

Top AZ-120 Accurate Study Material Pass Certify | Pass-Sure AZ-120 Pass Guarantee: Planning and Administering Microsoft Azure for SAP Workloads

P.S. Free 2026 Microsoft AZ-120 dumps are available on Google Drive shared by UpdateDumps: https://drive.google.com/open?id=1bXcWQL2j__MshSjCjnm7UQ2BZo1UwBWj

Not every company can make such a promise of "no help, full refund" as our UpdateDumps. However, the AZ-120 exam is not easy to pass, but our UpdateDumps have confidence with their team. Our UpdateDumps's study of AZ-120 exam make our AZ-120 Exam software effectively guaranteed. You can download our free demo first to try out, no matter which stage you are now in your exam review, our products can help you better prepare for AZ-120 exam.

Our company conducts our business very well rather than unprincipled company which just cuts and pastes content from others and sell them to exam candidates. By virtue of our AZ-120 practice materials, many customers get comfortable experiences of Whole Package of Services and of course passing the AZ-120 Study Guide successfully. As to some exam candidate are desperately eager for useful AZ-120 actual tests, our products help you and other customer who are having an acute shortage of efficient practice materials.

>> AZ-120 Accurate Study Material <<

Microsoft AZ-120 Pass Guarantee - AZ-120 Book Free

If you buy our AZ-120 exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our AZ-120 practice materials. We can promise that we will provide you with quality AZ-120 training braindump, reasonable price and professional after sale service. As long as you have problem on our AZ-120 exam questions, you can contact us at any time.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q204-Q209):

NEW QUESTION # 204

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```

"resources": [
{
  "type": "Microsoft.Compute/virtualMachines/
"name": "[concat(parameters
('vmName'), '/DiskEncryption')]",
  "location": [parameters('location')]",
  "apiVersion": "2017-03-30",
  "properties": {
    "publisher": "Microsoft.Azure.Security",
    "type":
    "Disk"
    "KeyVault"
    "Extensions"
    "AzureDiskEncryption"

"typeHandlerVersion": "2.2",
  "autoUpgradeMinorVersion": true,
  "forceUpdateTag": "2",
  "settings": {
    "EncryptionOperation": "EnableEncryption",
    "KeyVaultURL": "[reference(parameters('keyVaultResourceID'), '2016-10-01').vaultUri]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionKeyURL": "[parameters('keyEncryptionKeyURL')]",
    "KeyVaultResourceID": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionAlgorithm": "RSA-OAEP",
    "VolumeType": "All",
    "ResizeOSDisk": false
  }
}
}
]

```

Answer:

Explanation:

```

"resources": [
{
  "type": "Microsoft.Compute/virtualMachines/
"name": "[concat(parameters
('vmName'), '/DiskEncryption')]",
  "location": [parameters('location')]",
  "apiVersion": "2017-03-30",
  "properties": {
    "publisher": "Microsoft.Azure.Security",
    "type":
    "Disk"
    "KeyVault"
    "Extensions"
    "AzureDiskEncryption"

"typeHandlerVersion": "2.2",
  "autoUpgradeMinorVersion": true,
  "forceUpdateTag": "2",
  "settings": {
    "EncryptionOperation": "EnableEncryption",
    "KeyVaultURL": "[reference(parameters('keyVaultResourceID'), '2016-10-01').vaultUri]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionKeyURL": "[parameters('keyEncryptionKeyURL')]",
    "KeyVaultResourceID": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionAlgorithm": "RSA-OAEP",
    "VolumeType": "All",
    "ResizeOSDisk": false
  }
}
}
]

```

NEW QUESTION # 205

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input checked="" type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input checked="" type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input type="radio"/>	<input type="radio"/>

In a Hybrid-IT scenario, Active Directory from on-premises can be extended to serve as the authentication mechanism through an Azure deployed domain controller (as well as potentially using the integrated DNS).

It is important to distinguish between traditional Active Directory Servers and Microsoft Azure Active Directory that provides only a subset of the traditional on-premises AD offering. This subset include Identity and Access Management, but does not have the full AD schema or services that many 3rd party application take advantage of. While Azure Active Directory IS a requirement to establish authentication for the Azure virtual machines in use, and it can synchronize users with customers' on-premises AD, the two are explicitly different and customers will likely continue to require full Active Directory servers deployed in Microsoft Azure.

NEW QUESTION # 206

You have a bill of materials (BOM) that describes SAP deployments.

You plan to automate the implementation of an SAP S4/HANA deployment to Azure by using the SAP deployment automation framework on Azure.

You need to generate the SAP application templates for the planned implementation and update the BOM.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
<ul style="list-style-type: none"> Generate an ABAP Central Services (ASCS) parameter file. 	
<ul style="list-style-type: none"> Install the SAP HANA and SAP Central Services (SCS) instances. 	
<ul style="list-style-type: none"> Load the database content. 	
<ul style="list-style-type: none"> Generate and combine the parameter files of the application servers. 	
<ul style="list-style-type: none"> Add the templates to the BOM. 	

Answer:

Explanation:

Actions	Answer Area
<ul style="list-style-type: none"> Generate an ABAP Central Services (ASCS) parameter file. 	<ul style="list-style-type: none"> Generate an ABAP Central Services (ASCS) parameter file.
<ul style="list-style-type: none"> Install the SAP HANA and SAP Central Services (SCS) instances. 	<ul style="list-style-type: none"> Install the SAP HANA and SAP Central Services (SCS) instances.
<ul style="list-style-type: none"> Load the database content. 	<ul style="list-style-type: none"> Load the database content.
<ul style="list-style-type: none"> Generate and combine the parameter files of the application servers. 	<ul style="list-style-type: none"> Generate and combine the parameter files of the application servers.
<ul style="list-style-type: none"> Add the templates to the BOM. 	<ul style="list-style-type: none"> Add the templates to the BOM.

Explanation:

Actions	Answer Area
	<ol style="list-style-type: none"> 1 Generate an ABAP Central Services (ASCS) parameter file.
	<ol style="list-style-type: none"> 2 Install the SAP HANA and SAP Central Services (SCS) instances.
	<ol style="list-style-type: none"> 3 Load the database content.
	<ol style="list-style-type: none"> 4 Generate and combine the parameter files of the application servers.
	<ol style="list-style-type: none"> 5 Add the templates to the BOM.

NEW QUESTION # 207

You are evaluating the proposed backup policy.

For each of the following statements, select Yes if the statement is true. otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The backup policy meets the technical requirements.	<input type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
The backup policy meets the technical requirements.	<input checked="" type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input checked="" type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
The backup policy meets the technical requirements.	<input type="radio"/>	<input type="radio"/>
The backup policy meets the business requirements.	<input type="radio"/>	<input type="radio"/>
If the backup policy is implemented, a deleted file can be restored to the running virtual machine one year after the file was deleted.	<input type="radio"/>	<input type="radio"/>

Box 1: Yes

Scenario: Technical requirements: Ensure that an application server can be restored from a backup created during the last five days within 15 minutes.

Instant Restore has 'The instance recovery snapshot(s) for 5 Day(s)'.

Box 2: No

Scenario: Ensure that all the production application servers can restore daily backups from the last 21 days.

The Retention of daily backup point is set to for 14 days only.

Box 3: Yes

NEW QUESTION # 208

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Oracle Real Application Clusters (RAC) can be used to provide high availability of SAP databases on Azure.	<input type="radio"/>	<input type="radio"/>
You can host SAP databases on Azure by using Oracle on a virtual machine that runs Windows Server 2016.	<input type="radio"/>	<input type="radio"/>
You can host SAP databases on Azure by using Oracle on a virtual machine that runs SUSE Linux Enterprise Server 12 (SLES 12).	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Oracle Real Application Clusters (RAC) can be used to provide high availability of SAP databases on Azure.	<input type="radio"/>	<input checked="" type="radio"/>
You can host SAP databases on Azure by using Oracle on a virtual machine that runs Windows Server 2016.	<input checked="" type="radio"/>	<input type="radio"/>
You can host SAP databases on Azure by using Oracle on a virtual machine that runs SUSE Linux Enterprise Server 12 (SLES 12).	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

1. No

Oracle Data Guard running in Maximum Availability mode. Currently, Oracle Real Application Clusters (RAC) is not supported in Azure - either for high availability or for scalability

2. Yes

3. No

The following OS versions are supported with the Oracle Database on Microsoft Azure:

Windows Server 2019 (only from Oracle Database 19.5.0 on)

Windows Server 2016 (only from Oracle Database 12.2.0.1 on)

Windows Server 2012 (no support for Oracle Database 19c)

Windows Server 2012 R2

Windows Server 2008 R2 Service Pack 1 (no support for Oracle 12.2.0.1)

Oracle Linux 7

Oracle Linux 8 (only from Oracle Database 19.7.0 on)

NEW QUESTION # 209

.....

In use process, if you have some problems on our AZ-120 study materials provide 24 hours online services, you can email or contact us on the online platform. In addition, our backstage will also help you check whether the AZ-120 exam prep is updated in real-time. If there is an update, our system will send to the customer automatically. Our AZ-120 Learning Materials also provide professional staff for remote assistance, to help users immediate effective solve the existing problems if necessary. So choosing our AZ-120 study materials make you worry-free.

AZ-120 Pass Guarantee: <https://www.updatedumps.com/Microsoft/AZ-120-updated-exam-dumps.html>

To get this certification, you must pass the AZ-120 exam conducted by Microsoft, We guarantee that with our qualified and reliable Microsoft AZ-120 Pass Guarantee Study Guides study materials you can easily pass any Microsoft AZ-120 Pass Guarantee Exam Questions, 100% User-friendly Exam VCE Simulator And Printable Exam PDF UpdateDumps AZ-120 Pass Guarantee provides the most user-friendly Microsoft AZ-120 Pass Guarantee AZ-120 Pass Guarantee exam VCE simulator and printable exam PDF, Microsoft AZ-120 Accurate Study Material Both of two versions are available for different kinds of electronic products.

Configuring IS-IS Protocol, We never avoid our responsibility of offering help for exam candidates like you, so choosing our AZ-120 training guide means you choose success.

To get this certification, you must pass the AZ-120 exam conducted by Microsoft, We guarantee that with our qualified and reliable Microsoft Study Guides study materials you can easily pass any Microsoft Exam Questions.

Top AZ-120 Accurate Study Material Help You Clear Your Microsoft AZ-120: Planning and Administering Microsoft Azure for SAP Workloads Exam Certainly

100% User-friendly Exam VCE Simulator And Printable Exam AZ-120 PDF UpdateDumps provides the most user-friendly Microsoft Microsoft Azure exam VCE simulator and printable exam PDF.

Both of two versions are available for different kinds of electronic products, With AZ-120 study braindumps, successfully passing the exam will no longer be a dream.
