ServiceNow CIS-HAM Test Torrent & Exam CIS-HAM Collection Pdf

P.S. Free & New CIS-HAM dumps are available on Google Drive shared by Itcerttest: https://drive.google.com/open?id=1y1792zKRuU_h-Qeh4QxUenfAhjPe1qmp

Before the clients decide to buy our CIS-HAM study materials they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our CIS-HAM study materials, the quantity of the questions and the answers, the merits to use the products, the discounts, the sale guarantee and the clients' feedback after the sale. Secondly you could look at the free demos to see if the questions and the answers are valuable. You only need to fill in your mail address and you could download the demos immediately. So you could understand the quality of our CIS-HAM Study Materials.

Do you want to pass CIS-HAM practice test in your first attempt with less time? Then you can try our latest training certification exam materials. We not only provide you valid CIS-HAM exam answers for your well preparation, but also bring guaranteed success results to you. The CIS-HAM pass review written by our IT professionals is the best solution for passing the technical and complex certification exam.

Exam CIS-HAM Collection Pdf | CIS-HAM Accurate Study Material

All contents of CIS-HAM training guide are being explicit to make you have explicit understanding of this exam. Their contribution is praised for their purview is unlimited. None cryptic contents in CIS-HAM learning materials you may encounter. And our CIS-HAM Exam Questions are easy to understand and they are popular to be sold to all over the world. Just look at the comments on the website, then you will know that we have a lot of loyal customers.

ServiceNow Certified Implementation Specialist - Hardware Asset Management Sample Questions (Q69-Q74):

NEW QUESTION # 69
What is the purpose of stock rules? (Choose two.)

- A. To send notifications when a low quantity threshold is detected in a stockroom
- B. To automatically transfer assets when a low quantity threshold is detected in a stockroom
- C. To track stock movement between stockrooms
- D. To send notifications when a stock shipment arrives at a stockroom

- E. To track stock orders from a vendor

Answer: A,E

Explanation:
* Stock rules are the rules that define the minimum and maximum quantities of hardware assets in a stockroom1.
* Stock rules help to optimize the inventory levels and avoid overstocking or understocking of hardware assets1.
* Stock rules have the following purposes:
* To automatically transfer assets when a low quantity threshold is detected in a stockroom: This means that when the quantity of a hardware asset in a stockroom falls below the minimum threshold defined by the stock rule, the system automatically creates a transfer order to replenish the stockroom from another stockroom that has excess quantity of the same asset1.
* To send notifications when a low quantity threshold is detected in a stockroom: This means that when the quantity of a hardware asset in a stockroom falls below the minimum threshold defined by the stock rule, the system sends an email notification to the stockroom manager or other stakeholders to alert them of the low inventory level1.
* Therefore, the purposes of stock rules that are also options in the question are A. To automatically transfer assets when a low quantity threshold is detected in a stockroom and C. To send notifications when a low quantity threshold is detected in a stockroom.
* The other options that are not purposes of stock rules are:
* To track stock orders from a vendor: This is not a purpose of stock rules, but a function of purchase orders. Purchase orders are the records that capture the details of the vendor contracts for procuring hardware assets2. Purchase orders help to track the status, quantity, and cost of the stock orders from a vendor2.
* To track stock movement between stockrooms: This is not a purpose of stock rules, but a function of transfer orders. Transfer orders are the records that track the movement of hardware assets between stockrooms3. Transfer orders help to track the source, destination, quantity, and status of the stock transfers between stockrooms3.
* To send notifications when a stock shipment arrives at a stockroom: This is not a purpose of stock rules, but a function of stock order tasks. Stock order tasks are the tasks that track the fulfillment of asset requests from stockrooms4. Stock order tasks help to send notifications when a stock shipment arrives at a stockroom and when the assets are received and verified4. References:

* 2: Purchase Orders
* 3: Transfer Orders
* 4: Stock Order Tasks

NEW QUESTION # 70
What core table requires migration when extending ITSM Asset Management with Hardware Asset Management?

- A. alm_asset
- B. alm_hardware
- C. No migration is required
- D. cmdb_model_category

Answer: A

Explanation:
The core table that requires migration when extending ITSM Asset Management with Hardware Asset Management is the alm_asset table1.
The alm_asset table stores the records of all the assets in the system, regardless of their type or class1.
When you activate the Hardware Asset Management plugin, a migration script runs that converts the existing asset records in the alm_asset table to hardware asset records in the alm_hardware table2.
The alm_hardware table is a child table of the alm_asset table that stores the records of the hardware assets only2.
The migration script also updates the references and relationships of the migrated assets to the new table2.
The migration script runs only once and does not affect the future creation or update of asset records2. Reference:

NEW QUESTION # 71
Which of these tables are installed with Hardware Model Normalization? (Choose three.)

- A. Hardware Manufacturer
- B. Hardware Model Library
- C. Device Type

- D. Hardware Normalize Key
- E. Device Name

Answer: A,B,C

Explanation:
Hardware Model Normalization is a feature that enables users to standardize the data of hardware and consumable models, such as manufacturer, product, model, and device type. Hardware Model Normalization requires the activation of the Hardware Model Normalization (com.sn_hwnorm) plugin, which also activates the Normalization Data Services Client (com.glide.data_services_canonicalization.client) plugin. These plugins install several tables that store the normalized data and the rules for normalization. The tables that are installed with Hardware Model Normalization are:
Device Type: This table contains the device types that are used to categorize the hardware models, such as laptop, desktop, server, printer, etc.
Hardware Manufacturer: This table contains the normalized names of the hardware manufacturers, such as Dell, HP, Lenovo, etc.
Hardware Model Library: This table contains the normalized data of the hardware models, such as manufacturer, product, model, device type, UNSPSC code, etc. This table is populated by the Hardware Model Normalization Content Service, which is a subscription-based service that provides the latest and most accurate data for hardware models.
Hardware Normalize Key: This table contains the rules for generating the normalize key, which is a unique identifier for each hardware model based on its manufacturer, product, and model. The normalize key is used to match the hardware models with the Hardware Model Library data.
The other options, C. Hardware Normalize Key and E. Device Name, are not tables that are installed with Hardware Model Normalization. Hardware Normalize Key is a field in the Hardware Model [cmdb_model] table, not a separate table. Device Name is a field in the Configuration Item [cmdb_ci] table, not a separate table. Reference: Hardware Model Normalization, Demo - HAM Professional - Hardware Model Normalization, Hardware Asset Management

NEW QUESTION # 72
When creating a stock rule that replenishes from a vendor, what is a primary requirement for the warehouse stockroom? Choose 2 answers

- A. The stockroom manager must have a valid mobile phone
- B. The stockroom manager must have a valid time zone
- C. The stockroom must have an assigned manager
- D. The stockroom manager must have a valid email address
- E. The stockroom must have an assignment group

Answer: C,D

Explanation:
According to the ServiceNow Hardware Asset Management documentation, a stockroom is a location where assets are stored and managed. A stockroom must have an assigned manager who is responsible for overseeing the stockroom operations and inventory. The stockroom manager must have a valid email address to receive notifications and alerts related to the stockroom, such as low stock levels, stock transfers, and stock orders. The other options are not primary requirements for the warehouse stockroom. The stockroom does not need to have an assignment group, a valid time zone, or a valid mobile phone.

NEW QUESTION # 73
Once the content update adds hardware lifecycle data to your instance, can it be deleted?

- A. No, it cannot unless the lifecycle stage is EOL
- B. Yes, it can
- C. Yes, it can be deleted or deactivated
- D. No, it cannot

Answer: D

NEW QUESTION # 74
.....

Our company has hired the most professional team of experts at all costs to ensure that the content of CIS-HAM guide questions is

the most valuable. We also hired the most powerful professionals in the industry. So our quality of the CIS-HAM Exam Braindumps withstands severe tests and is praised by our loyal customers all over the world. At the same time, the content of the CIS-HAM practice engine is compiled to be easily understood by all our customers.
