You can open this PDF file and revise C-BCBAI-2502 real exam questions at any time.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q53-Q58):

NEW QUESTION # 53

(What are some generative AI tools for an SAP Cloud ERP transformation? Note: There are 3 correct answers to this question.)

- A. Process model generator
- B. Extension builder wizard
- C. ABAP Business Object generator
- D. Process automation
- E. Integration generator

Answer: A,C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI tools for SAP Cloud ERP transformation include process automation capabilities in SAP Build Process Automation for generating and automating business processes, the process model generator in SAP Signavio for creating process models using AI, and the ABAP Business Object generator in Joule for developing ABAP-based business objects to extend ERP functionalities. These tools facilitate efficient migration, customization, and optimization during cloud ERP transformations by leveraging generative AI to streamline code, processes, and extensions.

Exact extracts supporting this:

Process automation: "SAP Build Process Automation integrates with generative AI to generate and edit business processes, decisions, forms, and script tasks using natural language descriptions."sap.com This supports automation in ERP transformations.

Process model generator: "SAP Signavio uses generative AI to assist in process modeling, recommending performance indicators and generating models based on best practices."learning.sap.com ABAP Business Object generator: "Joule generates ABAP business objects using the ABAP RESTful Application Programming Model (RAP) for extensions in SAP S/4HANA

Cloud."learning.sap.com "Generative AI in ABAP Cloud includes business object generation."community.sap.com Other options are incorrect because:

Option B: While extension building is simplified with wizards in SAP Build Code, it is not specifically a "generative AI tool" but rather a guided process; generative aspects come from Joule integration.

Option C: Integration generation is supported in SAP BTP, but not highlighted as a distinct generative AI tool for ERP transformation; focus is on code and process generation.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," units on generative AI in SAP Signavio, Build Process Automation, and ABAP Cloud. Supported by SAP Community blogs on generative AI for S/4HANA migration and SAP Help Portal, aligning with C_BCBAl_2502 certification for tools in cloud ERP transformations.

NEW QUESTION # 54

What are the key Business AI patterns?

There are 3 correct answers to this question.

Response:

- A. Enterprise Automation
- B. AI Lifecycle Management
- C. Digital Assistants with SAP
- D. Insight Apps, Data for AI

- E. Custom Generative AI Extensions

Answer: A,C,D

NEW QUESTION # 55

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottom-line benefits could they expect? Note: There are 2 correct answers to this question.

- A. Revenue increase: up to 1.4%
- B. Gross profit increase: up to 3.5%
- C. Revenue increase: up to 3.5%
- D. Gross profit increase: up to 1.4%

Answer: C,D

Explanation:

Implementing SAP Business AI comprehensively can lead to significant financial benefits. According to SAP's official documentation, businesses can expect:

- * An estimated 1.4% increase in gross profits.
- * An estimated 3.5% increase in revenue.

These figures are based on SAP's analysis of the impact of AI-driven efficiencies and enhancements across various business processes. For instance, a company with €10 billion in revenue could see an annual bottom-line benefit of €141 million and a revenue impact of €352 million.

NEW QUESTION # 56

Match the SAP LeanIX activities in the dropdown lists to the SAP Activate phases.

□

Answer:

Explanation:

□

NEW QUESTION # 57

Which SAP AI solutions are used for fraud detection and risk assessment? Note: There are 2 correct answers to this question.

- A. SAP Predictive Analytics
- B. SAP AI Business Services
- C. SAP SuccessFactors Learning
- D. SAP Extended Warehouse Management

Answer: A,B

Explanation:

SAP provides AI solutions to enhance financial security through fraud detection and risk assessment. The correct answers are SAP Predictive Analytics and SAP AI Business Services, as these solutions are specifically designed to identify anomalies and mitigate risks in business processes.

SAP documentation explains: "SAP AI solutions can detect anomalies and patterns in financial transactions, procurement processes, and other business operations to identify potential fraud and risks. By proactively addressing these issues, businesses can mitigate financial losses and protect their reputation." SAP Predictive Analytics, embedded in SAP S/4HANA and other solutions, supports "AI-assisted anomaly detection" to identify unusual patterns in financial data, such as fraudulent transactions. SAP AI Business Services offer reusable AI capabilities, including machine learning for "fraud detection in finance," enabling organizations to monitor transactions and assess risks in real-time.

The incorrect options-SAP SuccessFactors Learning and SAP Extended Warehouse Management-are not relevant. SAP SuccessFactors Learning focuses on employee training, not fraud detection. SAP Extended Warehouse Management is designed for logistics and inventory, not financial risk assessment. SAP's emphasis on AI in finance, as seen in solutions like SAP Cash Application, underscores the suitability of the selected solutions for fraud detection.

NEW QUESTION # 58

As we all know, passing the exam is a wish for all candidates. C-BCBAI-2502 exam torrent can help you pass the exam and obtain the certificate successfully. With skilled experts to edit and verify, C-BCBAI-2502 study materials can meet the needs for exam.
