## Pass Guaranteed Quiz Lpi - 010-160 Accurate Exam Topic

After you purchase our 010-160 exam guide is you can download the test bank you have bought immediately. You only need 20-30 hours to learn and prepare for the exam, because it is enough for you to grasp all content of our study materials, and the passing rate is very high and about 98%-100%. Our laTest 010-160 Quiz torrent provides 3 versions and you can choose the most suitable one for you to learn. All in all, there are many merits of our 010-160 quiz prep.

### Lpi Linux Essentials Certificate Exam - version 1.6 Sample Questions (Q77-Q82):

#### NEW QUESTION # 77

Which of the following is a protocol used for automatic IP address configuration?

- A. DNS
- B. LDAP
- C. SMTP
- **D. DHCP**
- E. NFS

**Answer: D**

Explanation:

Explanation

DHCP stands for Dynamic Host Configuration Protocol. It is a protocol that provides quick, automatic, and central management for the distribution of IP addresses within a network. It also configures other network information, such as the subnet mask, default gateway, and DNS server information, on the device<sup>1</sup>. DHCP uses a client/server architecture, where a DHCP server issues unique IP addresses and automatically configures the devices that request them<sup>2</sup>. DHCP allows devices to move freely from one network to another and receive an IP address automatically, which is helpful with mobile devices<sup>1</sup>.

The other options are not protocols used for automatic IP address configuration. NFS stands for Network File System, which is a protocol that allows a user to access and modify files over a network as if they were on their own computer. LDAP stands for Lightweight Directory Access Protocol, which is a protocol that provides access to a centralized directory service that stores information about users, groups, computers, and other resources on a network. SMTP stands for Simple Mail Transfer Protocol, which is a protocol that enables the sending and receiving of email messages over a network. DNS stands for Domain Name System, which is a protocol that translates domain names into IP addresses and vice versa. References:

#### NEW QUESTION # 78

Which of the following are typical services offered by public cloud providers? (Choose three correct answers.)

- A. Graphics as a Service (GaaS)
- **B. Infrastructure as a Service(IaaS)**
- **C. Platform as a Service(PaaS)**
- **D. Software as a Service (SaaS)**
- E. Internet as aService(IaaS)

**Answer: B,C,D**

#### NEW QUESTION # 79

Which of the following commands creates the ZIP archive poems.zip containing all files in the current directory whose names end in .txt?

- A. `zcat *.txt poems.zip`
- B. `cat *.txt | zip poems.zip`
- C. `zip poems.zip *.txt`
- D. `zip *.txt > poems.zip`
- E. `zip cfz poems.zip *.txt`

**Answer: C**

Explanation:

Explanation

The `zip` command is used to create compressed archive files that can contain one or more files or directories.

The `zip` command takes the name of the archive file as the first argument, followed by the names of the files or directories to be included in the archive. You can also use wildcards to match multiple files or directories with a common pattern. For example, the command `zip poems.zip *.txt` will create the ZIP archive `poems.zip` containing all files in the current directory whose names end in `.txt`. The other commands are either invalid or do not perform the desired operation. The command `zip *.txt > poems.zip` will try to create an archive for each file ending in `.txt` and redirect the output to `poems.zip`, which is not a valid archive file. The command `zcat *.txt poems.zip` will try to decompress and concatenate the contents of the files ending in `.txt` and `poems.zip`, which is not a valid ZIP file. The command `zip cfz poems.zip *.txt` will fail because the options `c`, `f`, and `z` are not valid for the `zip` command. The command `cat *.txt | zip poems.zip` will try to read the contents of the files ending in `.txt` from the standard input and create an archive named `poems.zip`, but this will not preserve the file names or attributes of the original files.
