100% Garantie Google-Workspace-Administrator Prüfungserfolg

Seit Jahren bemühen uns wir ZertFragen darum, allen Kadidaten die besten und echten Prüfungsunterlagen zur Google Google-Workspace-Administrator Prüfung zu bieten. ZertFragen hat sehr reichende Erfahrungen über die Google-Workspace-Administrator Prüfungsfragen. ZertFragen helfen vielen Kadidaten und sind von ihnen vertraut und gut bewertet. Deshalb ist es unnötig für Sie, die Qualität der Google-Workspace-Administrator Dumps zu bezweifeln. Das wird Ihr großer Verlust, es zu verpassen.

Google Cloud Certified - Professional Google Workspace Administrator Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q47-Q52):

47. Frage

Your client is a 5,000-employee company with a high turn-over rate that requires them to add and suspend user accounts. When new employees are onboarded, a user object is created in Active Directory. They have determined that manually creating the users in Google Workspace Admin Panel is time-consuming and prone to error. You need to work with the client to identify a method of creating new users that will reduce time and error.

What should you do?

- A. Install Google Workspace Sync for Microsoft Outlook on all employees' computers.
- B. Install Google Apps Manager to automate add-user scripts.
- **C. Install Google Cloud Directory Sync on a supported server.**
- D. Install Google Cloud Directory Sync on all Domain Controllers.

Antwort: C

Begründung:

- * Prepare Environment: Ensure you have a supported server to install Google Cloud Directory Sync (GCDS).
- * Download GCDS:
- * Download Google Cloud Directory Sync from the Google Workspace Downloads page.
- * Install GCDS:
- * Follow the installation instructions provided by Google to install GCDS on the server.
- * Configuration:
- * Configure GCDS to synchronize user data from Active Directory to Google Workspace.
- * Set up synchronization rules and schedules to ensure that user data is kept up to date automatically.
- * Testing and Deployment:
- * Test the synchronization to ensure that new user accounts are created accurately in Google Workspace.
- * Deploy GCDS in the production environment after successful testing.

48. Frage

A disgruntled employee has left your company and deleted all their email messages and files in Google Drive. The security team is aware that some intellectual property may have surfaced on a public social media site. What is the first step to start an investigation into this leak?

- A. Use Google Vault to export all the user data and share among the security team.
- B. Delete the user's account in the Admin Console.
- **C. Instruct a Google Vault admin to create a matter, and place all the user data on 'hold.'**
- D. Transfer data between end user Workspace accounts.

Antwort: C

Begründung:

Access Google Vault: The Vault admin should log in to Google Vault.

Create a New Matter: In Google Vault, create a new matter specifically for this investigation related to the disgruntled employee.

Place Data on Hold: Place all the user's email and Drive data on hold to ensure it is preserved. This prevents the data from being permanently deleted or altered.

Search for Data: Use Google Vault's search functionality to locate relevant emails and documents that may pertain to the leak.

Export Data if Needed: If necessary, export the preserved data for further analysis and review by the security team.

Collaborate with Security Team: Share the findings with the security team to aid in their investigation of the data leak.

49. Frage

Your company uses a whitelisting approach to manage third-party apps and add-ons. The Senior VP of Sales & Marketing has urgently requested access to a new Marketplace app that has not previously been vetted. The company's Information Security policy empowers you, as a Google Workspace admin, to grant provisional access immediately if all of the following conditions are met:

Access to the app is restricted to specific individuals by request only.

The app does not have the ability to read or manage emails.

Immediate notice is given to the Infosec team, followed by the submission of a security risk analysis report within 14 days.

Which actions should you take first to ensure that you are compliant with Infosec policy?

- A. Add the Marketplace app, then review the authorized scopes in Security > Manage API client access.
- B. Search the Google Workspace support forum for feedback about the app to include in the risk analysis report.
- C. Move the Senior VP to a sub-OU before enabling Marketplace Settings > "Allow Users to Install Any App from Google Workspace Marketplace."
- D. Confirm that the Senior VP's OU has the following Gmail setting disabled before whitelisting the app: "Let users delegate access to their mailbox."

Antwort: A

Begründung:

50. Frage

The company's ten most senior executives are to have their offices outfitted with dedicated, standardized video conference cameras, microphones, and screens. The goal is to reduce the amount of technical support they require due to frequent, habitual switching between various mobile and PC devices throughout their busy days. You must ensure that it is easier for the executives to join Meet video conferences with the dedicated equipment instead of whatever device they happen to have available.

What should you do?

- A. Deploy Hangouts Meet Hardware Kits to each executive office, and associate the Meet hardware with the executives' calendars.
- B. Provision managed Chromeboxes and set the executives' Chrome homepage to meet.google.com via device policy.
- C. Set up unmanaged Chromeboxes and set the executives' homepage to meet.google.com via Chrome settings.
- D. Set up the executive offices as reservable Calendar Resources, deploy Hangouts Meet Hardware Kits, and associate the Meet hardware with the room calendars.

Antwort: A

Begründung:

<https://support.google.com/meethardware/answer/3341435?hl=en>

If the device is for a single user, such as in a home office or other remote location, you can associate the device with their personal calendar. Whenever an organizer adds that user to a Calendar event, the meeting name appears on their device.

51. Frage

One of your users calls in to the support team and reports that they did not receive an email that they were expecting from a customer. While investigating with the user, the support team was unable to locate the message in the inbox, the trash, or spam labels. They have escalated to you for troubleshooting. You navigate to the Email Log Search to determine the cause, and find that it successfully reached Google Workspace systems. What is the likely cause of this issue?

- A. A label was added to the email.
- B. The user has a rule in place that archived the message.
- C. The email was quarantined as a phishing email.
- D. Your third-party spam filter quarantined the email.

Antwort: B

Begründung:

A is not correct because phishing email would be labeled as spam.

B is correct because the support team ONLY searched the Inbox, not All Mail. This is the most likely place for this mail.

C is not correct because if a label was added, it would still also be labeled Inbox.

D is not correct because it was stated that the email was received by G Suite systems.

52. Frage

.....

Wir ZertFragen bieten alle mögliche Vorbereitungsunterlagen von Google Google-Workspace-Administrator Zertifizierungsprüfung. Sie können die Google Google-Workspace-Administrator Prüfungsunterlagen in verschiedenen Webseiten und Büchern finden.
