### NEW QUESTION # 12

What are the benefits of SAP AI-driven predictive analytics? Note: There are 3 correct answers to this question.

- A. Manual invoice processing
- B. Future trend forecasting
- C. Increased manual data entry
- D. Automated anomaly detection
- E. Real-time decision-making insights

**Answer: B,D,E**

Explanation:

SAP AI-driven predictive analytics provides significant benefits by enabling organizations to anticipate trends, make informed decisions, and automate anomaly detection. The correct answers are future trend forecasting, real-time decision-making insights, and automated anomaly detection, as these are core benefits documented in SAP's AI portfolio.

SAP documentation states: "SAP Business AI offers predictive analytics to enhance decision-making, provide personalized insights, and improve business processes. It supports future trend forecasting, real-time decision-making, and automated anomaly detection across functions like finance, supply chain, and marketing." Future trend forecasting allows organizations to "predict customer demand, financial trends, and operational risks," as seen in SAP S/4HANA's forecasting of incoming payments. Real-time decision-making insights enable

"proactive responses to market changes" by analyzing live data, such as in SAP Integrated Business Planning.

Automated anomaly detection identifies "unusual patterns in financial transactions or supply chain operations," enhancing security and efficiency, as exemplified by SAP AI Business Services' fraud detection capabilities.

The incorrect options-increased manual data entry and manual invoice processing-are contrary to SAP's automation focus.

Predictive analytics aims to reduce manual efforts, not increase them, and manual invoice processing is replaced by solutions like SAP Cash Application. SAP's emphasis on AI-driven automation and insights, as seen in case studies like Henkel's supply chain optimization, confirms the selected benefits.

### NEW QUESTION # 13

Which SAP AI solutions are used for fraud detection and risk assessment?

There are 2 correct answers to this question.

Response:

- A. SAP Extended Warehouse Management
- **B. SAP AI Business Services**
- C. SAP SuccessFactors Learning
- **D. SAP Predictive Analytics**

**Answer: B,D**

#### NEW QUESTION # 14

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be used in all SAP S/4HANA Cloud editions
- **B. Customers can grant access to the dashboard to partners**
- **C. It can be accessed by using SAP For Me**
- D. Customers can use the dashboard in the dev, test, and production tenants

**Answer: B,C**

Explanation:

The SAP clean core dashboard provides tools to monitor and manage clean core compliance in SAP S/4HANA Cloud environments. The correct answers are "Customers can grant access to the dashboard to partners" and "It can be accessed by using SAP For Me," as these are documented features of the clean core dashboard.

SAP documentation states: "The clean core dashboard in SAP S/4HANA Cloud enables customers to monitor system compliance with clean core principles, ensuring minimal customizations and seamless upgrades. It can be accessed through SAP For Me, providing a centralized interface for system management." Additionally,

"customers can grant access to the dashboard to partners," allowing external consultants or service providers to collaborate on maintaining clean core standards. This feature supports "transparent collaboration" and ensures alignment with SAP's extensibility guidelines.

The incorrect options are not features of the clean core dashboard. The dashboard is not explicitly documented as available in "dev, test, and production tenants," as its primary use is in production systems for monitoring live environments. The option "It can be used in all SAP S/4HANA Cloud editions" is incorrect, as the dashboard's availability may vary depending on specific editions (e.g., public vs. private cloud). SAP's clean core strategy documentation confirms the selected features as key capabilities of the dashboard.
