### NEW QUESTION # 32

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Run the command `bin/magento upgrade:compatibility:report` to export the needed information.
- B. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.
- C. Familiarize themselves with the minimum system requirements of Adobe Commerce.

**Answer: A**

Explanation:

Adobe Commerce provides a built-in Upgrade Compatibility Tool (UCT) that allows developers to check for potential code incompatibilities before performing a version upgrade.

The UCT:

- \* Analyzes the current codebase against the target upgrade version.
- \* Reports on deprecated classes, methods, and APIs that could break during the upgrade.
- \* Produces a compatibility report (HTML/CSV/JSON) that can be shared with customers as part of the upgrade plan.

This tool is specifically designed to help developers assess upgrade risks and is the official Adobe Commerce-recommended method for preparing upgrade assessments.

\* Option A (SWAT): The Site-Wide Analysis Tool provides performance, configuration, and health insights, but it does not analyze code compatibility for upgrades.

\* Option B (minimum system requirements): This ensures the environment is technically capable of running the new version but does not provide insights into custom code and extension compatibility.

Official Documentation Extracts:

\* "The Upgrade Compatibility Tool helps you identify potential issues in your custom code when upgrading to a new Adobe Commerce release. It scans your codebase and produces a report highlighting possible code changes that may be required."- Adobe Commerce DevDocs: Upgrade Compatibility Tool

\* "Run `bin/magento upgrade:compatibility:report` to generate the upgrade compatibility report. The report provides details about deprecated and removed code, APIs, and incompatibilities."- Adobe Commerce CLI Reference
