#### **NEW QUESTION # 356**

An organization wants to digitize and share large volumes of historical text and images.

Why is a public cloud a better option than an on-premises solution?

- A. Provides physical encryption key
- B. In-house hardware management
- **C. Cost-effective at scale**
- D. Optimizes capital expenditure

**Answer: C**

#### **NEW QUESTION # 357**

A fitness band company is continuously ingesting data from millions of its consumers. Different kinds of data based on time, like location, heartbeat rate, temperature, movement, etc. are connected. They need a high throughput database that can write data very fast. Since their users are spread across the world, they need the database to be geographically scalable. Consumers also want to see near-real-time visualizations of their activities. Which of these databases would be a good fit?

- A. Cloud SQL
- B. Spanner
- C. Firestore

- D. Bigtable

**Answer: D**

Explanation:

Bigtable is the best suited for time series data. It also has high read-write throughput and ability to scale globally.
