最新的 PRINCE2 Agile PRINCE2-Agile-Foundation 免費考試真題 (Q106-Q111):

問題 #106

How are user inputs FIRST gathered in the 'quality' practice?

- A. As the project Definition of Done in the quality management approach
- **B. As user stories in the product backlog**
- C. As a quality control activity in the quality register
- D. As epic user stories in the project backlog

答案： B

解題說明：

User inputs are initially gathered as user stories in the product backlog in PRINCE2 Agile. User stories represent small, customer-focused requirements that capture the "who," "what," and "why" of a feature. These stories form the foundation of requirements and quality criteria for the product and ensure that development is driven by user needs and value delivery.

The Definition of Done is developed later as part of the quality management approach to specify when work is complete. Epic user stories are larger features that can be broken down into smaller user stories. The quality register tracks quality-related activities but is not the first step for gathering user inputs.

問題 #107

Which is a purpose of the plans theme?

- A. To control any approved changes to the baseline
- B. To monitor actual achievements against those planned
- C. To identify any deviations from the project's objectives
- **D. To communicate the approach for delivering products**

答案： D

問題 #108

Which statement explains the PRINCE2 Agile behavior of 'exploration'?

- A. It empowers the project management team at the delivery level
- B. It uses the most effective channel to communicate information
- **C. It seeks out feedback collaboratively from project stakeholders**
- D. It displays the progress rate to everyone using burn-down charts

答案： C

問題 #109

Which workshop enables participants to collaboratively define the Definition of Ready?

- A. Project initiation workshop
- B. Project kickoff workshop
- C. Starting up workshop
- **D. Agile enablement workshop**

答案： D

解題說明：

The Agile Enablement Workshop provides a collaborative environment where teams and stakeholders define critical agile artifacts, including the Definition of Ready. This definition specifies the criteria a user story or product backlog item must meet before work can begin, ensuring clarity and readiness.

The workshop facilitates alignment on quality standards, scope, and expectations, reducing ambiguity and improving flow through development cycles. By involving all key participants, the Definition of Ready is meaningful and practical, tailored to the project's

specific context.

While starting up (A), kickoff (B), and initiation workshops (C) focus on project foundation and planning, they do not specifically focus on agile readiness criteria.

This workshop is essential for embedding agile practices within PRINCE2 governance and fostering effective delivery.

Reference: PRINCE2 Agile Foundation Version 2, Section 6.7 "Defining Ready and Done," and PRINCE2 Agile Study Guide, Chapter 6.

問題 #110

What does velocity typically measure?

- A. The number of timeboxes completed
- B. The speed that a minimum viable product is created
- C. Work packages completed by the team
- **D. The rate of progress the team is making**

答案: D
