

# 100% Pass Quiz SC-100 - High Hit-Rate Microsoft Cybersecurity Architect Latest Study Notes

BONUS!!! Download part of PracticeMaterial SC-100 dumps for free: [https://drive.google.com/open?id=1grHJPELflz0n\\_MGiwNiBS1BJwL3TM12g](https://drive.google.com/open?id=1grHJPELflz0n_MGiwNiBS1BJwL3TM12g)

PracticeMaterial has a strong IT elite team. They use their professional eyes searching the latest SC-100 braindumps and SC-100 certification training materials. With them, you can save more time to study and pass the SC-100 Exam. After you purchase our SC-100 exam dumps, we will offer free update service in one year.

Microsoft SC-100 (Microsoft Cybersecurity Architect) Certification Exam is a comprehensive test designed to evaluate a candidate's knowledge and skills in cybersecurity architecture. Microsoft Cybersecurity Architect certification is ideal for IT professionals who are responsible for planning, designing, and implementing security solutions for organizations. SC-100 Exam is intended to validate the candidate's expertise in various areas of cybersecurity, including threat protection, identity and access management, cloud security, and compliance.

## Microsoft SC-100 Test Simulator Free | SC-100 Valid Mock Exam

Many students often start to study as the exam is approaching. Time is very valuable to these students, and for them, one extra hour of study may mean 3 points more on the test score. If you are one of these students, then Microsoft Cybersecurity Architect exam tests are your best choice. Because students often purchase materials from the Internet, there is a problem that they need transport time, especially for those students who live in remote areas. When the materials arrive, they may just have a little time to read them before the exam. However, with SC-100 Exam Questions, you will never encounter such problems, because our materials are distributed to customers through emails. After you have successfully paid, you can immediately receive SC-100 test guide from our customer service staff, and then you can start learning immediately.

Microsoft SC-100 Certification Exam is designed for cybersecurity architects, security engineers, and other IT professionals who are responsible for securing their organization's systems and data. SC-100 exam covers a wide range of topics, including threat protection, security management, identity and access management, and network security. SC-100 Exam is designed to test the candidate's knowledge and skills in each of these areas, as well as their ability to design and implement effective security solutions.

## Microsoft Cybersecurity Architect Sample Questions (Q262-Q267):

### NEW QUESTION # 262

Your company is designing an application architecture for Azure App Service Environment (ASE) web apps as shown in the exhibit. (Click the Exhibit tab.)

Communication between the on-premises network and Azure uses an ExpressRoute connection.

You need to recommend a solution to ensure that the web apps can communicate with the on-premises application server. The solution must minimize the number of public IP addresses that are allowed to access the on-premises network.

What should you include in the recommendation?

- **A. Azure Traffic Manager with priority traffic-routing methods**
- B. Azure Application Gateway v2 with user-defined routes (UDRs).
- C. Azure Firewall with policy rule sets
- D. Azure Front Door with Azure Web Application Firewall (WAF)

**Answer: A**

### NEW QUESTION # 263

You use Azure Pipelines with Azure Repos to implement continuous integration and continuous deployment (CI/CD) workflows for the deployment of applications to Azure.

You need to recommend what to include in dynamic application security testing (DAST) based on the principles of the Microsoft Cloud Adoption Framework for Azure.

What should you recommend?

- A. dependency checks
- B. threat modeling
- **C. penetration testing**
- D. unit testing

**Answer: C**

Explanation:

Dynamic application security testing (DAST)

In a classical waterfall development model, security was typically introduced at the last step, right before going to production. One of the most popular security approaches is penetration testing or pen testing. Penetration testing lets a team look at the application from a black-box security perspective, as in, closest to an attacker mindset.

### NEW QUESTION # 264

Your company plans to move all on-premises virtual machines to Azure. A network engineer proposes the Azure virtual network design shown in the following table.

You need to recommend an Azure Bastion deployment to provide secure remote access to all the virtual machines. Based on the virtual network design, how many Azure Bastion subnets are required?

- **A. 0**
- B. 1
- C. 2
- D. 3
- E. 4

**Answer: A**

Explanation:

<https://docs.microsoft.com/en-us/learn/modules/connect-vm-with-azure-bastion/2-what-is-azure-bastion>

### NEW QUESTION # 265

Hotspot Question

You have 1,000 on-premises servers that run Windows Server 2022 and 500 on-premises servers that run Linux.

You have an Azure subscription that contains the following resources:

- A Log Analytics workspace
- A Microsoft Defender Cloud Security Posture Management (CSPM) plan

You need to deploy Update Management for the servers.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Microsoft Defender for Servers Plan 2

Incorrect:

\* An Azure Automation account

Update Manager offers many new features and provides enhanced and native functionalities.

Following are some of the benefits:

\* Provides native experience with zero on-boarding.

- No dependency on Log Analytics and Azure Automation.

- Etc.

\* Etc.

Box 2: Azure connected machine agent

For the Azure Update Manager, both AMA and MMA aren't a requirement to manage software update workflows as it relies on the Microsoft Azure VM Agent for Azure VMs and Azure connected machine agent for Arc-enabled servers.

<https://learn.microsoft.com/en-us/azure/update-manager/migration-overview>

**NEW QUESTION # 266**

You have a multi-cloud environment that contains an Azure subscription and an Amazon Web Services (AWS) account.

You need to implement security services in Azure to manage the resources in both subscriptions. The solution must meet the following requirements:

\* Automatically identify threats found in AWS CloudTrail events.

\* Enforce security settings on AWS virtual machines by using Azure policies.

What should you include in the solution for each requirement? To answer, select the appropriate options in the answer area. NOTE:

Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:
