Many candidates find the Oracle 1z0-1127-24 exam preparation difficult. They often buy expensive study courses to start their Oracle 1z0-1127-24 certification exam preparation. However, spending a huge amount on such resources is difficult for many Oracle Cloud Infrastructure 2024 Generative AI Professional exam applicants. The latest Oracle 1z0-1127-24 Exam Dumps are the right option for you to prepare for the Oracle 1z0-1127-24 certification test at home.

Oracle 1z0-1127-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Fundamentals of Large Language Models (LLMs): For AI developers and Cloud Architects, this topic discusses LLM architectures and LLM fine-tuning. Additionally, it focuses on prompts for LLMs and fundamentals of code models.
Topic 2	<ul style="list-style-type: none">Using OCI Generative AI Service: For AI Specialists, this section covers dedicated AI clusters for fine-tuning and inference. The topic also focuses on the fundamentals of OCI Generative AI service, foundational models for Generation, Summarization, and Embedding.

Topic 3	<ul style="list-style-type: none"> • Building an LLM Application with OCI Generative AI Service: For AI Engineers, this section covers Retrieval Augmented Generation (RAG) concepts, vector database concepts, and semantic search concepts. It also focuses on deploying an LLM, tracing and evaluating an LLM, and building an LLM application with RAG and LangChain.

Interactive Oracle 1z0-1127-24 EBook | 1z0-1127-24 Examcollection Dumps

Thus, we come forward to assist them in cracking the Oracle 1z0-1127-24 examination. Don't postpone purchasing Oracle 1z0-1127-24 exam dumps to pass the crucial examination. TestPassed study material is available in three versions: Oracle 1z0-1127-24 Pdf Dumps, desktop practice exam software, and a web-based Oracle 1z0-1127-24 practice test.

Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q22-Q27):

NEW QUESTION # 22

What is the primary purpose of LangSmith Tracing?

- A. To debug issues in language model outputs
- B. To generate test cases for language models
- C. To monitor the performance of language models
- D. To analyze the reasoning process of language

Answer: A

Explanation:

The primary purpose of LangSmith Tracing is to debug issues in language model outputs. LangSmith Tracing allows developers to trace and analyze the sequence of operations and decisions made by the model during the generation process. This helps identify and resolve problems, ensuring the model's outputs are accurate and reliable.

Reference

LangSmith documentation on tracing and debugging

Tutorials on using tracing tools for language model development

NEW QUESTION # 23

What does "k-shot prompting" refer to when using Large Language Models for task-specific applications?

- A. Limiting the model to only k possible outcomes or answers for a given task
- B. Providing the exact k words in the prompt to guide the model's response
- C. The process of training the model on k different tasks simultaneously to improve its versatility
- D. Explicitly providing k examples of the intended task in the prompt to guide the models output

Answer: D

NEW QUESTION # 24

Given a block of code:

qa = Conversational Retrieval Chain, from l1m (l1m, retriever-retv, memory-memory) when does a chain typically interact with memory during execution?

- A. Continuously throughout the entire chain execution process
- B. Only after the output has been generated
- C. Before user input and after chain execution
- D. After user input but before chain execution, and again after core logic but before output

Answer: B

NEW QUESTION # 25

Which statement is NOT true about StreamlitChatMessageHistory?

- A. A given StreamlitChatMessageHistory will NOT be persisted.
- B. StreamlitChatMessageHistory will store messages in Streamlit session state at the specified key.
- C. A given StreamlitChatMessageHistory will not be shared across user sessions.
- D. StreamlitChatMessageHistory can be used in any type of LLM application.

Answer: D

Explanation:

StreamlitChatMessageHistory is a chat message storage tool in Streamlit, used to manage message history within LLM-powered applications.

Key Features of StreamlitChatMessageHistory:

Stores chat messages within Streamlit's session state.

Not persistent across sessions; resets when the session is closed.

Specific to Streamlit applications, not designed for all LLM applications.

Why Option (D) is Incorrect:

StreamlitChatMessageHistory is designed for Streamlit-based apps.

It is not suitable for all LLM applications, particularly those requiring persistent storage.

Why Other Options Are Correct:

(A) True: Each session has its own instance of StreamlitChatMessageHistory.

(B) True: It is not persisted across sessions.

(C) True: It stores messages in the Streamlit session state.

□ Oracle Generative AI Reference:

While Oracle AI supports various LLM applications, StreamlitChatMessageHistory is limited to Streamlit-based chat interfaces.

NEW QUESTION # 26

How does the temperature setting in a decoding algorithm influence the probability distribution over the vocabulary?

- A. Increasing the temperature flattens the distribution, allowing for more varied word choices.
- B. Decreasing the temperature broadens the distribution, making less likely words more probable.
- C. Temperature has no effect on probability distribution; it only changes the speed of decoding.
- D. Increasing the temperature removes the impact of the most likely word.

Answer: A

Explanation:

Temperature is a parameter in LLM decoding algorithms that controls randomness in text generation.

Effects of Temperature on Text Generation:

Higher Temperature (>1.0):

Flattens the probability distribution, making lower-probability words more likely.

Increases randomness, resulting in more creative and diverse outputs.

Lower Temperature (<1.0):

Sharpening effect, making high-probability words more dominant.

Produces more predictable and deterministic responses.

Why Other Options Are Incorrect:

(B) is incorrect because temperature does not remove the impact of likely words; it reduces or increases randomness.

(C) is incorrect because temperature affects probability, not speed.

(D) is incorrect because decreasing the temperature narrows the distribution, making text more deterministic.

□ Oracle Generative AI Reference:

Oracle AI models allow dynamic temperature control to balance coherence and creativity in text generation.

NEW QUESTION # 27

.....

One of the key factors for passing the exam is practice. Candidates must use 1z0-1127-24 practice test material to be able to

perform at their best on the real exam. This is why TestPassed has developed three formats to assist candidates in their Oracle 1z0-1127-24 Preparation. These formats include desktop-based Oracle 1z0-1127-24 practice test software, web-based practice test, and a PDF format.
