Updated TDS-C01 Testkings, TDS-C01 Study Dumps

The software version of our TDS-C01 study engine is designed to simulate a real exam situation. You can install it to as many computers as you need as long as the computer is in Windows system. With our software of TDS-C01 guide exam, you can practice and test yourself just like you are in a real exam. The results of your test will be analyzed and a statistics will be presented to you. So you can see how you have done and know which kinds of questions of the TDS-C01 Exam are to be learned more.

The TDS-C01 exam covers several topics that include data connection and management, chart and graph creation, calculation and analysis, and dashboard design. TDS-C01 exam aims to test the candidate's knowledge of Tableau Desktop's features and functionalities and their ability to use them effectively to create impactful visualizations. TDS-C01 Exam is ideal for individuals who want to demonstrate their proficiency in Tableau Desktop and improve their chances of being hired for Tableau-related roles.

Tableau Desktop Specialist Sample Questions (Q101-Q106):

NEW QUESTION # 101

What should you use to create an axis in a visualization?

- A. A measure
- B. A dimension
- C. A filter
- D. A parameter

Answer: A

Explanation:

To create an axis in a Tableau visualization, you need a measure. When you add a measure to the Rows or Columns shelf, Tableau generates an axis to display the range of values for that measure. Dimensions, parameters, and filters do not create axes; they are used for categorizing data, setting controls, or limiting data, respectively.

NEW QUESTION # 102

Which of the following chart type makes use of 'binned' data?

- A. Bullet chart
- B. Gantt Chart
- C. Histogram
- D. Treemaps

Answer: C

Explanation:

A histogram is a chart that displays the shape of a distribution. A histogram looks like a bar chart but groups values for a continuous measure into ranges, or bins.

The basic building blocks for a histogram are as follows:

Mark type:	Automatic
Rows shelf:	Continuous measure (aggregated by Count or Count Distinct)
Columns shelf:	Bin (continuous or discrete). <i>Note: This bin should be created from the continuous measure on the Rows shelf. For more information on how to create a bin from a continuous measure, see Create Bins from a Continuous Measure.</i>

NEW QUESTION # 103

Using the cwurData table, create a cross-tab showing the number of Publications per Country broken down by Institution, and filtered by Country to only show United Kingdom (UK). For the University of Manchester, what percent of the total publications were contributed in 2014?

- A. 28.415%
- B. 25.683%
- C. 22.404%
- D. 23.497%

Answer: C

Explanation:

Phew! Tricky one for sure. This question tests multiple concepts and will help you revise them. We'll be using filters, as well as quick table calculations (percent of total) for this one.

1) Firstly, let's drag Country and Institution to the Rows shelf, and year (discrete) to the Columns shelf.

Then, drag Publications to the Text Icon in the Marks Shelf. The following is our view:

Pages	Columns	year
Filters	Rows	country institution
Marks		
Automatic		
Color	Size	Text
Detail	Tooltip	
SUM(publicatio..)		

		year			
country	institution	2012	2013	2014	2015
Argentina	University of Buenos Aires			268	276
	National University of La ..			546	546
	National University of C6r..			713	717
	National University of Ro..			976	
Australia	University of Melbourne			45	42
	University of Sydney	56	61	50	45
	University of Queensland	67		75	65
	Monash University			96	86
	University of New South ..			100	90
	Australian National Unive..		101	137	130
	University of Western Au..			165	146
	University of Adelaide			244	234
	Macquarie University			416	391
	University of Newcastle			434	408
	University of Wollongong			445	431
	Curtin University			462	425
	University of Tasmania			461	429
	Griffith University			470	436
	Queensland University of ..			457	477
	James Cook University			510	505
	Deakin University			556	502

NEW QUESTION # 104

Which of these is NOT a type of Quick Filter available in Tableau?

- A. Multiple Values (dropdown)
- **B. Regex Match**
- C. Single Value (slider)
- D. Wildcard Match

Answer: B

Explanation:

Upon clicking on a filter, we see the following options:

Clearly, Regex Match is not one of these options!

NEW QUESTION # 105

Question 30: Skipped

Using the CoffeeChain table, create a scatter plot of Profit (x-axis) vs Sales (y-axis) broken down by State.

Add a Linear trend line to the view. What is its R-squared value?

- A. 0.783262
- B. 0.739284
- C. 0.748472
- D. 0.759329

Answer: A

Explanation:

Trend lines have become popular questions in recent Tableau examinations. Follow along:

1) First drag Sales to the Rows shelf and Profit to the Columns shelf.

Columns	SUM(Profit)
Rows	SUM(Sales)

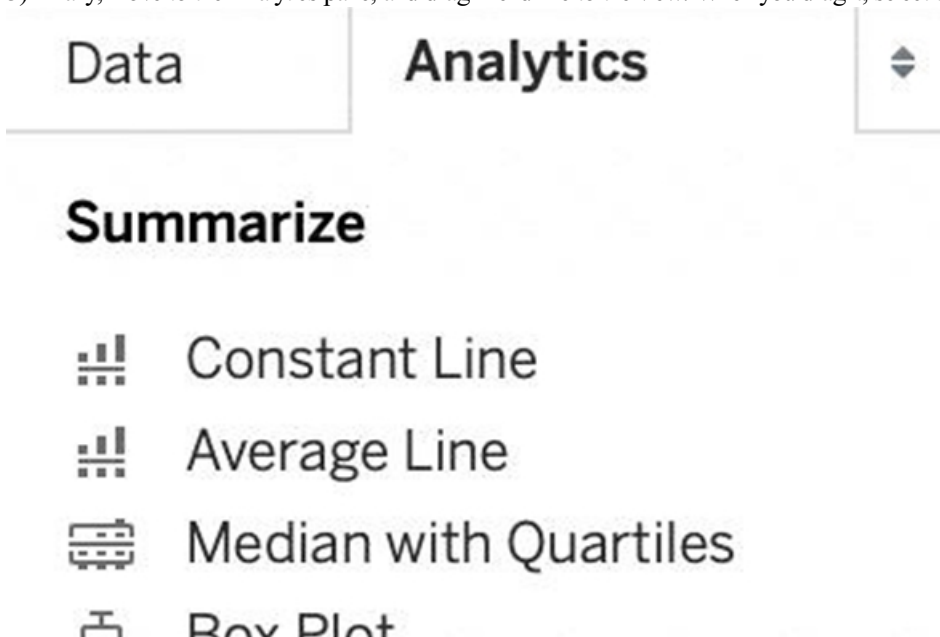

c

You will only see a single mark since the view is aggregated.

2) Now, break down this view by state. Drag State into Detail on the Marks shelf (or directly to the view):

3) Finally, move to the Analytics pane, and drag Trend line to the view. When you drag it, select the Linear option!:

BOX PLOT

Totals

Model

Average with 95% CI

Median with 95% CI

Trend Line

Forecast

Cluster

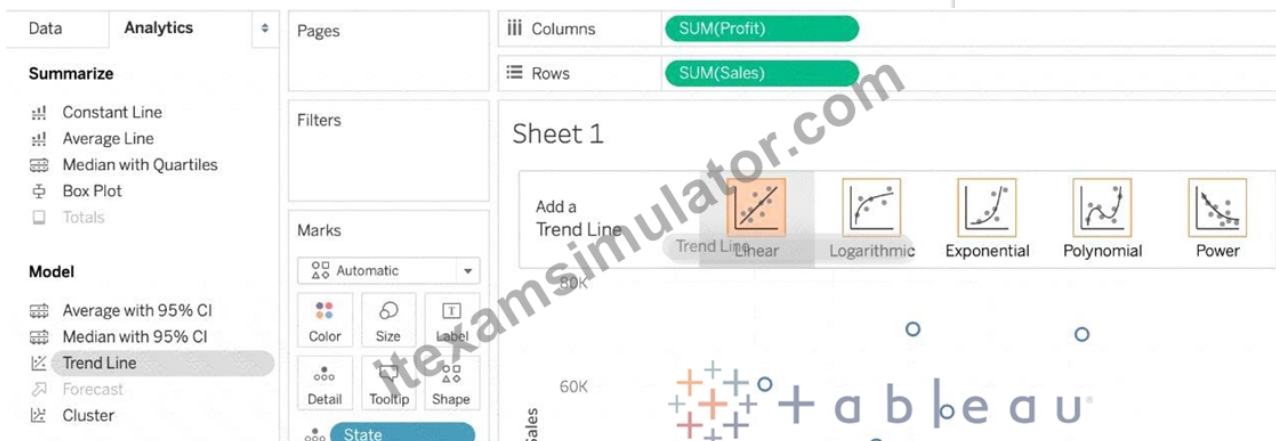

Custom

Reference Line

Reference Band

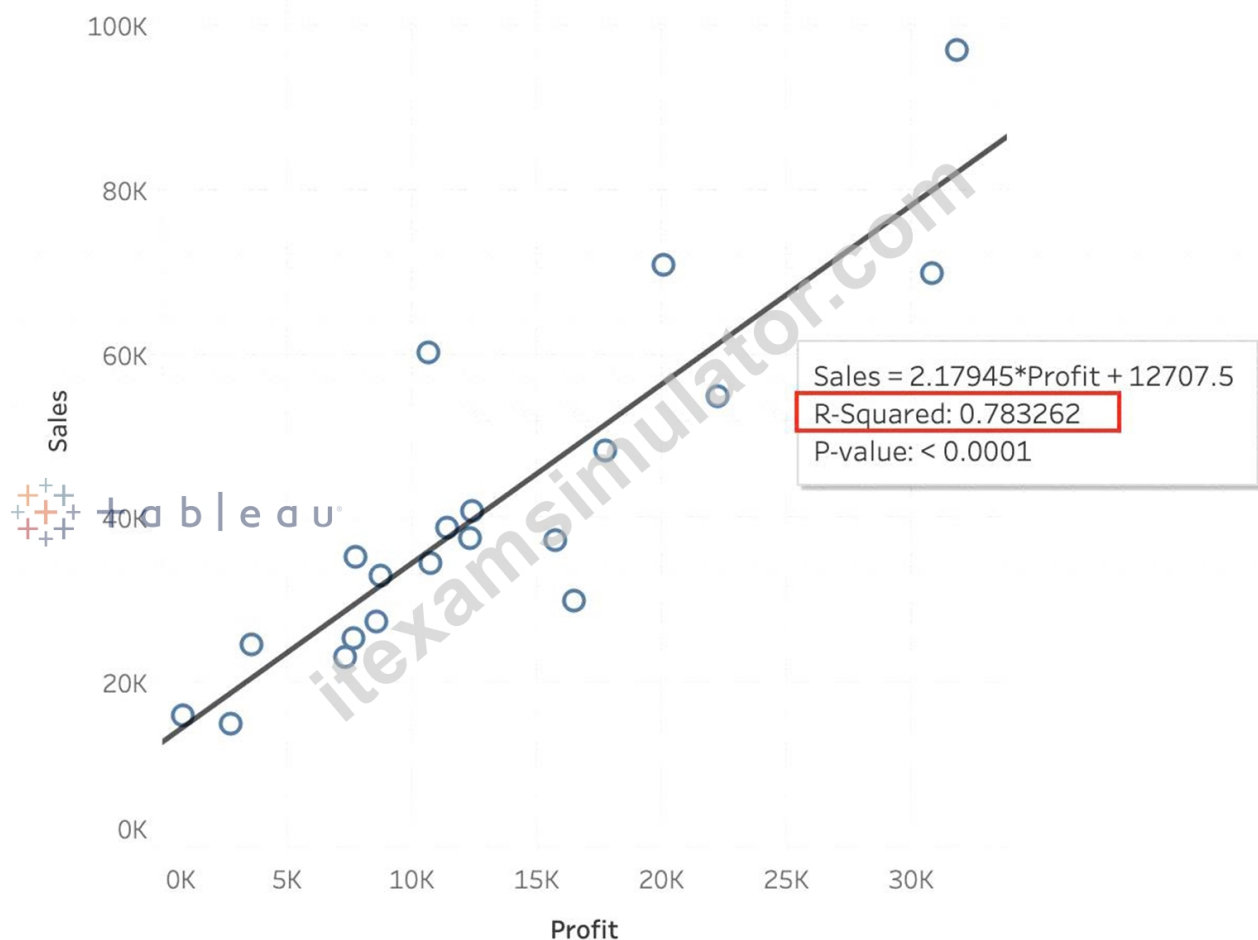

Distribution Band

Box Plot

4) The following is our view. Hover over the trend line to see the R-squared value:
