Microsoft AZ-800 New Soft Simulations & 100% AZ-800 Exam Coverage

AZ-800 test questions have a mock examination system with a timing function, which provides you with the same examination environment as the real exam. Although some of the hard copy materials contain mock examination papers, they do not have the automatic timekeeping system. Therefore, it is difficult for them to bring the students into a real test state. With AZ-800 Exam Guide, you can perform the same computer operations as the real exam, completely taking you into the state of the actual exam, which will

help you to predict the problems that may occur during the exam, and let you familiarize yourself with the exam operation in advance and avoid rushing during exams.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q170-Q175):

NEW QUESTION # 170

You have an Active Directory Domain Services (AD DS) domain that contains a group named Group1.

You need to create a group managed service account (gMSA) named Account1. The solution must ensure that Group1 can use Account1.

How should you complete the script? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 171

You have four testing devices that are configured with static IP addresses as shown in the following table.

☐

The test devices are turned on once a month.

You need to prevent Server1 from assigning the IP addresses allocated to the test devices to other devices when the test devices are offline. The solution must minimize administrative effort.

What should you do?

- A. Create an exclusion range.
- **B. Create reservations.**
- C. Create a policy.
- D. Configure the Scope options.

Answer: B

NEW QUESTION # 172

You have a server named Server1 that runs Windows Server and has the Hyper-V server role installed.

You need to limit which Hyper-V module cmdlets helpdesk users can use when administering Server 1 remotely.

You configure Just Enough Administration (JEA) and successfully build the role capabilities and session configuration files.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:
