We can make a promise to you that our study materials will be the best SAFe-Practitioner study guide for you to prepare for your exam.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q144-Q149):

### NEW QUESTION # 144

Quality is first and foremost a function of what in a Lean-Agile concept?

- A. Preserving options
- **B. Culture of shared responsibility**
- C. Deployment on demand
- D. Empowered Solution authority

**Answer: B**

Explanation:

Quality is the first and foremost function of the second core value of SAFe, which is Built-in Quality<sup>1</sup>. Built-in Quality is a set of practices to help ensure that the outputs of Agile teams in business and technology domains meet appropriate quality standards throughout the process of creating customer value<sup>2</sup>. Built-in Quality requires a culture of shared responsibility, where everyone on the team is accountable for the quality of the work products and the system as a whole<sup>2</sup>. This culture fosters collaboration, feedback, and continuous improvement, and enables faster delivery and better outcomes<sup>2</sup>. References: Built-In Quality - Scaled Agile Framework, Quality is the first and foremost a function of what in a Lean-Agile ..., Quality is first and foremost a function of what in a lean-agile ...

### NEW QUESTION # 145

What is one Story component to consider when estimating size?

- A. Dependency
- B. Depth
- C. Scope
- **D. Knowledge**

**Answer: D**

Explanation:

Knowledge is one of the factors that affect the size of a story. It refers to what is known or unknown about the story, such as the requirements, the design, the technology, the domain, the dependencies, and the risks.

The more unknowns there are, the larger the story size will be, as it will require more effort, complexity, and uncertainty to implement. Knowledge is one of the components of the story point estimation technique, which is a relative measure of the effort required to implement a story. Story points take into account the volume, complexity, knowledge, and uncertainty of the work.

### NEW QUESTION # 146

Who fosters team adoption of Agile technical practices?

- A. System Architect
- B. Lead developer
- C. Technical Lead
- **D. Scrum Master**

**Answer: D**

### NEW QUESTION # 147

Which statement describes the information within a Story?

- A. Story acceptance criteria must be finalized before beginning Iteration Planning
- B. A Story is written in full detailed specifications so that the work is ready to be implemented immediately
- C. No further conversation is required after the Story is identified because it contains all necessary details
- **D. A Story provides just enough information for the intent to be understood by both business and technical people**

**Answer: D**

Explanation:

A Story is a short description of a small piece of desired functionality written from the user's perspective and in their language. A Story has three primary components: Card, Conversation, and Confirmation. The Card captures the essence of the Story using the format: "As a (who), I want (what), so that (why)." The Conversation is the ongoing dialogue between the team and the customer or product owner to elaborate and refine the Story details. The Confirmation is the set of acceptance criteria and tests that verify the Story is done and meets the customer's expectations. A Story provides just enough information for both business and technical people to understand the intent, but not so much that it becomes a specification or a contract. Details are deferred until the Story is ready to be implemented, which allows for more flexibility and feedback. A Story is not a static artifact, but a dynamic one that evolves through collaboration and learning<sup>12</sup>. References: Story - Scaled Agile Framework, [What is User Story? -

### NEW QUESTION # 148

Which of the following is not 1 of the 3Cs of good user stories?

- A. Card
- **B. Continuation**
- C. Conversation
- D. Confirmation

**Answer: B**

### NEW QUESTION # 149
