100% Pass 2026 Reliable Microsoft SC-200: New Braindumps Microsoft Security Operations Analyst Book

Real4exams understands the importance of your satisfaction with their SC-200 Exams Certification. To guarantee your confidence in their product, they offer a free demo of the Microsoft SC-200 exam questions in PDF format. This enables you to assess the quality of the SC-200 Practice Exam preparation before committing to purchasing the full package of Microsoft SC-200 test questions.

Microsoft SC-200 Certification Exam is suitable for security professionals who are responsible for monitoring and responding to security incidents in an organization. This includes security analysts, security engineers, security administrators, and other security

operations professionals. SC-200 exam tests their ability to use Microsoft security technologies to detect and respond to threats, investigate incidents, and implement security controls to prevent future attacks.

Microsoft SC-200 certification is a valuable credential for security professionals who are looking to advance their careers in the field of cybersecurity. Microsoft Security Operations Analyst certification demonstrates that the holder has the skills and knowledge needed to monitor and respond to security threats in Microsoft environments. Microsoft Security Operations Analyst certification is highly regarded by employers, as it validates that the holder has the skills and knowledge needed to protect critical business systems from cyber threats.

Microsoft Security Operations Analyst Sample Questions (Q41-Q46):

NEW QUESTION # 41

You have an Azure subscription that contains a guest user named User1 and a Microsoft Sentinel workspace named workspace1. You need to ensure that User1 can triage Microsoft Sentinel incidents in workspace1. The solution must use the principle of least privilege.

Which roles should you assign to User1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 42

Hotspot Question

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You have the hunting query shown in the following exhibit.

The users perform the following actions:

- User1 assigns User2 the Global administrator role.
- User1 creates a new user named User3 and assigns the user a Microsoft Teams license.
- User2 creates a new user named User4 and assigns the user the Security reader role.
- User2 creates a new user named User5 and assigns the user the Security operator role.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 43

You have the following environment:

Azure Sentinel

A Microsoft 365 subscription

Microsoft Defender for Identity

An Azure Active Directory (Azure AD) tenant

You configure Azure Sentinel to collect security logs from all the Active Directory member servers and domain controllers.

You deploy Microsoft Defender for Identity by using standalone sensors.

You need to ensure that you can detect when sensitive groups are modified in Active Directory.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure auditing in the Microsoft 365 compliance center.
- **B. Configure the Advanced Audit Policy Configuration settings for the domain controllers.**
- C. Modify the permissions of the Domain Controllers organizational unit (OU).

- **D. Configure Windows Event Forwarding on the domain controllers.**

Answer: B,D

Explanation:

NEW QUESTION # 44

You have a Microsoft 365 subscription that uses Microsoft Defender for Endpoint and contains a user named user1 and a Microsoft 365 group named Group1. All users are assigned a Defender for Endpoint Plan 1 license.

You enable Microsoft Defender XDR Unified role-based access control (RBAC) for Endpoints & Vulnerability Management.

You need to ensure that User1 can configure alerts that will send email notifications to Group1. The solution must follow the principle of least privilege.

Which permissions should you assign to User1?

- A. Manage security settings
- **B. Defender Vulnerability Management - Remediation handling**
- C. Alerts investigation
- D. Live response capabilities: Basic

Answer: B

NEW QUESTION # 45

You have an Azure subscription that has the enhanced security features in Microsoft Defender for Cloud enabled and contains a user named User1.

You need to ensure that User1 can export alert data from Defender for Cloud. The solution must use the principle of least privilege.

Which role should you assign to User1?

- **A. Owner**
- B. Reader
- C. Contributor
- D. User Access Administrator

Answer: A
