최신버전 C_THR81_2505최고품질 덤프문제보기 시험덤프

SAP C_THR81_2505 덤프는 고객님의SAP C_THR81_2505시험패스요망에 제일 가까운 시험대비자료입니다. 많은 자료정리 필요없이 Pass4Test에서 제공해드리는 깔끔한SAP C_THR81_2505덤프만 있으면 자격증을 절반 취득한 것과 같습니다. SAP C_THR81_2505 덤프를 다운받아 열공하세요.

최신 SAP Certified Associate C_THR81_2505 무료샘플문제 (Q84-Q89):

질문 # 84

How do you set the event date in Compensation Information for the jobinfo_FTE_Comp cross-entity rule?

Scenario 1: HR Transaction Rules

7 of 10

How do you set the event date in Compensation Information for the Jobinfo_FTE_Comp cross-entity rule?

Then

Set Spot Bonus Model Employment Details Model Job Information Event Date to be equal to Spot Bonus Model Spot Bonus Employment Details Job In

Then

Set Compensation Information Model Employment Details Model Job Information Event Date to be equal to Job Information Event Date

Then

Set Compensation Information Model Event Date value to be equal to Compensation Information Model Employment Details Model Job Info

Then

Set Job Information Model Employment Details Model Compensation Information Event Date to be equal to Job Information Model Event Da
The rule selects one entry from the collection "Compensation Information" where...

- A. Option C
- B. Option B
- C. Option A
- D. Option D

정답: D

설명:

To set the event date in Compensation Information for the Jobinfo_FTE_Comp cross-entity rule, Option D is the correct method. The approach ensures that the Event Date field in the Compensation Information section aligns with the Event Date in Job Information. This synchronization is crucial for maintaining consistency in effective dates across entities during HR transactions.

Scenario 1: HR Transaction Rules

질문 # 85

What is the recommended practice to start the event reason derivation rules?

- A. The first IF clause must check if the event reason value is NULL, then skip the event reason derivation.
- B. The first IF clause must check if the event reason value is NULL, then skip the event reason derivation.
- C. The first IF clause must be blank
- D. The first IF clause must be set to Always True.

정답: B

설명:

The recommended practice to start event reason derivation rules is to begin with a condition that checks if the event reason value is NULL. If the value is NULL, the rule skips the event reason derivation process. This approach prevents unnecessary processing and ensures that only valid scenarios trigger further rule logic, improving system performance and accuracy.

Scenario 1: HR Transaction Rules

질문 # 86

Which destination objects do you select for the Valid When and Composite associations? Note: There are 2 correct answers to this question.

- A. Valid When association - Higher level object
- B. Composite association - Child object
- C. Composite association - Parent object
- D. Valid When association - Lower level object

정답: A,B

설명:

* Valid When Association:

This is used to define conditional relationships and is applied to higher-level objects.

* Composite Association:

This is used to create parent-child relationships, where the child object is the destination.

질문 # 87

How should you build the IF condition to identify the user when the employee is updating their own Personal Information?

- A. Option B
- B. Option D
- C. Option C
- D. Option A

정답: C

설명:

To identify the user when the employee is updating their own personal information, the IF condition in Option C is correct. This configuration:

Checks if the Context.Current User is equal to the Login User.

Ensures that the rule applies only when the employee is making changes to their own personal data.

This approach is aligned with SAP SuccessFactors logic for self-service scenarios, enabling accurate identification of the user in such workflows.

Scenario 2: Approvals for Self-Service

질문 # 88

What are some of the position management application-specific rule scenarios? Note: There are 3 correct answers to this question.

- A. Create Right to Return for Incumbent
- B. Trigger Rules for Off Cycle Event Batch
- C. Trigger Rules to Calculate Full-Time Equivalent
- D. Update Rule for Mass Change Run
- E. Derive Job Requisition Template in Recruiting Integration

정답: A,C,D

설명:

Application-specific rule scenarios in Position Management include:

A . Create Right to Return for Incumbent:

This rule supports the creation of a right-to-return record for an incumbent when a position-related action occurs, such as a temporary assignment.

B . Update Rule for Mass Change Run:

This rule automates updates during mass position changes, ensuring consistent application of business logic across multiple positions.

C . Trigger Rules to Calculate Full-Time Equivalent:

This rule calculates the FTE value based on position or job information attributes, ensuring accurate reporting and compliance.

These rules enhance the flexibility and functionality of position management processes.

질문 # 89
