

# 選擇我們可靠的產品新版250-587考古題: Symantec Data Loss Prevention 16.x Administration Technical Specialist, 通過Symantec 250-587太輕鬆

**Solution Brief**

**Symantec**  
A Division of Broadcom

## Symantec® Data Loss Prevention Core Solution

**Use Cases**

- Gain greater visibility and understanding of your organization's sensitive data.
- Discover where data lives and monitor how it is being used as it moves across all channels.
- Protect critical data with targeted controls and policies based on user risk and sensitivity level.
- Pinpoint risky behavior so you can stop careless, compromised or malicious users in their tracks.
- Protect data in use on endpoints on and off network, and enable secure remote work.
- Scan and remediate data at rest stored across file servers, endpoints, file shares, databases, SharePoint, and more.
- Monitor email and web channels in real-time and take immediate action to prevent accidental exposure and sharing.
- Meet compliance requirements for global data protection regulations and standards.
- Seamlessly extend data loss prevention to the cloud without disjointed policies.

**10X Gartner Magic Quadrant Leader for DLP**

Symantec Data Loss Prevention is a proven solution that analyst firms including Gartner, Forrester, IDC, and others recognize as a global market leader.

**Extends data loss prevention across the enterprise, detects insider risks, and protects critical information from exfiltration**

**Solution Benefits**

- Protects brand reputation, intellectual property, regulated data, and other sensitive information
- Provides visibility into where sensitive data lives and moves at the endpoint, in storage, and over networks
- Provides comprehensive channel coverage and advanced content inspection
- Simplifies incident triage, streamlines remediation, and detects risky behaviors and insider threats
- Reduces complexity with a single unified platform for on-premises and hybrid cloud environments

**Establish a Zero-Trust Foundation with Core Data Security Capabilities**

Keeping information safe and remaining compliant has never been easy. Today we face complex and evolving data security challenges that often translate into barriers for organizations, their employees, and the customers they serve. The COVID-19 pandemic has created a sudden and lasting shift to remote work and accelerated digital transformation agendas. The perimeter-less, zero-trust world is forcing security leaders to rethink their data protection programs to improve business productivity while mitigating new threats and reducing the risk of costly data breaches.

In addition, constantly changing standards and regulations around data protection are putting pressure on security and risk teams to keep pace with a myriad of compliance obligations—many of which require translating complex national, regional, and industry requirements into specific technical controls and organizational measures.

Symantec Data Loss Prevention Core solution expands your data security foundation and puts your organization on the path to Zero Trust. By combining our industry-leading enterprise Data Loss Prevention (DLP) with integrated User and Entity Behavior Analytics (UEBA), we provide visibility and control for sensitive information wherever it lives and travels across devices and on-premises environments so you can prevent accidental sharing of data, stop insider risks, and enforce compliance requirements.
