Free PDF Professional Apple - DEP-2025 - Apple Deployment and Management Exam Valid Test Pass4sure

If you are a new comer for our DEP-2025 practice engine, you may doubt a lot on the quality, the pass rate, the accuracy and so on. You can go for the free demos of the DEP-2025 learning braindumps and make sure that the quality of our DEP-2025 Exam Questions And Answers which can serve you the best. You are not required to pay any amount or getting registered with us for downloading free demos of our DEP-2025 training guide. They are all free for you to download.

Apple Deployment and Management Exam Sample Questions (Q123-Q128):

NEW QUESTION # 123

What do you use to manually add a Mac to Apple Business Manager or Apple School Manager?

- A. Apple Configurator for Mac
- **B. Apple Configurator for iPhone**
- C. System Settings
- D. Xcode

Answer: B

Explanation:

Apple requires the use of Apple Configurator for iPhone to manually add Macs into Apple Business Manager or Apple School Manager. The workflow involves placing the target Mac into Device Enrollment mode and then scanning an on-screen image with the Configurator app running on an iPhone. Once completed, the Mac is added to the organization's ABM account with a 30-day provisional period. Apple Configurator for Mac, while useful for restoring and preparing iOS/iPadOS devices, does not support manually adding Macs to ABM. System Settings and Xcode are unrelated to device enrollment workflows. This method is Apple's prescribed approach for organizations acquiring Macs outside normal reseller channels.

NEW QUESTION # 124

You use MDM to manage your organization's content caching server. You want the content caching server to cache only software and app updates. Which cache content type should you define in the payload?

- A. iCloud
- B. All Updates
- C. Shared and iCloud
- **D. Shared**

Answer: D

Explanation:

Apple's Content Caching service improves bandwidth efficiency by storing downloaded data locally.

Administrators can configure the caching server's behavior with MDM payloads. Apple Learning clarifies that to cache software updates, apps, and books, the cache content type must be set to Shared. The "Shared" category includes App Store apps, macOS updates, iOS/iPadOS updates, and other publicly distributed content. In contrast, the iCloud option caches personal iCloud data such as photos and documents. Selecting

"Shared and iCloud" enables both categories, which is not the requirement in this case. There is no "All Updates" option in Apple's terminology. By choosing "Shared," IT ensures only organizationally relevant updates are cached, reducing storage and focusing performance where needed.

References: Apple Platform Deployment - "Configure content caching with MDM."

NEW QUESTION # 125

You try to start in macOS Recovery. You're asked to choose a user and enter a password. Why are you asked to choose a user and enter a password?

- **A. FileVault is turned on**
- B. Recovery Lock is enabled
- C. Lockdown Mode is turned on
- D. Startup Security Utility is set to Full Security

Answer: A

Explanation:

FileVault encryption requires authentication. The macOS Security Overview states, "When FileVault is enabled, macOS Recovery requires a FileVault-enabled user account and password to decrypt the disk." Option D (Recovery Lock) uses a separate password, not user selection.

References:

macOS Security Overview, "FileVault in Recovery" section.

Apple Platform Security Guide, "Recovery Access" section.

NEW QUESTION # 126

What can Platform Single Sign-on (Platform SSO) for macOS give users the ability to do?

- **A. Synchronize local account credentials with an identity provider (IdP)**
- B. Turn on Kerberos SSO
- C. Leverage IdP passkey support in iCloud Keychain
- D. Get a Federated Managed Apple Account

Answer: A

Explanation:

Platform SSO syncs credentials with an IdP. The macOS Security Overview states, "Platform SSO allows users to synchronize their local Mac account password with an identity provider, providing a seamless login experience." Option B is a separate feature, C is managed via ABM, and D is unrelated to Platform SSO.

Reference:

macOS Security Overview, "Platform SSO" section.

Apple Platform Deployment Guide, "Identity Management" section.

NEW QUESTION # 127

Which type of enrollment supports custom apps?

- A. Automated Device Enrollment
- B. Device Enrollment
- **C. All of the above**
- D. User Enrollment

Answer: C

Explanation:

Custom apps, developed in-house and signed with an Apple Developer account, can be deployed through all three enrollment types: Automated Device Enrollment (ADE), Device Enrollment, and User Enrollment. ADE (option A) supports custom app distribution to supervised, organization-owned devices via MDM and Managed Distribution. Device Enrollment (option B) allows custom app installation on enrolled devices, supervised or not, through MDM. User Enrollment (option C) supports custom apps for BYOD, though with limited control over personal devices. The Apple Platform Deployment Guide confirms that custom apps are compatible with all enrollment methods when paired with MDM, making D the correct answer.

Reference: Apple Platform Deployment Guide (Chapter: Custom Apps).

NEW QUESTION # 128

.....

Keep reading because we have discussed specifications of Apple Deployment and Management Exam DEP-2025 PDF format, desktop Apple Deployment and Management Exam DEP-2025 practice exam software, and Apple Deployment and Management Exam DEP-2025 web-based practice test. PassLeaderVCE is aware that many DEP-2025 exam applicants can't sit in front of a computer for many hours to study for the DEP-2025 examination.
