If you purchase our study materials to prepare the 300-430 Exam, your passing rate will be much higher than others. Also, the operation of our study material is smooth and flexible and the system is stable and powerful. You can install the 300-430 exam guide on your computers, mobile phone and other electronic devices. There are no restrictions to the number equipment you install. In short, it depends on your own choice. We sincerely hope that you can enjoy the good service of our products.

Cisco 300-430 Certification Exam is an essential qualification for network professionals who are responsible for designing, deploying, and managing enterprise wireless networks. 300-430 exam covers a range of topics, including wireless network design, configuration, troubleshooting, and security, and requires candidates to have a solid understanding of Cisco wireless networking technologies. Those who successfully pass the exam will have the necessary skills and knowledge to implement and manage enterprise wireless networks using Cisco technologies.

100% Pass Quiz 2026 Cisco 300-430 – Professional Valid Braindumps Ppt

Every user has rated study material positively and passed the 300-430 Exam. Actual4Cert gives a guarantee to the customers that if

they fail to pass the Implementing Cisco Enterprise Wireless Networks (300-430) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q281-Q286):

NEW QUESTION # 281

After receiving an alert about a rogue AP, a network engineer logs into Cisco Prime Infrastructure and looks at the floor map where the AP that detected the rogue is located. The map is synchronized with a mobility services engine that determines that the rogue device is actually inside the campus. The engineer determines that the rogue is a security threat and decides to stop it from broadcasting inside the enterprise wireless network. What is the fastest way to disable the rogue?

- A. Classify the rogue as malicious in Cisco Prime.
- B. Go to the location the rogue device is indicated to be and disable the power.
- C. Update the status of the rogue in Cisco Prime to contained.
- D. Create an SSID similar to the rogue to disable clients from connecting to it.

Answer: C

Explanation:

When a network engineer receives an alert about a rogue AP and determines it is a security threat inside the campus, the fastest way to disable it is by updating its status in Cisco Prime Infrastructure to 'contained'. This action instructs the system to prevent the rogue device from communicating with other devices on the network, effectively isolating it without having to physically locate or manually disable it.

NEW QUESTION # 282

An engineer set up RADIUS for WLC management to harden the configuration. Read-only access must be provided to a user. Which Service-Type attribute must be configured on the RADIUS server to meet this requirement?

- A. NAS Prompt
- B. Call Check
- C. Administrative
- D. Callback Login

Answer: C

NEW QUESTION # 283

Where is Cisco Hyperlocation enabled on a Cisco Catalyst 9800 Series Wireless Controller web interface?

- A. Flex Profile
- B. Policy Profile
- C. AP Join Profile
- D. RF Profile

Answer: C

Explanation:

Explanation

Procedure	
Step 1	In the Configuration > Tags & Profiles > AP Join page, click Add . The Add AP Join Profile dialog box appears.
Step 2	Under the AP > Hyperlocation tab, select the Enable Hyperlocation check box.

NEW QUESTION # 284

Which two configurations are applied on the WLC to enable multicast, check multicast stream subscriptions, and stream content only to subscribed clients? (Choose two)

- A. Enable IGMP snooping
- B. Enable 802.3x flow control mode.
- C. Enable broadcast forwarding
- D. Set the IGMP timeout to 180 seconds
- E. Set the AP multicast to 238.255.255.255

Answer: A,E

Explanation:

IGMP snooping is a feature that allows a network switch to listen to the Internet Group Management Protocol (IGMP) network traffic. This feature enables the switch to identify the multicast streams to which hosts are interested and to forward multicast traffic intelligently. By enabling IGMP snooping on the Wireless LAN Controller (WLC), it ensures that multicast streams are only forwarded to the access points (APs) where clients are subscribed to them. Setting the AP multicast mode to a specific multicast address, such as

238.255.255.255, allows the WLC to send multicast traffic to APs using this address, which helps in efficient distribution of the multicast stream.

NEW QUESTION # 285

A company wants to switch to BYOD to reduce IT support costs for the company. Which option is an impact of BYOD should be considered?

- A. decreased support calls
- B. increased phishing attacks
- C. restricted device enforcement
- D. increased VPN connections

Answer: D

NEW QUESTION # 286

.....

Success in the Cisco 300-430 Exam paves the way toward high-paying jobs, promotions, and skills verification. Hundreds of Cisco 300-430 test takers don't get success because of using Cisco outdated dumps. Due to failure, they lose money, time, and confidence. All these losses can be prevented by using updated and real Cisco Dumps of Actual4Cert.
