- A. Antivirus
- B. Remote URL filtering
- C. Application-level ACL
- D. Built-in firewall
- E. Data encryption
- F. IPS

Answer: A,B,C,D,F

Huawei's six comprehensive border security protection capabilities for SD-WAN or converged gateway routers typically include:
Built-in Firewall - Provides basic packet filtering and security zoning.
Remote URL Filtering - Uses cloud-based services to filter harmful websites.
Antivirus - Detects and blocks malicious files.
IPS (Intrusion Prevention System) - Detects and blocks known threats and attack signatures.
Application-level ACL - Allows granular control of applications beyond Layer 4 (e.g., blocking TikTok, WhatsApp, etc.).
Data leakage prevention (DLP) and behavioral analytics may also be included depending on the security license.
However, "Data encryption" is a broader category not specifically named among the six security protection items in Huawei's SD-WAN documentation. Encryption (e.g., IPsec VPN) is used for secure tunnels but is not listed as one of the six application-layer protections.

NEW QUESTION # 111
In the NAC solution, which of the following authentication modes does not require users to install any client software and is applicable to scenarios where dumb terminals such as IP phones and printers need to access the network?

- A. Wireless authentication
- B. MAC address authentication
- C. Portal authentication
- D. 802.1X authentication

Answer: B

Explanation:
MAC address authentication (also known as MAC bypass authentication) is typically used for non-intelligent endpoints such as printers, IP phones, and IoT devices that cannot run client software or access a portal for login.
The authentication process is completed by identifying the device's MAC address and mapping it to predefined policies in the NAC system.
It does not require client installation or human interaction - making it ideal for "dumb terminals." By contrast, 802.1X and portal authentication require software clients or web-based logins and are designed for user-driven authentication.
