The pass rate for 156-536 learning materials is 98.35%, and pass guarantee and money back guarantee if you fail to pass the exam. 156-536 exam dumps are verified by experienced specialists, therefore, we can guarantee the correctness of the answers. 156-536 Learning Materials of us will give you free update for 365 days after purchasing, and the latest version will send to your email box automatically. If you have any other questions about the 156-536 exam dumps, just contact us.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 2	<ul style="list-style-type: none">Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.
Topic 3	<ul style="list-style-type: none">Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 4	<ul style="list-style-type: none">Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 5	<ul style="list-style-type: none">Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 6	<ul style="list-style-type: none">Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.

156-536 Reliable Test Sample, 156-536 Valid Exam Book

The browser-based version has all features of the desktop 156-536 practice exam. You don't need special plugins or software installations to operate the web-based Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) practice exam. This Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) practice test is compatible with every browser such as MS Edge, Chrome, Internet Explorer, Firefox, Opera, and Safari. Lead2PassExam's web-based 156-536 practice exam promotes self-assessment and self-study.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q89-Q94):

NEW QUESTION # 89

On which search engines/web sites is the Safe Search feature supported in Harmony Endpoint?

- A. Google, Bing, and Yahoo!
- B. Google and Bing if the Harmony Endpoint Management is On-Premises deployment
- C. Google, Yahoo!, and OneSearch
- D. Google, Bing, Yahoo! by default, and extra support for Baidu, Yandex, Lycos, and Excite if the Harmony Endpoint Management is deployed in Cloud

Answer: A

Explanation:

The Safe Search feature in Harmony Endpoint is intended to protect users by filtering out malicious or inappropriate content from search engine results. While specific documentation on supported search engines is not detailed here, it is standard for endpoint security solutions like Harmony Endpoint to support the most widely used search engines by default. These typically include Google, Bing, and Yahoo!, as they are the most common platforms where Safe Search functionality is applied.

Option A suggests additional support for Baidu, Yandex, Lycos, and Excite in cloud deployments, but there is no evidence to confirm these are supported, especially since Lycos and Excite are less prominent today.

Option C limits support to Google and Bing for on-premises deployments, but there's no indication that Safe Search functionality varies by deployment type. Option D includes OneSearch, which is less common and not typically associated with Harmony Endpoint's Safe Search feature. Thus, the most accurate and likely answer is B. Google, Bing, and Yahoo!.

NEW QUESTION # 90

When is the heartbeat initiated?

- A. After the first sync
- B. During the first sync
- C. Before the first sync.
- D. After the last sync

Answer: A

NEW QUESTION # 91

What does pre-boot protection require of users?

- A. To authenticate before the computer's OS starts
- B. To authenticate before the computer will start
- C. To regularly change passwords
- D. To answer a security question after login

Answer: A

NEW QUESTION # 92

Which of the following is TRUE about the functions of Harmony Endpoint components?

- A. SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)
- B. Web Management Console for Endpoint connects to the Check Point Security Management Server (SMS)
- C. SmartConsole connects to and manages the Endpoint Management Server (EMS)
- D. SmartEndpoint connects to the Check Point Security Management Server (SMS)

Answer: A

Explanation:

The SmartEndpoint Console is a key component in the Harmony Endpoint architecture, specifically designed to connect to and manage the Endpoint Management Server (EMS). It is a Check Point SmartConsole application used to deploy, monitor, and configure endpoint security clients and policies, communicating directly with the EMS. In contrast, SmartEndpoint does not connect to the Security Management Server (SMS) as stated in option A. SmartConsole (C) is a broader management tool for Check Point gateways, not specifically for the EMS. Option D, regarding the Web Management Console, is not supported by the documentation as connecting to the SMS. Therefore, "SmartEndpoint Console connects to and manages the Endpoint Management Server (EMS)" (B) is the true statement.

NEW QUESTION # 93

What does the Data protection/General rule contain?

- A. Actions that define port protection settings and encryption settings for hard disks and removable media
- B. Actions that restore encryption settings for hard disks and change user authentication settings
- C. Actions that define user authentication settings only
- D. Actions that define decryption settings for hard disks

Answer: A

NEW QUESTION # 94
