1.1 password cisco

The neighbor relationship is not coming up. Which configuration resolves the issue?

R1

```
router bgp 100
neighbor 172.16.1.2 password cisco
```

R2

```
router bgp 200
neighbor 172.16.1.1 password cisco123
```

R1

```
router bgp 100
neighbor 172.16.1.2 password MD5 cisco123
```

R2

```
router bgp 200
neighbor 172.16.1.1 password MD5 cisco123
```

R1

```
router bgp 100
neighbor 172.16.1.2 password MD5 cisco
```

R2

```
router bgp 100
neighbor 172.16.1.1 password MD5 cisco
```

- A. Option D
- B. Option B
- C. Option C
- D. Option A

Answer: B

NEW QUESTION # 184

Refer to the exhibit.

```

Router# show tag-switching tdp bindings
(...)
tib entry: 10.10.10.1/32, rev 31
  local binding: tag: 18
  remote binding: tsr: 10.10.10.1:0, tag: imp-null
  remote binding: tsr: 10.10.10.2:0, tag: 18
  remote binding: tsr: 10.10.10.6:0, tag: 21
tib entry: 10.10.10.2/32, rev 22
  local binding: tag: 17
  remote binding: tsr: 10.10.10.2:0, tag: imp-null
  remote binding: tsr: 10.10.10.1:0, tag: 19
  remote binding: tsr: 10.10.10.6:0, tag: 22

```

What does the imp-null tag represent in the MPLS VPN cloud?

- A. Include the EXP bit
- B. Impose the label
- C. Exclude the EXP bit**
- D. Pop the label

Answer: C

NEW QUESTION # 185

Refer to the exhibit.

<pre> R2#show running-config section ospf ip ospf 1 area 1 ip ospf 1 area 1 router ospf 1 log adjacency-changes area 1 stub no-summary R2#show ip ospf interface brief Interface PID Area IP Address/Mask Cost State Nbrs F/C Lo0 1 1 10.0.0.2/32 1 Loop 0/0 Fa0/0 1 1 10.10.10.1/30 1 DR 0/1 R2#show running-config interface fastEthernet 0/0 Building configuration... Which action restores OSPF adjacency between R1 and R2?

- A. Change the IP MTU of R2 Fa0/0 to 1500**
- B. Change the IP MTU of R2 Fa0/0 to 1300
- C. Change the IP MTU of R1 Fa1/0 to 1500
- D. Change the IP MTU of R1 Fa1/0 to 1300

Answer: A

NEW QUESTION # 186

.....

There are three different versions of our 300-410 practice braindumps: the PDF, Software and APP online. If you think the first two formats of 300-410 study guide are not suitable for you, you will certainly be satisfied with our online version. It is more convenient

for you to study and practice anytime, anywhere. All you need is an internet explorer. This means you can practice for the 300-410 Exam with your I-pad or smart-phone. Isn't it wonderful?
