The team of PracticeMaterial has worked hard in making this product a successful Microsoft MD-102 Study Material. So we guarantee that you will not face issues anymore in passing the Microsoft MD-102 certification test with good grades.

## Microsoft Endpoint Administrator Sample Questions (Q215-Q220):

### NEW QUESTION # 215

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation

A screenshot of a computer Description automatically generated with medium confidence

Topic 2, Litware inc

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Existing Environment Current Business Model The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11:00 to 22:00.

Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment. During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment

The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

The development department uses projects in Azure DevOps to build applications.

Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements

Litware identifies the following issues on the network:

Employees in the Los Angeles office report slow Internet performance when updates are downloading.

The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.) Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.

Re-provisioning the sales department computers is too time consuming.

Requirements

Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers. Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements

Litware identifies the following device management requirements:

Prevent the sales department employees from forwarding email that contains bank account information.

Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.

Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

Re-provision the sales department computers by using Windows AutoPilot.

Ensure that the projects in Azure DevOps can be accessed from the corporate network only.

Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.

Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

Exhibits

## NEW QUESTION # 216

You have 100 computers that run Windows 8.1.

You need to create a report that will assess the Windows 10 readiness of the computers.

What should you use?

- A. Windows Deployment Services (WDS)
- B. Windows Assessment and Deployment Kit (Windows ADK)
- C. Microsoft Assessment and Planning (MAP) Toolkit
- D. Microsoft Desktop Optimization Pack (MDOP)

**Answer: C**

Explanation:

The MAP Toolkit is used for multi-product assessment and planning. It assesses a network environment using agentless data collection technologies to gather inventory and performance information. Then provides assessment reports to aid organizations with their IT infrastructure planning.

### NEW QUESTION # 217

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

- \* Automatically enroll new devices and provision system apps without requiring end-user authentication.
- \* Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

### NEW QUESTION # 218

You have a Microsoft Intune subscription.

You are creating a Windows Autopilot deployment profile named Profile1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Can modify the desktop settings only for themselves

Keyboard Layout

### NEW QUESTION # 219

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure the Authentication methods.

Does this meet the goal?

- A. No
- B. Yes

#### Answer: A

### NEW QUESTION # 220

.....

Related study materials proved that to pass the Microsoft MD-102 exam certification is very difficult. But do not be afraid, PracticeMaterial have many IT experts who have plentiful experience. After years of hard work they have created the most advanced Microsoft MD-102 Exam Training materials. PracticeMaterial have the best resource provided for you to pass the exam. Does not require much effort, you can get a high score. Choose the PracticeMaterial's Microsoft MD-102 exam training materials for your exam is very helpful.
