SPLK-3002 Latest Study Guide, SPLK-3002 Dumps Download

We are never complacent about our achievements, so all content are strictly researched by proficient experts who absolutely in compliance with syllabus of this exam. Accompanied by tremendous and popular compliments around the world, to make you feel more comprehensible about the SPLK-3002 practice materials, all necessary questions of knowledge concerned with the exam are included into our SPLK-3002 practice materials. They are conducive to your future as a fairly reasonable investment.

The SPLK-3002 Certification Exam is a valuable credential for IT professionals who want to demonstrate their expertise in using ITSI to improve IT service management. Certified professionals can showcase their skills to employers, clients, and colleagues, and gain recognition for their expertise. Splunk IT Service Intelligence Certified Admin certification can also lead to career growth opportunities and higher salaries.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q84-Q89):

NEW QUESTION # 84

After ITSI is initially deployed for the operations department at a large company, another department would like to use ITSI but wants to keep their information private from the operations group. How can this be achieved?

- A. Create service templates for each group and create the services from the templates.
- B. Create services for each group and set the permissions of the services to restrict them to each group.
- C. Create teams for each department and assign services to the teams.
- D. Create teams for each department and assign KPIs to each team.

Answer: C

Explanation:

In Splunk IT Service Intelligence (ITSI), creating teams for each department and assigning services to those teams is an effective way to segregate data and ensure that information remains private between different groups within an organization. Teams in ITSI provide a mechanism for role-based access control, allowing administrators to define which users or groups have access to specific services, KPIs, and dashboards. By setting up teams corresponding to each department and then assigning services to these teams, ITSI can accommodate multi-departmental use within the same instance while maintaining strict access controls. This ensures that each department can only view and interact with the data and services relevant to their operations, preserving confidentiality and data integrity across the organization.

NEW QUESTION # 85

What is an episode?

- A. A deep dive.
- B. A workflow task.
- **C. A notable event.**
- D. A notable event group.

Answer: C

Explanation:

Explanation

It's a deduplicated group of notable events occurring as part of a larger sequence, or an incident or period considered in isolation.

NEW QUESTION # 86

Which of the following describes a realistic troubleshooting workflow in ITSI?

- A. Correlation Search -> Deep Dive -> Notable Event
- **B. Service Analyzer -> Notable Event Review -> Deep Dive**
- C. Service Analyzer -> Aggregation Policy -> Deep Dive
- D. Correlation search -> KPI -> Aggregation Policy

Answer: B

Explanation:

A realistic troubleshooting workflow in ITSI is:

* B. Service Analyzer -> Notable Event Review -> Deep Dive

This workflow involves using the Service Analyzer dashboard to monitor the health and performance of your services and KPIs, using the Notable Event Review dashboard to investigate and manage the notable events generated by ITSI, and using the Deep Dive dashboard to analyze the historical trends and anomalies of your KPIs and metrics.

The other workflows are not realistic because they involve components that are not part of the troubleshooting process, such as correlation search, aggregation policy, and KPI. These components are used to create and configure the alerts and episodes that ITSI generates, not to investigate and resolve them. References:

[Service Analyzer dashboard in ITSI], Overview of Episode Review in ITSI, [Overview of deep dives in ITSI]

NEW QUESTION # 87

In Episode Review, what is the result of clicking an episode's Acknowledge button?

- A. Change status from New to Acknowledged and assign the current user as owner.
- B. Change status from New to Acknowledged.
- **C. Change status from New to In Progress and assign the current user as owner.**
- D. Assign the current user as owner.

Answer: C

Explanation:

Explanation

When an episode warrants investigation, the analyst acknowledges the episode, which moves the status from New to In Progress.

NEW QUESTION # 88

Anomaly detection can be enabled on which one of the following?

- A. Entity
- B. Multi-KPI alert
- C. Service
- **D. KPI**

Answer: D

Explanation:

A is the correct answer because anomaly detection can be enabled on a KPI level in ITSI. Anomaly detection allows you to identify trends and outliers in KPI search results that might indicate an issue with your system. You can enable anomaly detection for a KPI by selecting one of the two anomaly detection algorithms in the KPI configuration panel. Reference: Apply anomaly detection to a KPI in ITSI

NEW QUESTION # 89

.....

It is our aspiration to help candidates get certification in their first try with our latest SPLK-3002 exam prep and valid pass guide. We know the difficulty of SPLK-3002 real exam so our IT experts written the best quality exam answers for our customers who didn't get good result. By using our SPLK-3002 pass review, you will grasp the overall key points of the test content and solve the difficult questions easier.
