

Huawei H12-725_V4.0題庫 - H12-725_V4.0考古題

P.S. VCESoft在Google Drive上分享了免費的、最新的H12-725_V4.0考試題庫：<https://drive.google.com/open?id=1fHUEOYN4qmXPd-WHOBZOHIWSd64ljSpl>

患難可以試驗一個人的品格，非常的境遇方才可以顯出非常的氣節；風平浪靜的海面，所有的船隻都可以並驅競勝。命運的鐵拳擊中要害的時候，只有大勇大智的人才能夠處之泰然。你是大智大勇的人嗎？如果你的IT認證考試沒有做好考前準備，你還處之泰然嗎？當然，因為你有 VCESoft Huawei的H12-725_V4.0考試培訓資料在手上，任何考試困難都不會將你打到。

華為H12-725_V4.0（HCIP-Security V4.0）考試對於想在安全領域增強知識和技能的安全專業人士來說是一項重要的認證。該認證在全球範圍內得到認可，並受到雇主的高度重視。該考試具有挑戰性，需要在安全領域擁有高水平的專業知識和技能。然而，它為候選人在就業市場上提供了競爭優勢，驗證了他們在安全技術和解決方案方面的熟練程度。

H12-725_V4.0考古題 & H12-725_V4.0考試指南

在如今互聯網如此發達社會裏，選擇線上培訓已經是很普遍的現象。VCESoft就是眾多線上培訓網站之一。VCESoft的線上培訓有著多年的經驗，可以為參加Huawei H12-725_V4.0 認證考試的考生提供高品質的學習資料，來能滿足考生的所有需求。

華為 H12-725_V4.0（HCIP-Security V4.0）考試是一個證書計劃，旨在驗證 IT 專業人員在安全領域中的知識和專業技能。此考試是一個高級級別的證書計劃，需要候選人具備廣泛的安全技術、網絡安全和網絡安全管理知識。考試旨在測試候選人規劃、設計、實施和管理安全系統的能力。

最新的 HCIP-Security H12-725_V4.0 免費考試真題 (Q45-Q50):

問題 #45

Match the HTTP control items with the corresponding descriptions.

POST		When file upload is allowed, you can configure an alert threshold and a block threshold to control the file size.
Internet access using a proxy		It is commonly used to send information to the server through web pages. For example, use this method when you post threads, submit forms, and use your user name and password to log in to a specific system.
File upload/download size		You can use a proxy server to access specified websites. To implement this function, you must deploy the firewall between the intranet and the proxy server.

答案:

解題說明:

POST	File upload/download size	When file upload is allowed, you can configure an alert threshold and a block threshold to control the file size.
Internet access using a proxy	POST	It is commonly used to send information to the server through web pages. For example, use this method when you post threads, submit forms, and use your user name and password to log in to a specific system.
File upload/download size	Internet access using a proxy	You can use a proxy server to access specified websites. To implement this function, you must deploy the firewall between the intranet and the proxy server.

Explanation:

A screenshot of a computer error message AI-generated content may be incorrect.

HTTP Control Item	Corresponding Description
POST	It is commonly used to send information to the server through web pages. For example, use this method when you post threads, submit forms, and use your username and password to log in to a specific system.
Internet access using a proxy	You can use a proxy server to access specified websites. To implement this function, you must deploy the firewall between the intranet and the proxy server.
File upload/download size	When file upload is allowed, you can configure an alert threshold and a block threshold to control the file size.

POST # Sending Information to the Server

* The POST method in HTTP is used to send data to a web server.

* Examples include:

* Submitting login credentials.

* Posting comments or messages on a forum.

* Uploading files via web applications.

* Unlike GET, POST hides sensitive information in the request body, making it more secure for transmitting login credentials or

personal data.

Internet Access Using a Proxy # Firewall Deployment for Proxy Access

- * A proxy server allows users to access the internet through a controlled gateway.
- * To enforce security policies, a firewall must be deployed between the intranet and the proxy server.
- * Proxies are used for:
 - * Content filtering (blocking unwanted websites).
 - * Access control (restricting web usage based on user roles).
 - * Anonymization (hiding the user's original IP address).

File Upload/Download Size # Controlling Upload Limits

- * Firewalls and security devices can restrict file upload/download sizes to:
 - * Prevent excessive bandwidth usage.
 - * Block potentially malicious file uploads.
- * Alert and Block Thresholds:
 - * Alert threshold: Logs a warning if a file exceeds a specific size.
 - * Block threshold: Prevents files larger than the configured limit from being uploaded or downloaded.

問題 #46

Which of the following statements is false about Eth-Trunk? (Select All that Apply)

- A. An Eth-Trunk must have at least one active link.
- B. An Eth-Trunk interface can be a Layer 2 or Layer 3 interface.
- C. An Eth-Trunk interface is a logical interface.
- D. An Eth-Trunk must have at least two member links.

答案: D

解題說明:

Comprehensive and Detailed Explanation:

- * Eth-Trunk can be created with just one member link; it is not mandatory to have two links.
- * At least one active link is required for the Eth-Trunk to function.
- * Eth-Trunk is a logical interface that can work at Layer 2 or Layer 3.
- * Why is A false?
- * While multiple links are recommended, an Eth-Trunk can work with just one active link.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Ethernet Trunking
- * Huawei USG Firewalls Link Aggregation Guide

問題 #47

iMaster NCE-Campus has a built-in LDAP module that enables it to function as an LDAP server to interconnect with access devices through LDAP.

- A. TRUE
- B. FALSE

答案: B

解題說明:

Comprehensive and Detailed Explanation:

- * iMaster NCE-Campus does not have a built-in LDAP server. Instead, it integrates with external authentication servers such as:
 - * RADIUS servers
 - * Active Directory (AD) with LDAP
 - * HWTACACS servers
- * Why is this statement false?
- * iMaster NCE-Campus can connect to LDAP but does not act as an LDAP server itself.

HCIP-Security References:

- * Huawei HCIP-Security Guide # iMaster NCE-Campus Authentication Integration

問題 #48

Which of the following statements is false about Eth-Trunk?(Select All that Apply)

- A. The total bandwidth of an Eth-Trunk interface is the sum of the bandwidths of all its member interfaces. This increases the interface bandwidth.
- B. The physical interfaces that are bundled into an Eth-Trunk interface are its member interfaces.
- C. The manual mode can detect not only link disconnections but also link faults and incorrect connections.
- D. If a member interface of the Eth-Trunk interface is Down, traffic can still be transmitted through other member interfaces.

答案: C

解題說明:

Comprehensive and Detailed Explanation:

* Eth-Trunk (Ethernet Trunking) aggregates multiple physical links into a single logical interface, improving bandwidth and redundancy.

* Manual mode limitations:

* Manual mode does NOT detect link faults or incorrect connections-it only detects link disconnections.

* To detect link faults, LACP (Link Aggregation Control Protocol) mode is required.

* Why is D false?

* Manual mode can only detect link disconnections but not link faults or incorrect connections.

HCIP-Security References:

* Huawei HCIP-Security Guide # Eth-Trunk Configuration

* Huawei USG6000 Firewalls Link Aggregation Guide

問題 #49

Which of the following statements is false about the restrictions on configuring bandwidth profiles in parent and child policies on a firewall?

- A. The parent and child policies must reference different bandwidth profiles.
- B. The maximum bandwidth specified in a child policy cannot be greater than that specified in the parent policy.
- C. Both the parent and child policies must both use the same traffic limiting mode; that is, either "setting the upstream and downstream bandwidths" or "setting the overall bandwidth".
- D. The connection limit specified in a child policy cannot be smaller than that specified in the parent policy.

答案: A

解題說明:

Comprehensive and Detailed Explanation:

* Bandwidth policies use a hierarchical structure (Parent # Child).

* Child policies must follow parent policies in terms of bandwidth restrictions.

* Why is C false?

* A parent and child can use the same bandwidth profile.

* The firewall allows inheritance of bandwidth settings.

HCIP-Security References:
