

Reliable Oracle 1Z0-1151-25 Dumps Files & Official 1Z0-1151-25 Study Guide

BTW, DOWNLOAD part of FreeDumps 1Z0-1151-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1r9GKz67au2lusWUFEum30K0K8IX811s2>

1Z0-1151-25 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our 1Z0-1151-25 training materials have become the most widely-lauded and much-anticipated products in industry. We have three versions of 1Z0-1151-25 Exam Questions by modernizing innovation mechanisms and fostering a strong pool of professionals. Therefore, rest assured of full technical support from our professional elites in planning and designing 1Z0-1151-25 practice test.

If you're still learning from the traditional old ways and silently waiting for the test to come, you should be awake and ready to take the exam in a different way. Study our 1Z0-1151-25 training materials to write "test data" is the most suitable for your choice, after recent years show that the effect of our 1Z0-1151-25 guide dump has become a secret weapon of the examinee through qualification examination, a lot of the users of our 1Z0-1151-25 guide dump can get unexpected results in the examination. It can be said that our 1Z0-1151-25 study questions are the most powerful in the market at present, not only because our company is leader of other companies, but also because we have loyal users. 1Z0-1151-25 training materials are not only the domestic market, but also the international high-end market. We are studying some learning models suitable for high-end users. Our research materials have many advantages.

Official 1Z0-1151-25 Study Guide & Latest 1Z0-1151-25 Exam Practice

Our 1Z0-1151-25 exam questions can meet your needs to the maximum extent, and our 1Z0-1151-25 learning materials are designed to the greatest extent from the customer's point of view. So you don't have to worry about the operational complexity. As soon as you enter the learning interface of our system and start practicing our 1Z0-1151-25 Learning Materials on our Windows software, you will find small buttons on the interface. It is very easy and convenient to use and find.

Oracle Cloud Infrastructure 2025 Multicloud Architect Professional Sample Questions (Q11-Q16):

NEW QUESTION # 11

ABC company uses Okta as its identity provider and wants to federate with OCI to enable single sign-on (SSO) for accessing OCI resources. Users should be granted access to OCI compartments based on their Okta group memberships.

Which is the most direct and recommended approach to achieve this?

- A. Use SCIM provisioning to create and manage OCI users based on Okta user attributes and group memberships.
- B. Establish a VPN connection between your on-premises network and OCI and configure Active Directory Federation Services (AD FS) to bridge Okta and OCI.
- C. **Configure Okta as a SAML 2.0 Identity Provider in OCI and map Okta groups to OCI groups.**
- D. Create a custom application in Okta that uses the OCI API to authenticate users and authorize access to resources.

Answer: C

Explanation:

Here's why:

SAML 2.0 is the standard for web-based SSO: It's a mature and widely supported protocol for exchanging authentication and authorization data between identity providers (like Okta) and service providers (like OCI).

Direct Federation: Configuring Okta as a SAML IdP in OCI establishes a direct trust relationship, eliminating the need for intermediaries like VPNs or AD FS.

Group Mapping: OCI allows you to map Okta groups to OCI groups. This is crucial for implementing role-based access control (RBAC) and granting users access to specific OCI compartments based on their existing Okta group memberships. This simplifies user management and ensures consistent access policies.

Why the other options are less suitable:

B). Use SCIM provisioning: While SCIM (System for Cross-domain Identity Management) is useful for user lifecycle management (creating, updating, and deleting users), it's not the primary mechanism for SSO. It focuses on provisioning identities, not authenticating them for access. You would still need SAML for SSO.

C). Establish a VPN connection and use AD FS: This adds unnecessary complexity. A VPN is for network connectivity, not identity federation. Introducing AD FS adds another layer of infrastructure and management overhead when a direct SAML integration is available.

D). Create a custom application: Building a custom application is a complex and time-consuming approach. It requires significant development effort and ongoing maintenance. Using the built-in SAML integration is far more efficient and secure.

NEW QUESTION # 12

What is an IdP in the context of federating Oracle Cloud Infrastructure with external identity providers?

- A. A service that calls upon a service provider to authenticate users
- B. An Oracle Cloud Infrastructure component that manages access to resources
- **C. A service that provides identifying credentials and authentication for users**
- D. A security protocol used to authenticate users in a federated environment

Answer: C

Explanation:

An Identity Provider (IdP) in OCI federation is a service that authenticates users and provides their identity credentials, such as Microsoft Entra ID or another SAML-compliant provider. It doesn't merely call a service provider (Option A) or act as a protocol (Option B-e.g., SAML is the protocol, not the IdP). It's also distinct from OCI's internal resource management components (Option D), like IAM. OCI's identity federation documentation defines the IdP's role in enabling single sign-on (SSO) across clouds.

NEW QUESTION # 13

In the context of federating Oracle Cloud Infrastructure with external identity providers, what is an IdP?

- A. An Oracle Cloud Infrastructure feature that controls resource access
- **B. A service that issues credentials and authenticates users**
- C. A service that requests authentication from a service provider
- D. A security protocol for user authentication in a federated setup

Answer: B

Explanation:

In the context of identity federation, an Identity Provider (IdP) is the source of truth for user identities. It's the system that:

Stores user credentials: This includes usernames, passwords, and other authentication factors.

Authenticates users: It verifies user identities when they try to access resources.

Issues security tokens or assertions: After successful authentication, the IdP provides tokens (like SAML assertions or OAuth tokens) that are used by the service provider (in this case, OCI) to grant access.

Here's why the other options are incorrect:

b). A service that requests authentication from a service provider: This describes the role of a Service Provider (SP), not an IdP. The SP relies on the IdP for authentication.

c). An Oracle Cloud Infrastructure feature that controls resource access: This describes OCI's Identity and Access Management (IAM) service, which works with federated IdPs but is not the IdP itself.

d). A security protocol for user authentication in a federated setup: While protocols like SAML and OAuth are used in federation,

the IdP is the entity that uses these protocols, not the protocol itself.

NEW QUESTION # 14

Which role is required under the Microsoft Customer Agreement to accept a private offer in the Azure Marketplace for Oracle Database@Azure?

- A. Free + Paid permissions
- B. User access administrator role
- C. Billing account owner or contributor role
- D. Enterprise administrator role

Answer: C

Explanation:

To accept a private offer in the Azure Marketplace for Oracle Database@Azure, the user must have the Billing Account Owner or Contributor role under the Microsoft Customer Agreement. This role grants permissions to manage billing and purchasing activities, which are required to finalize the private offer created by Oracle Sales. Options A and B lack the necessary billing authority, while Option D (Enterprise Administrator) is a broader role not specifically tied to Azure Marketplace transactions. This is outlined in Oracle's Database@Azure onboarding process documentation.

NEW QUESTION # 15

Which task is the customer responsible for when using Oracle Database on Google Cloud?

- A. Provision Exadata VM cluster in OCI
- B. Provision Exadata Infrastructure through the Google Cloud Console
- C. Provision containers and pluggable databases in the Google Cloud Console
- D. Update infrastructure and software in OCI

Answer: C

Explanation:

Here's a breakdown of responsibilities in the Oracle Database on Google Cloud offering:

Customer Responsibility: The customer is responsible for managing the Oracle Database itself, including:

Provisioning Container Databases (CDBs) and Pluggable Databases (PDBs): This is the core database administration task that remains with the customer.

Database configuration, patching, and upgrades (within the database itself): While the underlying infrastructure is managed by Oracle and Google, the database software and its configuration are the customer's responsibility.

Data management, backups, and recovery: These standard database operations are handled by the customer.

NEW QUESTION # 16

.....

The contents of 1Z0-1151-25 exam torrent was all compiled by experts through the refined off textbooks. Hundreds of experts simplified the contents of the textbooks, making the lengthy and complex contents easier and more understandable. With 1Z0-1151-25 study tool, you only need 20-30 hours of study before the exam. 1Z0-1151-25 guide torrent provides you with a brand-new learning method. In the course of doing questions, you can memorize knowledge points. You no longer need to look at the complicated expressions in the textbook. Especially for those students who are headaches when reading a book, 1Z0-1151-25 Study Tool is their gospel. Because doing exercises will make it easier for one person to concentrate, and at the same time, in the process of conducting a mock examination to test yourself, seeing the improvement of yourself will makes you feel very fulfilled and have a stronger interest in learning. 1Z0-1151-25 guide torrent makes your learning process not boring at all.

Official 1Z0-1151-25 Study Guide: <https://www.freedumps.top/1Z0-1151-25-real-exam.html>

You can understand each version's merits and using method in detail before you decide to buy our 1Z0-1151-25 study materials, With the 1Z0-1151-25 online test engine, you will attain all necessary knowledge as soon as possible, It is true that many people want to pass the 1Z0-1151-25 exam, FreeDumps web-based Oracle Cloud Infrastructure 2025 Multicloud Architect Professional (1Z0-1151-25) practice exam software is usable only with a good internet connection, For offline practice, our 1Z0-1151-25 desktop practice test software is ideal.
