2026 SCP-NPM Reliable Exam Preparation | High-quality SCP-NPM 100% Free Latest Test Testking

There has been fierce and intensified competition going on in the practice materials market. As the leading commodity of the exam, our SCP-NPM practice materials have get pressing requirements and steady demand from exam candidates all the time. So our SCP-NPM practice materials have active demands than others with high passing rate of 98 to 100 percent. We are one of the largest and the most confessional dealer of practice materials. That is why our SCP-NPM practice materials outreach others greatly among substantial suppliers of the exam.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

The finance department asks to view select reports from NPM. Because of compliance policies, you cannot create accounts in the Web Console for users outside of the IT department. How do you allow the finance department to view reports without a user account?

- A. Create a DirectLink account in the Web Console
- B. Enable the Link only option on the report
- C. Enable the Guest account
- D. Create a service account for Finance

Answer: A

NEW QUESTION # 48

You add several nodes for monitoring and can see detailed information on those nodes in the Orion Web Console. However, when you look at the nodes in Orion Maps, the connections between the nodes are not showing. What is a likely reason?

- A. You did not add the node topology OIDs to the MIB database
- B. You did not enable Layer 2 and Layer 3 topology polling on those nodes
- C. You did not enable SNMP polling
- D. A firewall is blocking polling between the nodes and the Orion server

Answer: B

NEW QUESTION # 49

Which is not true for Device Studio Poller?

- A. Can poll multiple OIDs for a given technology
- B. Can perform logical operations or transformations on the polled data
- C. Collects data from Orion Failover Engine or Hot Standby Engines
- D. Polled values are displayed in existing resources

Answer: C

Explanation:
Device Studio Poller is a feature that allows users to create custom pollers for devices or technologies that are not supported by default in NPM. It can poll multiple OIDs for a given technology, perform logical operations or transformations on the polled data, and display the polled values in existing resources. However, it does not collect data from Orion Failover Engine or Hot Standby Engines, which are features of Orion High Availability that ensure continuous monitoring in case of primary server failure12. Reference: 1: Create pollers in Device Studio for NPM3, 2: When Good OIDs Go Bad: Customizing Device Pollers, 3: Manage Pollers (AKA Device Studio) question
https://documentation.solarwinds.com/en/success_center/orionplatform/content/core-monitoring-mibs-with-universal-device-pollers-sw548.htm

NEW QUESTION # 50

How can you add entities from NPM to monitor for all registered devices in your company domain?

- A. Use the NPM Active Directory Discovery tool to find all registered devices on the domain
- B. Add each of your Domain Controllers as nodes to NPM and scan Active Directory Organization Units (OUs) for the registered devices
- C. Select to query Domain Controllers in a Network Discovery and then select the Organizational Units (OUs) with the registered devices you want to scan
- D. Add each registered device individually, and then select the entities you want to monitor

Answer: C

Explanation:
Network Discovery is a feature of SolarWinds NPM that allows you to automatically discover and add network devices to the Orion Platform for monitoring. You can use Network Discovery to query Domain Controllers in your company domain and then select the Organizational Units (OUs) with the registered devices you want to scan. This way, you can add entities from NPM to monitor for all registered devices in your company domain in a single discovery. The other options are not as efficient or accurate as Network Discovery, as they either require manual addition of each device, or rely on the Domain Controllers to provide the list of registered devices, which may not be up-to-date or complete. References:
Discover your network devices and add them to the Orion Platform
Discover devices on your network using Active Directory

NEW QUESTION # 51

After you create an NPM report with custom charts for availability and response time metrics, you schedule the report and add an action to export it. But you cannot export it as an Excel file. What is the likely reason?

- A. The custom charts only support a PDF export
- B. You must link the report with a URL in an email action to run live in the web console
- C. You do not have the permissions to export the report
- D. Excel file formats are not supported

Answer: D

Explanation:
The Export to Excel button is only displayed if the report contains only custom table resources. Other resources cannot be converted to the Excel format. https://documentation.solarwinds.com/en/success_center/orionplatform/content/core-exporting-reports-sw1547.htm#:~:text=the%20Excel%20format.-,Click%20Reports%20%3E%20All%20Reports%20in%20the%20menu%20bar%2C%20and%20click,Click%20either%20Export%20as%20Excel.
