Desktop Adobe AD0-E117 Practice Exam Software is a one-of-a-kind and very effective software developed to assist applicants in preparing for the Adobe AD0-E117 certification test. The Desktop Adobe AD0-E117 Practice Exam Software that we provide includes a self-assessment feature that enables you to test your knowledge by taking simulated tests and evaluating the results.

Adobe Experience Manager Architect Master Sample Questions (Q14-Q19):

NEW QUESTION # 14

A customer with a large volume of assets and site pages needs to upgrade from AEM 6.4 with MongoMK installation to AEM 6.5 MongoMK. The architect recommends reindexing and the customer wants to keep downtime in the production environment minimal during the upgrade process.

Which two options would the architect choose? (Choose two.)

- A. Use crx2oak jar with -doc-traversal command line parameter
- B. Run the offline indexing process on the MongoDB replica
- C. Use oak-run jar with -doc-traversal command line parameter
- D. Run the online indexing process on the MongoDB replica

Answer: B,D

NEW QUESTION # 15

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

- * The client currently has a dozen static templates that they want to move to editable templates.
- * The existing pages use the parsys paragraph system for storing components.
- * Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
- * The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

- A. 1. Use the same page components for editable templates
2. Use a new template type for each static template
- **B. 1. Use a new page component for editable templates based on the core components page component
2. Migrate page properties to respective components dialogues**
- C. 1. Use the same page components for editable templates
2. Create a new editable template based on each of the existing page components
- D. 1. Use a new page component for editable templates based on the core components page component
2. Convert page properties to policies

Answer: B

Explanation:

Use a new page component for editable templates based on the core components page component and migrate page properties to respective components dialogues^{1,2}. According to Adobe Experience Manager documentation¹, static templates are not considered a best practice and editable templates should be used instead. AEM Modernization tools can help migrate from static to editable templates. Editable templates use core components as their base components² and page properties can be migrated to component dialogues using content policies².

NEW QUESTION # 16

After building an AEMaaS website, it was found that non-cached secured static content will put too much load on the servers. How can this secured static content be cached without creating a security concern?

- **A. Cache the secured content on the dispatcher using AuthChecker module**
- B. Cache the secured content on the CDN and return "Cache-Control: private" on the HTTP header
- C. Cache the secured content on the dispatcher and return "Cache-Control: private" on the HTTP header
- D. Cache the secured content on the CDN using AuthChecker module

Answer: A

NEW QUESTION # 17

A client using AEM 6.5 on-premise is experiencing an unsustainable repository growth of 100Gb a day. After investigation, an Architect finds out that the DAM is causing this issue. Each image uploaded to the DAM triggers the creation of approximately 100 renditions, necessary by business to consume in different channels and systems. The client also complains about stale content reported by site visitors happening randomly in pages where article-related components are present.

How should the Architect address these issues?

- **A. Leverage AEM Adaptive Image Servlet, cache image variations in Dispatcher, and reimplement article-related components to use AJAX to load the content**
- B. Leverage AEM Adaptive Image Servlet cache image variations in Dispatcher, and implement a cache TTL in Dispatcher
- C. Split WCM and DAM in separate instances, set up Connected Assets, and implement a workflow to purge all pages affected by an article change in Dispatcher
- D. Split WCM and DAM in separate instances, set up Connected Assets, and re-implement article-related components to use AJAX to load the content

Answer: A

Explanation:

According to Adobe Experience Manager documentation¹, the Adaptive Image Servlet is a feature that automatically selects the most appropriate rendition of an image asset based on the size of the container in which it is displayed. This can reduce the number of renditions needed and improve performance and scalability of AEM DAM. Caching image variations in Dispatcher can also help

reduce repository growth and network traffic. Reimplementing article-related components to use AJAX can prevent stale content issues by dynamically loading fresh content from AEM without refreshing the whole page.

NEW QUESTION # 18

A media company wants to use AEM as content hub for multiple customer touch points:

- * Brand-specific marketing websites hosted on AEM Sites
- * Single Page Applications using headless content
- * Native mobile applications
- * Content offers in Adobe Target

The company wants to manage its content efficiently with its small editor staff. Text should be entered and reviewed only once, then reused for all touch points.

How should an Architect incorporate these requirements into a solution that leverages AEM Sites features?

- A)
- B)
- C)
- D)

- A. Option A
- B. Option D
- C. Option C
- D. Option B

Answer: D

Explanation:

AEM content fragments are pure content with structured data that can be used to describe and manage content for multiple channels¹²³. Content fragments can be exposed as JSON via AEM Content Services and API Pages for headless delivery⁴. Content fragments can also be used in AEM Sites pages with different layouts and designs using the style system⁵. Option B is the only diagram that shows how content fragments can be created and reused for all touch points using AEM Sites features.

NEW QUESTION # 19

.....

If you want to make one thing perfect and professional, then the first step is that you have to find the people who are good at them. In this AD0-E117 exam braindumps field, our experts are the core value and truly helpful with the greatest skills. So our AD0-E117 practice materials are perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. Just come to buy our AD0-E117 study guide!
