SAP C-CPI-2506 Interactive Ebook | Valid C-CPI-2506 Test Duration

Our worldwide after sale staff on the C-CPI-2506 exam questions will be online and reassure your rows of doubts as well as exclude the difficulties and anxiety with all the customers. Just let us know your puzzles on C-CPI-2506 study materials and we will figure out together. We can give you suggestion on C-CPI-2506 training engine 24/7, as long as you contact us, no matter by email or online, you will be answered quickly and professionally!

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 2	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 3	<ul style="list-style-type: none">Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.

Topic 4	<ul style="list-style-type: none"> • Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

SAP Certified Associate - Integration Developer Sample Questions (Q50-Q55):

NEW QUESTION # 50

How do you configure a SOAP adapter for asynchronous processing?

- **A. Message Exchange Pattern: One-Way. Process Settings: Robust**
- B. Message Exchange Pattern: Request-Reply. Process Settings: Robust
- C. Message Exchange Pattern: One-Way. Process Settings: WS Standard
- D. Message Exchange Pattern: Request-Reply. Process Settings: WS Standard

Answer: A

Explanation:

For asynchronous processing in a SOAP adapter (SAP Cloud Integration):

Use Message Exchange Pattern = One-Way # Indicates no response is expected.

Choose Process Settings = Robust # Ensures message reliability and error handling in async flows.

Other combinations:

Request-Reply # Used for synchronous scenarios, not async.

WS Standard # Not the correct configuration for async reliability in CPI SOAP adapter.

Thus, correct async configuration is: One-Way + Robust.

NEW QUESTION # 51

What do you use in an integration flow to handle unexpected errors?

- **A. Exception-handling subprocesses**
- B. Exception handler integration flow elements
- C. Try-catch subprocesses
- D. Status code checks

Answer: A

Explanation:

You use exception-handling subprocesses in an integration flow to handle unexpected errors. Exception-handling subprocesses are special types of subprocesses that are triggered when an error occurs in the main process or another subprocess. You can define custom actions and logic to handle different types of errors using exception-handling subprocesses. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 52

Which SAP offering manages integrations across hybrid and multicloud environments?

- **A. SAP Integration Suite manages integrations across hybrid and multicloud environments.**
- B. SAP process Orchestration manages integrations across hybrid and multicloud environments.
- C. SAP Business Technology Platform manages integrations across hybrid and multicloud environments.
- D. SAP Cloud Platform Integration manages integrations across hybrid and multicloud environments.

Answer: A

Explanation:

SAP Integration Suite is the strategic integration platform-as-a-service (iPaaS) from SAP. It provides a comprehensive set of integration capabilities for hybrid and multicloud landscapes.

It connects on-premise SAP systems, cloud SAP solutions (e.g., S/4HANA Cloud, SuccessFactors, Ariba), and third-party

applications.

It offers capabilities like Cloud Integration, API Management, Event Mesh, Open Connectors, and Integration Advisor to support various integration patterns.

SAP explicitly positions Integration Suite as the solution to manage end-to-end integrations across heterogeneous and distributed IT landscapes.

Other options:

SAP Cloud Platform Integration was the older name of Cloud Integration (now part of Integration Suite).

SAP Process Orchestration is the legacy on-premise middleware and not designed for multicloud/hybrid environments.

SAP BTP is the overall platform; integration is only one capability within it.

NEW QUESTION # 53

You download the Performance-Traceability policy from the SAP Business Accelerator Hub and implement it in an API proxy. What can you use to view the data covered the policy?

- A. SAP Analytics Cloud
- B. A third party monitoring tool
- C. The API monitor under Monitor# Integration APIs
- D. SAP Cloud ALM

Answer: C

Explanation:

When you implement the Performance-Traceability policy in API Management:

It enables detailed monitoring of API calls, including latency, performance metrics, and message traces.

This data is available in the API Monitor (Monitor # Integration APIs) within the SAP Integration Suite cockpit.

Other options:

SAP Cloud ALM # General monitoring, not API trace-specific.

Third-party monitoring # Possible but not where SAP policy data is viewed.

SAP Analytics Cloud # For analytics, not direct monitoring of API proxy performance.

Thus, the correct monitoring location is API monitor under Monitor # Integration APIs.

NEW QUESTION # 54

What are the maturity levels of the SAP Integration Solution Advisory Method-ology? Note: There are 2 answers to this question.

- A. Enable your integration structure.
- B. Implement your integration architectural strategy.
- C. Design your hybrid integration platform.
- D. Assess your integration strategy

Answer: C,D

Explanation:

The maturity levels of the SAP Integration Solution Advisory Methodology are as follows:

Assess your integration strategy. This level helps you evaluate your current integration landscape and identify the gaps and challenges that need to be addressed.

Design your hybrid integration platform. This level helps you define your target integration architecture and select the best-fit integration technologies and tools for your scenarios.

Implement your integration architectural strategy. This level helps you execute your integration projects and deliver value to your business.

Enable your integration structure. This level helps you establish a governance model and best practices for your integration operations and maintenance. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 55

.....

Everyone has the right to pursue happiness and wealth. You can rely on the C-CPI-2506 certificate to support yourself. If you do

not own one or two kinds of skills, it is difficult for you to make ends meet in the modern society. After all, you can rely on no one but yourself. At present, our C-CPI-2506 study materials can give you a ray of hope. You can get the C-CPI-2506 certification easily with our C-CPI-2506 learning questions and have a better future.
