

# Don't Miss Up to 1 year of Free Updates–Buy Fortinet NSE7\_SSE\_AD-25 Dumps Now

What's more, part of that FreePdfDump NSE7\_SSE\_AD-25 dumps now are free: <https://drive.google.com/open?id=1gbxQxgQ4jZSeodS9QYAUP-D0LbnzOnfV>

FreePdfDump Fortinet NSE7\_SSE\_AD-25 practice test software is the answer if you want to score higher in the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) exam and achieve your academic goals. Don't let the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) certification exam stress you out! Prepare with our Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) exam dumps and boost your confidence in the Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) exam. We guarantee your road toward success by helping you prepare for the Fortinet NSE7\_SSE\_AD-25 certification exam. Use the best FreePdfDump Fortinet NSE7\_SSE\_AD-25 practice questions to pass your Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) exam with flying colors!

## Fortinet NSE7\_SSE\_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Analytics: This section covers troubleshooting connectivity and endpoint issues, analyzing dashboards and logs, and reviewing reports related to user traffic and security events.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Secure Private Access (SPA): This domain includes designing SPA use cases, deploying SPA with SD-WAN, and implementing ZTNA with tagging rules and access proxy configurations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>SASE architecture and integration: This domain covers integrating FortiSASE into existing networks, identifying core SASE components, and evaluating their roles in advanced deployment scenarios.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>SASE deployment and management: This section focuses on deploying and managing FortiSASE for branch and remote users, configuring advanced inspection features, and managing endpoint profiles and compliance rules.</li> </ul>

## NSE7\_SSE\_AD-25 Valid Dumps Demo & NSE7\_SSE\_AD-25 Testking Exam Questions

If you are the first time to buy the NSE7\_SSE\_AD-25 learning material online, or you have bought them for many times, there may be some problem that puzzle you, if you have any questions about the NSE7\_SSE\_AD-25 exam dumps, you can ask our service staff for help. They have the professional knowledge of NSE7\_SSE\_AD-25 Training Materials, and they will be very helpful for solving your problem. In addition, we have free demo for you to try before buying the product, and you can have a try before purchasing.

### Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

What is required to enable the MSSP feature on FortiSASE?

- A. Multi-tenancy must be enabled on the FortiSASE portal.
- B. The MSSP add-on license must be applied to FortiSASE.
- C. Role-based access control (RBAC) must be assigned to identity and access management (IAM) users using the FortiCloud IAM portal.
- D. MSSP user accounts and permissions must be configured on the FortiSASE portal.

**Answer: C**

Explanation:

To enable the MSSP feature on FortiSASE, you must use the FortiCloud IAM portal to assign RBAC permissions to users. This grants appropriate access to manage multiple tenants or customer accounts securely.

#### NEW QUESTION # 17

You are designing a new network, and the cybersecurity policy mandates that all remote users working from home must always be connected and protected. Which FortiSASE component facilitates this always-on security measure? (Choose one answer)

- A. SDWAN on-ramp2
- B. Secure web gateway
- C. Unified FortiClient
- D. Thin-branch SASE extension

**Answer: C**

Explanation:

In a FortiSASE environment, the Unified FortiClient agent is the critical component that fulfills the requirement for "always-on" connectivity and security for remote users.

\* Persistent Encrypted Tunnels: The Unified FortiClient maintains a persistent, always-on connection to the FortiSASE infrastructure.4 This is typically achieved through an auto-connect VPN tunnel (SSL or IPsec) that initiates as soon as the user logs into their device and has internet access.

\* Continuous Security Enforcement: By staying connected to a nearby FortiSASE Point of Presence (PoP), the endpoint ensures that all traffic is inspected. This allows the organization to enforce a consistent security posture—including Web Filtering, Antivirus, and Application Control—regardless of whether the user is at home, in a coffee shop, or traveling.

\* Zero-Trust Integration: Beyond simple connectivity, the unified agent supports Universal ZTNA. It continuously verifies the identity of the user and the security posture of the device before granting access to specific applications, thereby satisfying modern zero-trust security mandates.

\* Comparison of Other Components:

\* SD-WAN on-ramp (B): Used primarily to integrate existing branch office SD-WAN networks with the SASE cloud for private application access.

\* Secure Web Gateway (C): While a feature of the SASE PoP, the agentless SWG deployment (using PAC files) does not provide the same level of "always-on" persistent tunnel protection as the FortiClient agent.

\* Thin-branch SASE extension (D): Focused on securing small branch locations (using FortiAP or FortiExtender) where individual client agents may not be deployed on every device.

### NEW QUESTION # 18

An administrator must restrict endpoints from certain countries from connecting to FortiSASE. Which configuration can achieve this?  
(Choose one answer)

- A. Geofencing to restrict access from the required countries
- B. A geography address object as the source for a deny policy
- C. A network lockdown policy on the endpoint profiles
- D. Source IP anchoring to restrict access from the specified countries

**Answer: A**

Explanation:

To restrict endpoints from certain countries from connecting to FortiSASE, the administrator should configure Geofencing. This feature provides granular control over which geographic locations are permitted or denied access to the SASE infrastructure.

Geofencing in FortiSASE

Geofencing is the primary mechanism for controlling remote user connectivity based on their origin.

\* **Functionality:** It uses a geography-to-IP mapping database to identify the location of incoming connection requests.

\* **Access Modes:** Administrators can choose between two main modes:

\* **Allow:** Only users from specified countries can connect; all others are blocked.

\* **Deny:** Users from specified countries are blocked; all others are allowed.

\* **Configuration Path:** In the FortiSASE GUI, navigate to Configuration > Geofencing to enable the feature and add the relevant countries.

\* **Enforcement:** Once enabled, the system automatically creates "local-in" policies to drop or permit traffic at the edge of the SASE PoPs before it can consume resources or attempt authentication.

### NEW QUESTION # 19

Which secure internet access (SIA) use case minimizes individual workstation or device setup, because you do not need to install FortiClient on endpoints or configure explicit web proxy settings on web browser-based endpoints?

- A. SIA for agentless remote users
- B. SIA for SSLVPN remote users
- C. SIA for inline-CASB users
- D. SIA for site-based remote users

**Answer: A**

Explanation:

The Secure Internet Access (SIA) use case that minimizes individual workstation or device setup is SIA for agentless remote users. This use case does not require installing FortiClient on endpoints or configuring explicit web proxy settings on web browser-based endpoints, making it the simplest and most efficient deployment.

\* **SIA for Agentless Remote Users:**

\* Agentless deployment allows remote users to connect to the SIA service without needing to install any client software or configure browser settings.

\* This approach reduces the setup and maintenance overhead for both users and administrators.

\* **Minimized Setup:**

\* Without the need for FortiClient installation or explicit proxy configuration, the deployment is straightforward and quick.

\* Users can securely access the internet with minimal disruption and administrative effort.

### NEW QUESTION # 20

Refer to the exhibits.

□ An endpoint is assigned an IP address of 192.168.13.101/24. Which action will be run on the endpoint?

(Choose one answer)

- A. The endpoint will automatically connect to the FortiSASE tunnel.
- B. The endpoint will be detected as off-net.
- C. The endpoint will be able to bypass the on-net rule because it is connecting from a known subnet.

- **D. The endpoint will be exempted from auto-connect to the FortiSASE tunnel.**

**Answer: D**

Explanation:

Based on the provided exhibits and the logic of FortiSASE On/off-net detection, the endpoint's behavior is determined by its network environment relative to the configured rules.

\* Subnet Matching and Detection: The On-net rule set (named "On-Premises") is configured to identify a trusted location when the endpoint "Connects from a known local subnet". The administrator has defined the known subnet as \$192.168.13.0/24\$. Since the endpoint's IP address is

\$192.168.13.101\$, it falls within this range. Consequently, FortiClient detects the endpoint as being on- net (on-fabric).

\* Action Logic (Exemption): In a FortiSASE Endpoint Profile, when On/off-net detection is enabled and an endpoint matches an "On-net" rule, the standard behavior is to exempt the endpoint from auto- connecting to the FortiSASE VPN tunnel. This design assumes the endpoint is already in a secured office environment where the corporate firewall (FortiGate) provides the necessary protection, making the SASE tunnel redundant.

\* Comparison of Other Options: \* Option B: Incorrect, because the IP matches the defined "known local subnet" rule for on-net detection.

\* Option D: Incorrect, as auto-connect only triggers when the endpoint is detected as off-net to ensure remote security.

## NEW QUESTION # 21

.....

Will you feel nervous for the exam? If you do, we can relieve your nerves if you choose us. NSE7\_SSE\_AD-25 Soft test engine can stimulate the real exam environment, so that you can know procedures of the real exam environment, and it will build up your confidence. In addition, NSE7\_SSE\_AD-25 exam materials are verified by the experienced experts, and therefore the quality can be guaranteed. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. If you buy NSE7\_SSE\_AD-25 Exam Materials from us, we also pass guarantee and money back guarantee if you fail to pass the exam.
