

OGEA-101 Certification Torrent - Valid Test OGEA-101 Experience

P.S. Free 2026 The Open Group OGEA-101 dumps are available on Google Drive shared by FreeCram:
https://drive.google.com/open?id=1dYojqN2W_EE48FBnaomX3gK2YSR9eGqM

The TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam dumps are real and updated OGEA-101 exam questions that are verified by subject matter experts. They work closely and check all OGEA-101 exam dumps one by one. They maintain and ensure the top standard of FreeCram OGEA-101 Exam Questions all the time. The OGEA-101 practice test is being offered in three different formats. These OGEA-101 exam questions formats are PDF dumps files, web-based practice test software, and desktop practice test software.

The language in our OGEA-101 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. Our TOGAF Enterprise Architecture Part 1 Exam exam questions are applicable for everyone in all walks of life which is not depends on your educated level. Therefore, no matter what kind of life you live, no matter how much knowledge you have attained already, it should be a great wonderful idea to choose our OGEA-101 Guide Torrent for sailing through the difficult test. On the whole, nothing is unbelievable, to do something meaningful from now, success will not wait for a hesitate person, go and purchase!

Valid Test OGEA-101 Experience, OGEA-101 Exam Questions Fee

We try our best to renovate and update our The Open Group OGEA-101 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate. At the same time, The Open Group OGEA-101 Preparation baidumps can keep pace with the digitized world by providing timely application. You will never fell disappointed with our OGEA-101 exam quiz.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which statement best describes the main purpose of the TOGAF Content Framework?

- A. To prevent gaps in the target architecture deliverable set.
- **B. To drive consistency in the outputs when following the ADM.**
- C. To store the artifacts identified in the Architecture Repository.
- D. To address IT system concerns relevant to an enterprise.

Answer: B

Explanation:

The TOGAF Content Framework exists to give a detailed model of architectural work products-including deliverables, the artifacts within them, and the architectural building blocks those artifacts represent. The fundamental intent of embedding a Content Framework in TOGAF is to drive greater consistency in the outputs produced when following the Architecture Development

Method (ADM). That means regardless of who is doing the architecture work, or in which phase of ADM, the types of outputs, their structure, classification (deliverable # artifact # building block), naming, and relationships remain consistent across the organisation. This structured model ensures that architecture work is systematic, standardised, and comparable across different projects or cycles. It is not primarily a mechanism for storage (that's the role of the repository), nor is it only about addressing IT concerns or preventing gaps - its primary purpose is standardising architecture outputs to support clear communication, reuse, and governance across the enterprise

NEW QUESTION # 42

Complete the sentence The Architecture Landscape is divided into levels known as _____.

- A. Gaps Plateaus, and Target Architectures
- B. Transitional Complete and incremental Architectures
- C. Segment Strategic and Capability Architectures
- D. Baseline. Transition and To Be Architectures

Answer: C

Explanation:

The Architecture Landscape is divided into levels known as Segment Strategic and Capability Architectures.

These levels correspond to different scopes and purposes of architectures within an enterprise. Segment Architectures are architectures that address specific business units, functions, or processes within an enterprise. Strategic Architectures are architectures that provide a high-level view of the enterprise's vision, goals, and direction. Capability Architectures are architectures that address specific business capabilities or services that span multiple segments or domains. Reference: The TOGAF Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION # 43

Consider the following ADM phases objectives.

□ Which phase does each objective match?

- A. 1C-2D-3B-4A
- B. 1A-2B-3C-4D
- C. 1B-2D-3A-4C
- D. 1C-2B-3A-4C

Answer: D

Explanation:

The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture1.

The ADM consists of nine phases, each with a specific purpose and output. The phases are1:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture².

Objective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture³.

Objective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits⁴.

Objective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C: Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture².

2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures

3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture

4: The TOGAF Standard, Version 9.2, Chapter 7: Phase A: Architecture Vision

NEW QUESTION # 44

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Architecture Landscape
- B. Governance Log
- C. Reference Library
- D. Architecture Metamodel

Answer: A

Explanation:

The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.

NEW QUESTION # 45

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

* General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission.

* The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

* A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle.

* A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match the descriptions labelled 2 and 3 ?

- A. Architecture Contracts, Request for Architecture Work
- B. Architecture Vision, Architecture Requirements Specification
- C. Architecture Definition Document, Architecture Roadmap
- D. Statement of Architecture Work, Change Request

Answer: A

Explanation:

In TOGAF, deliverable 2 is correctly identified as Architecture Contracts . These are the formal joint agreements between

development partners, sponsors, and in some cases implementation organizations, covering the expected deliverables, quality measures, and fitness-for-purpose of the architecture. Their role is to ensure that architecture intent is translated into governed and measurable commitments. Architecture Contracts are especially important in implementation governance because they define expectations, conformance requirements, and accountability between parties involved in the architecture and delivery process. Deliverable 3 is the Request for Architecture Work . This is the formal initiating document sent from the sponsoring organization to the architecture function to trigger the start of a new architecture development cycle. It provides the initial authorization to begin the architecture effort and acts as a formal signal that architecture work is needed. It is one of the recognized inputs used to begin structured ADM activity.

The other options do not match the definitions given. The Architecture Definition Document describes the architecture itself, not joint agreements. A Change Request is used later to propose modifications.

Architecture Vision and Architecture Requirements Specification are different ADM outputs with different purposes.

Therefore, the correct mapping for labels 2 and 3 is Architecture Contracts and Request for Architecture Work , which is Option B

NEW QUESTION # 46

.....

We often regard learning for OGEA-101 exam as a torture. Actually, learning also can become a pleasant process. With the development of technology, learning methods also take place great changes. With our OGEA-101 study materials, all of your study can be completed on your computers because we have developed a kind of software which includes all the knowledge of the exam. The simulated and interactive learning environment of our OGEA-101 Practice Engine will greatly arouse your learning interests.

Valid Test OGEA-101 Experience: <https://www.freecram.com/TheOpenGroup-certification/OGEA-101-exam-dumps.html>

With our OGEA-101 latest practice questions, you'll understand the knowledge points deeply and absorb knowledge easily, The Open Group OGEA-101 Certification Torrent The description is vivid and full of interesting, The Open Group OGEA-101 Certification Torrent It is definitely the best choice for you to keep abreast of the times in the field, The OGEA-101 quiz guide on the basis of summarizing the past years, found that many of the questions, the answers have certain rules can be found, either subjective or objective questions, we can find in the corresponding module of similar things in common.

This file contains the three artboards that Valid Test OGEA-101 Experience make up the front, back, and inside of a folding ticket for a sporting event, Through the beta testing with your students OGEA-101 and the final edits and so on, were there any kind of "aha" moments or surprises?

Correct OGEA-101 Certification Torrent & Pass-Sure The Open Group Certification Training - Verified The Open Group TOGAF Enterprise Architecture Part 1 Exam

With our OGEA-101 latest practice questions, you'll understand the knowledge points deeply and absorb knowledge easily, The description is vivid and full of interesting.

It is definitely the best choice for you to keep abreast of the times in the field, The OGEA-101 quiz guide on the basis of summarizing the past years, found that many of the questions, the answers have certain rules can be found, Valid Test OGEA-101 Experience either subjective or objective questions, we can find in the corresponding module of similar things in common.

If you believe us and study our Prep4sure materials seriously you will 100% pass OGEA-101 exams.
