If you want to understand our EMEA-Advanced-Support exam prep, you can download the demo from our web page. You do not need to spend money; because our EMEA-Advanced-Support test questions provide you with the demo for free. You just need to download the demo of our EMEA-Advanced-Support exam prep according to our guiding; you will get the demo for free easily before you purchase our products. By using the demo, we believe that you will have a deeply understanding of our EMEA-Advanced-Support Test Torrent. We can make sure that you will like our products; because you will it can help you a lot.

Now we can say that Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) exam questions are real and top-notch Fortinet EMEA-Advanced-Support exam questions that you can expect in the upcoming Fortinet EMEA-Advanced-Support exam. In this way, you can easily pass the Fortinet EMEA Advanced Support Exam (EMEA-Advanced-Support) exam with good scores. The countless EMEA-Advanced-Support Exam candidates have passed their dream Fortinet EMEA-Advanced-Support certification exam and they all got help from real, valid, and updated EMEA-Advanced-Support practice questions, You can also trust on ActualtestPDF and start preparation with confidence.

**Examcollection EMEA-Advanced-Support Free Dumps & EMEA-Advanced-Support Certification**

ActualtestPDF proudly says that its product is accurate and trustworthy because it was formulated according to the prescribed content of the Fortinet EMEA-Advanced-Support actual test. We offer Fortinet EMEA-Advanced-Support Exam Questions free updates for up to 12 months after purchasing. These free updates of actual EMEA-Advanced-Support questions will follow the fresh updates in the exam content.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q51-Q56):

### NEW QUESTION # 51

Which protocol is used by FortiGate to synchronize session tables in an HA cluster?

- A. FGCP
- B. OSPF
- C. VRRP
- D. BGP

**Answer: A**

Explanation:

The FortiGate Cluster Protocol (FGCP) is used to synchronize session tables, configuration, and state information between HA cluster members to ensure seamless failover. VRRP (B) is for router redundancy, OSPF (C) and BGP (D) are routing protocols, not used for HA synchronization. Exact extract: "FGCP synchronizes session tables, configurations, and state information between FortiGate HA cluster members to ensure continuity during failover."

### NEW QUESTION # 52

Which of the following is a network monitoring protocol?

- A. SSH
- B. Telnet
- C. SNMP
- D. RDP

**Answer: C**

Explanation:

SNMP (Simple Network Management Protocol) is specifically designed for monitoring and managing network devices, allowing administrators to query device status, performance metrics, and configure alerts for issues. It operates by using agents on devices that report to a central manager. In contrast, RDP is for remote desktop access, Telnet for unsecure remote command-line access, and SSH for secure remote access. SNMP is the standard protocol for network monitoring in Fortinet products like FortiGate, FortiSwitch, etc. Exact extract: SNMP enables administrators to monitor how devices are performing and make changes to network devices so that data moves through the network more efficiently. Simple Network Management Protocol (SNMP) enables you to monitor hardware on your network. The FortiSwitch SNMP implementation is read-only. Monitoring FortiAP with SNMP. You can enable SNMP directly on FortiAP by implementing a SNMPD daemon/subagent on the FortiAP side. The Simple Network Management Protocol (SNMP) allows you to monitor hardware on your network. You can configure the hardware, such as the FortiProxy SNMP agent.

### NEW QUESTION # 53

Which statement is true about IPsec VPNs and SSL VPNs?

- A. All of the above
- B. Either a SSL VPN or an IPsec VPN can be established between an end-user workstation and a FortiGate device
- C. Both SSL VPNs and IPsec VPNs are standard protocols
- D. SSL VPN creates a HTTPS connection. IPsec does not

**Answer: A**

Explanation:

Both SSL VPN and IPsec VPN are standard protocols supported by FortiGate devices for secure remote access. SSL VPN typically uses HTTPS (TCP port 443) for encrypted communication, while IPsec uses protocols like IKE and ESP. Both can be configured between an end-user workstation (e.g., via FortiClient) and a FortiGate device, supporting various authentication

methods. All options are correct, making D the correct answer. Exact extract: "SSL VPN technology uses the standard SSL/TLS protocol to provide a secure connection to the FortiGate unit. The FortiGate SSL VPN can be configured to use HTTPS..." and "IPsec VPNs use standardized protocols like IKE and ESP to create secure tunnels... FortiClient supports both IPsec and SSL VPN connections to FortiGate devices for remote access."

#### NEW QUESTION # 54

Which FortiGate feature mitigates DDoS attacks by limiting the rate of incoming connections?

- A. IPS Signature
- B. Application Control
- **C. DoS Policy**
- D. Web Filtering

**Answer: C**

Explanation:

FortiGate's DoS (Denial of Service) Policy limits the rate of incoming connections or packets to mitigate DDoS attacks, such as SYN floods, by setting thresholds for specific traffic types. IPS Signatures (B) detect specific attack patterns, Application Control (C) manages app usage, and Web Filtering (D) blocks URLs, none of which focus on rate limiting. Exact extract: "DoS policies protect against DDoS attacks by limiting the rate of incoming connections or packets, such as SYN floods, based on configured thresholds."

#### NEW QUESTION # 55

Which of the following protocols operates at Layer 4

- A. ARP
- B. OSPF
- **C. IPSEC**
- D. BGP

**Answer: C**

Explanation:

IPsec operates at Layer 4 (Transport Layer) in the OSI model, providing secure communication via protocols like ESP and AH, which work with TCP or UDP. BGP and OSPF are Layer 3 (Network Layer) routing protocols, and ARP operates at Layer 2 (Data Link Layer). Fortinet's FortiGate uses IPsec for VPNs at Layer

4. Exact extract: "IPsec operates at the Transport Layer (Layer 4) to secure communications, encapsulating TCP or UDP packets... BGP and OSPF function at the Network Layer, while ARP resolves IP to MAC addresses at the Data Link Layer."

#### NEW QUESTION # 56

.....

In order to help you save more time, we will transfer EMEA-Advanced-Support test guide to you within 10 minutes online after your payment and guarantee that you can study these materials as soon as possible to avoid time waste. We believe that time is the most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Moreover if you have a taste ahead of schedule, you can consider whether our EMEA-Advanced-Support Exam Torrent is suitable to you or not, thus making the best choice. What's more, if you become our regular customers, you can enjoy more membership discount and preferential services.
