2026 CCDAK: Professional Confluent Certified Developer for Apache Kafka Certification Examination Latest Exam Cost

Are you looking for valid IT exam materials or study guide? You can try our free Confluent CCDAK new exam collection materials. We offer free demo download for our PDF version. You can know several questions of the real test. It can make you master fundamental knowledge quickly. Our CCDAK new exam collection materials are authorized legal products. Our accuracy is nearly

100% pass which will help you clear exam

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q23-Q28):

NEW QUESTION # 23

(An S3 source connector named s3-connector stopped running.
You use the Kafka Connect REST API to query the connector and task status.
One of the three tasks has failed.
You need to restart the connector and all currently running tasks.
Which REST request will restart the connector instance and all its tasks?)

- A. POST /connectors/s3-connector/tasks/0/restart
- **B. POST /connectors/s3-connector/restart?includeTasks=true**
- C. POST /connectors/s3-connector/restart
- D. POST /connectors/s3-connector/restart?includeTasks=true&onlyFailed=true

Answer: B

Explanation:

According to the official Apache Kafka Connect REST API documentation, restarting a connector can be done at different granularities: connector-level, task-level, or both. By default, calling POST /connectors/{name}/restart only restarts the connector instance, not its tasks.

To restart the connector and all of its tasks, the request must explicitly include the query parameter includeTasks=true. This instructs Kafka Connect to restart the connector and all associated tasks, regardless of whether they are currently running or failed. Option B (onlyFailed=true) limits the restart to only failed tasks, which does not meet the requirement to restart all tasks. Option C restarts only the connector instance, leaving tasks untouched. Option D restarts a single specific task and does not restart the connector itself.

Therefore, the correct and officially documented REST request to restart the connector instance and all tasks is:

POST /connectors/s3-connector/restart?includeTasks=true

This ensures a full restart of the connector and its execution context across the Kafka Connect cluster.

NEW QUESTION # 24

Refer to the producer code below. It features a 'Callback' class with a method called 'onCompletion()'. When will the 'onCompletion()' method be invoked?

```
producer.send(record, new MyCallback(record));
```

- A. When a consumer sends an acknowledgement to the producer
- B. When the producer puts the message into its socket buffer
- C. When the producer batches the message
- **D. When a broker sends an acknowledgement to the producer**

Answer: D

NEW QUESTION # 25

When running a ksqlDB for connectors, what does the IF NOT EXISTS clause do?

- A. Fail if the specified connector does not exist.
- B. Update the connector properties if a connector with the supplied name exists.
- **C. Prevent the statement from failing if a connector with the supplied name already exists.**
- D. Prevent the statement from executing if a connector with the supplied name does not exist.

Answer: C

NEW QUESTION # 26

What's a Kafka partition made of?

- A. One file
- B. One file and two indexes
- C. One file and two indexes per segment
- D. One file and one index

Answer: C

Explanation:

Kafka partitions are made of segments (usually each segment is 1GB), and each segment has two corresponding indexes (offset index and time index)

NEW QUESTION # 27

A kafka topic has a replication factor of 3 and min.insync.replicas setting of 2. How many brokers can go down before a producer with acks=all can't produce?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

acks=all and min.insync.replicas=2 means we must have at least 2 brokers up for the partition to be available

NEW QUESTION # 28

.....

Just as an old saying goes, it is better to gain a skill than to be rich. Contemporarily, competence far outweighs family backgrounds and academic degrees. One of the significant factors to judge whether one is competent or not is his or her certificates. CCDAK (real test) Generally speaking, certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our CCDAK practice materials can satisfy your demands if you are now in preparation for a certificate.
