Salesforce Financial Services Cloud (FSC) Accredited Professional 認定 Financial-Services-Cloud 試験問題 (Q79-Q84):

質問 # 79

When converting a lead, how can an administrator capture custom lead data on the converted contact?

- A. Map custom lead field to the standard lead field
- B. Use the data loader to move the custom lead data
- C. Use the lead conversion wizard to select the fields
- **D. Map custom lead fields to custom contact fields**

正解: D

質問 # 80

The Salesforce Admin at Lake Tahoe Bank is implementing Financial Services Cloud and wants to roll up customer data at the client and group levels. What functionality can Rollup By Lookup (RBL) provide for this requirement?

- A. An RBL rule displays summary calculations of financial account information, such as account balances.
- B. Rollup By Lookup (RBL) displays associated records for Financial Accounts, Financial Goals, and Opportunities.
- C. RBL calculations can not be disabled when importing data into your Salesforce org.
- D. When you edit a financial account record or primary Group membership, the Rollup By Lookup(RBL) configuration updates the corresponding RBL summaries at the client and Group levels.
- E. Rollups for multiple joint owners are not supported

正解: A、B、D

解説:

The functionality that Rollup By Lookup (RBL) can provide for rolling up customer data at the client and group levels are as follows: An RBL rule displays summary calculations of financial account information, such as account balances, networth, total assets, total liabilities, and so on¹.

When you edit a financial account record or primary group membership, the Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the client and group levels¹.

Rollup By Lookup (RBL) displays associated records for Financial Accounts, Financial Goals, and Opportunities on the client and group pages¹. Verified References: 1

質問 # 81

The system administrator team at a retail consumer bank just received data migration instructions and guidance on Data Loader from their Salesforce architect to upgrade the existing Service Cloud org to a Financial Services Cloud (FSC) org. In what order should the Salesforce objects be uploaded during an FSC data migration?

- A. 1. Accounts and contacts 2. Households 3. Financial accounts
- B. 1. Accounts and contacts 2. Financial accounts 3. Account groups and households
- C. 1. Financial accounts 2. Accounts and contacts 3. Account groups
- D. 1. Households 2. Financial accounts 3. Person accounts

正解: B

解説:

The order of uploading Salesforce objects during an FSC data migration is important to ensure data integrity and avoid errors. The recommended order is:

Accounts and contacts: These are the core objects that store the basic information about the customers and their relationships. They should be uploaded first to establish the foundation for the FSC data model⁴.

Financial accounts: These are the custom objects that store the financial information about the customers, such as balances, interest rates, fees, and transactions. They should be uploaded after the accounts and contacts, and linked to them using lookup fields⁵.

Account groups and households: These are the custom objects that group the accounts and contacts based on common attributes or relationships, such as family members or business partners. They should be uploaded after the financial accounts, and linked to them using junction objects⁶.

質問 # 82

Which three of these statements are true for Rollup By Lookup (RBL) in Financial Services Cloud?

- A. Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules
- B. The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the client and group levels
- C. An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account

balances.

- D. Person Accounts need to be enabled in order to use the Rollup by Lookup functionality.
- E. RBL rules do not require a lot of processing power.

正解: A、B、C

解説:

The following statements are true for Rollup By Lookup (RBL) in Financial Services Cloud:

An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account balances. You can use RBL rules to aggregate financial account data across different levels of client relationships.

The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the diem and group levels. You can use RBL configuration to define which fields are rolled up and howthey are calculated for each diem and group type.

Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules. RBL rules are complex and require extensive testing and validation. If you need to create or customize RBL rules, you should contact a certified Salesforce partner or consultant. Verified References: :
