Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q74-Q79):

NEW QUESTION # 74

What are two valid trigger types available for executing Playbooks? (Choose two.)

- A. Report
- B. Audit
- C. Manual
- D. Alert

Answer: C,D

Explanation:

Playbooks are a collection of tasks that can be executed on demand or based on a trigger. There are two types of triggers available for executing Playbooks: manual and alert. A manual trigger allows you to run a Playbook on demand from the Prism Central UI or the Calm API. An alert trigger allows you to run a Playbook automatically when a specific alert is generated by Prism Central or a third-party system. Report and audit are not valid trigger types for Playbooks. NEW QUESTION # 75

What is the building block of a Blueprint?

- A. Single-VM Blueprint
- B. Runbook
- C. Multi-VM Blueprint
- D. Service

Answer: D

Explanation:

Nutanix Self-Service (formerly Calm) uses Services, app profiles, packages, substrates, and actions as the building blocks for a blueprint to define applications.

A Service is the core logical entity within a blueprint. An application is made up of multiple components (or services) working together, such as a Database Service and a Web Server Service. Each service defines the specific infrastructure (VM), software packages, and operations required for that component of the application.

NEW QUESTION # 76

A company has the following departments:

HR

Accounting

Support

Sales

e-commerce

An administrator has created a Playbook that will add memory to the affected VMS when the configured alert is triggered.

Which VMS will get more memory?

- A. Production VMS from the eCommerce department
- B. All the VMS from Sales
- C. All the VMS categorized as Production.
- D. Production VMS from Support and eCommerce

Answer: D

NEW QUESTION # 77

During the deployment of a multi-step Blueprint, a failure is encountered. The administrator corrected the failed step and saved the Blueprint.

What should the administrator do next?

- A. Use Continue in the failed application to retry.

- B. Upon clicking Save the Blueprint task will be retried automatically.
- C. Soft Delete the failed application and Launch a new application.
- D. Delete the failed application and Launch a new application.

Answer: B

NEW QUESTION # 78

What role must a user have in order to create or update a Playbook?

- A. Project Admin
- B. Calm Admin
- C. Prism Admin
- D. Calm Developer

Answer: D

Explanation:

A Calm Developer is a role that allows a user to create, update, and execute Playbooks in Calm. A Playbook is a collection of Tasks that can be executed on one or more Targets, such as VMs, applications, or services. A Calm Developer can also create and use Runbooks, Blueprints, and Library items in Calm. A Prism Admin is a role that allows a user to manage the Prism Central instance and its features, such as users, roles, alerts, policies, etc. A Calm Admin is a role that allows a user to manage the Calm service and its settings, such as endpoints, credentials, projects, etc. A Project Admin is a role that allows a user to manage a specific project and its resources, such as applications, Blueprints, Runbooks, etc. References:
