Free PDF Quiz CIS-SPM - Certified Implementation Specialist - Strategic Portfolio Management High Hit-Rate Training Materials

Dear candidates, have you thought to participate in any ServiceNow CIS-SPM exam training courses? In fact, you can take steps to pass the certification. Prep4King ServiceNow CIS-SPM Exam Training materials bear with a large number of the exam questions you need, which is a good choice. The training materials can help you pass the certification.

ServiceNow CIS-SPM Exam Syllabus Topics:

Topic	Details
Topic 1	• Information Security Governance: This section of the exam delves into security management concepts and principles, examining organizational structures and roles in security. It also covers developing and implementing security policies, standards, and procedures.
Topic 2	• Privacy Management: This section covers privacy principles and regulations, privacy impact assessments, data protection techniques, and the concepts of privacy by design.
Topic 3	• Regulatory Compliance and Legal Issues: This section addresses risk management and risk assessment methodologies, including threat modeling and vulnerability assessment. It also explores various risk mitigation strategies.
Topic 4	• Communication and Network Security: This section covers network architecture and design, secure communication protocols, wireless network security, and strategies to defend against network attacks.

Topic 5	• Security Assessment and Testing: This section focuses on security audit principles and methodologies, penetration testing techniques, and the use of security metrics and reporting.
Topic 6	• Identity and Access Management: This section explores authentication methods and technologies, authorization and access control models, and the identity management lifecycle.
Topic 7	• Asset Security: This section focuses on information and asset classification, data security controls, privacy protection measures, and intellectual property protection.
Topic 8	• Security Operations: In this section, the focus is on security monitoring and analytics, incident response and management, forensics and investigations, and patch and vulnerability management.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q12-Q17):

NEW QUESTION # 12
The color band at the top of the project card in Project Workspace displays what project attribute?

- **A. Status**
- B. Issues
- C. State
- D. Risk

Answer: A

Explanation:
Explanation
According to the ServiceNow documentation1, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:
B: Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band2.
C: State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band3.
D: Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band4.

https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/project-management/task/

NEW QUESTION # 13
The Project Management application enables users to create parent-child relationships between tasks and dependencies, such as finish-to-start and finish-to-finish, between tasks. How many relationships can exist between two tasks?

- **A. Four.**
- B. Two
- C. One
- D. Three.

Answer: A

NEW QUESTION # 14
What is the demand workbench used for?

Choose 2 answers

- A. Approving demands
- B. Comparing and prioritizing demands against other demands
- C. Comparing demands with portfolios
- D. Approving ideas

Answer: B,C

Explanation:
The demand workbench is a feature of ServiceNow Demand Management that allows you to view and assess business demands in a single place. You can use the demand workbench to compare demands with portfolios and see how they align with your strategic goals and objectives. You can also use the demand workbench to compare and prioritize demands against other demands based on their scores, risks, and benefits. You can find more information about the demand workbench in the Product Documentation for ServiceNow.

NEW QUESTION # 15
Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. it_pps_admin.
- B. it_project_manager.
- C. business_stakeholder.
- D. All roles.

Answer: A

Explanation:
According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it_pps_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it_project_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 16
The Business Unit field on a Project or Demand form displays values from a specific table. What type of field is this?

- A. Reference.
- B. List.
- C. Journal.
- D. Conditions.

Answer: A

Explanation:
Explanation
According to the ServiceNow documentation1, the Business Unit field on a Project or Demand form is a reference field that displays values from the cmn_department table. A reference field stores a link to a record on another table, rather than storing the data directly in the field2.
