You can also try to free download the Apple Certification DEP-2025 Exam testing software and some practice questions and answers to on ValidExam website.

Apple DEP-2025 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options. |
| Topic 2 | <ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes. |

| | |
|----------|---|
| Topic 3 | <ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments. |
| Topic 4 | <ul style="list-style-type: none"> • Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs. |
| Topic 5 | <ul style="list-style-type: none"> • Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality. |
| Topic 6 | <ul style="list-style-type: none"> • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager. |
| Topic 7 | <ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple’s built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools. |
| Topic 8 | <ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout. |
| Topic 9 | <ul style="list-style-type: none"> • Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs. |
| Topic 10 | <ul style="list-style-type: none"> • Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage. |
| Topic 11 | <ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed. |
| Topic 12 | <ul style="list-style-type: none"> • Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication. |
| Topic 13 | <ul style="list-style-type: none"> • Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices. |

Apple Deployment and Management Exam Sample Questions (Q165-Q170):

NEW QUESTION # 165

What's the benefit of using Find My?

- A. Separates personal and managed data
- B. Allows device tracking
- C. Improves network performance
- D. Enables additional restrictions

Answer: B

Explanation:

Find My allows device tracking, enabling users or administrators (via MDM) to locate, lock, or wipe a lost or stolen device using

iCloud or GPS. It's a key security feature for personal and managed devices. Additional restrictions (option B) are a supervision feature. Network performance (option C) is unrelated, and data separation (option D) pertains to User Enrollment. The Apple Platform Security Guide emphasizes tracking as Find My's primary benefit.
Reference: Apple Platform Security Guide (Section: Find My).

NEW QUESTION # 166

What can you do with Apple Configurator for Mac in iPad deployments?

- A. Remotely control devices without requiring physical access to them
- **B. Supervise devices**
- C. Update Apple device operating systems without using the internet
- D. Replace iCloud for backing up biometric data on iPad devices

Answer: B

Explanation:

Apple Configurator supervises iPads for advanced management. The Apple Configurator User Guide states, "Apple Configurator can supervise iPad devices, allowing you to apply restrictions and prepare them for MDM enrollment when connected via USB to a Mac." Options B, C, and D are incorrect as Configurator doesn't handle biometric backups, remote control, or offline OS updates.

Reference:

Apple Configurator User Guide, "Supervising Devices" section.

Apple Platform Deployment Guide, "Apple Configurator" section.

NEW QUESTION # 167

Where do you upload the content token to enable Managed Distribution of apps and books?

- A. Your Kerberos server
- **B. Your MDM solution**
- C. Your Apple Business Manager account
- D. Your identity provider (IdP) system

Answer: B

Explanation:

For organizations to distribute apps and books purchased through Apple Business Manager (ABM) or Apple School Manager (ASM), the content token (also called a server token) must be uploaded into the MDM solution. Apple documentation explains that the token authorizes the MDM to sync licenses and distribute them to devices or users. The token is first generated and downloaded from ABM/ASM, then installed into the MDM. Uploading the token anywhere else (such as an IdP or Kerberos server) would not link app licensing to MDM. Once uploaded, licenses purchased in ABM appear automatically in the MDM portal for assignment. This workflow ensures apps remain organizational assets and can be reassigned as needed.

NEW QUESTION # 168

What do you use to manually add a device to Apple Business Manager or Apple School Manager?

- A. Apple Remote Desktop
- B. Mac Evaluation Utility
- **C. Apple Configurator**
- D. Profile Manager

Answer: C

Explanation:

Apple Configurator is the tool for manually adding devices to ABM or ASM, especially for devices not purchased directly from Apple. The Apple Configurator User Guide states, "Use Apple Configurator to add devices to Apple Business Manager or Apple School Manager by connecting them to a Mac via USB. This process supervises the devices and assigns them to your organization's MDM server." Options A, B, and D serve other purposes and cannot perform this task.

Reference:

Apple Configurator User Guide, "Adding Devices to Apple Business Manager" section.
Apple Business Manager User Guide, "Manually Add Devices" section.

NEW QUESTION # 169

Which statement is true about Managed Distribution?

- A. Apps can't be assigned without a Managed Apple Account.
- B. Apps can be distributed to only users, not devices.
- C. Books can be distributed to only devices, not users.
- **D. Apps can be revoked or reassigned.**

Answer: D

Explanation:

Managed Distribution is Apple's licensing model for apps and books in Apple Business Manager and Apple School Manager. Apple documentation emphasizes that Managed Distribution gives organizations flexibility

- licenses can be revoked from one user or device and reassigned to another. This allows organizations to maximize their investment, especially for paid apps, by reallocating licenses as staff or students change.

Unlike legacy redemption codes, which permanently attach to an Apple ID, Managed Distribution licenses remain organizational assets. Apps can be assigned to either devices or users, and books can be assigned to both as well. A Managed Apple Account is not mandatory for device-based assignment. Therefore, the critical and correct principle is that Managed Distribution supports revocation and reassignment, giving IT administrators ongoing control over licensed content.
