## Get Real And Easy-to-Use Pegasystems PEGACPRSA22V1 Dumps PDF Format

The DumpTorrent recognizes that students invest significant time and resources in their Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification preparation. Therefore, the DumpTorrent is committed to save their money with up to 365 days of free questions updates. The DumpTorrent regularly updates its practice material to ensure that users have the most up-to-date questions. The DumpTorrent also offers a money-back guarantee (terms and conditions apply) for those who fail to get success, which demonstrates its commitment to users' success.

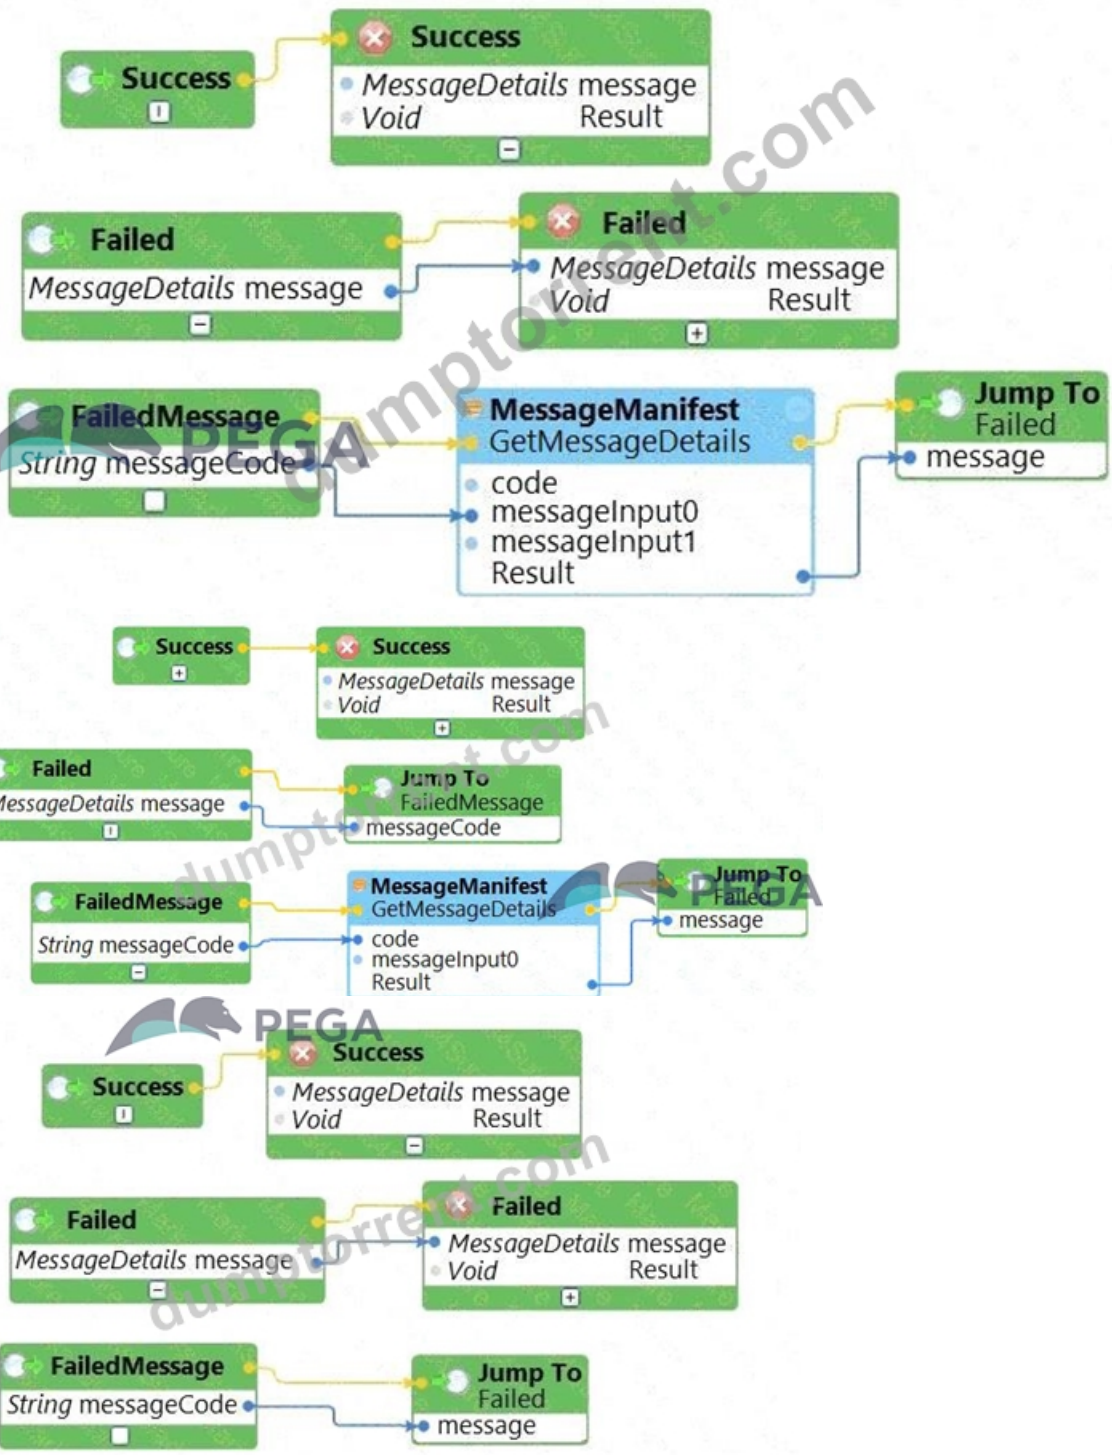

## Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q26-Q31):

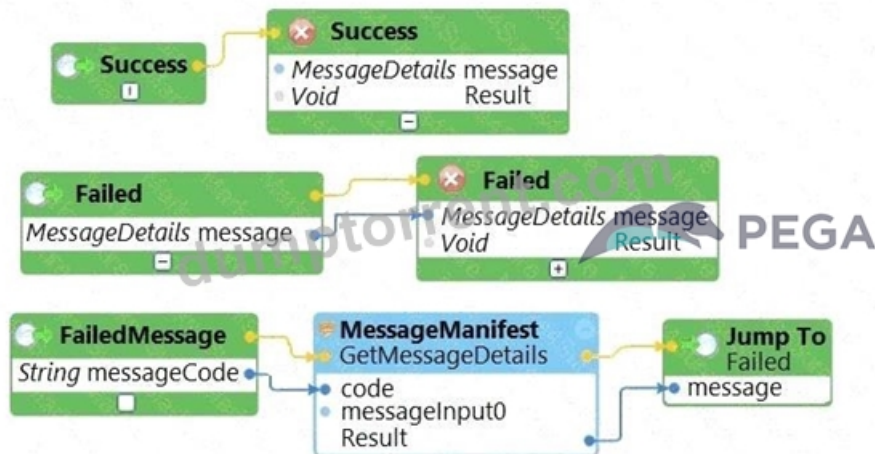

### NEW QUESTION # 26

The business requirements states that the login automation creates a Success or Failed response when attempting to log in to the finance application. If a failure occurs, the automation should pass a message code with the Message Manifest before exiting the automation.

Which image represents the exit logic?

A

- A. Exhibit B
- B. Exhibit A
- C. Exhibit D
- **D. Exhibit C**

**Answer: D**

#### NEW QUESTION # 27

You are using the Interaction framework for your project solution. Where in the solution do you add an Interaction Manager component?

- A. In the global container of the project.
- **B. In the project configuration file.**
- C. As a local component of the automation.
- D. As a global component of the automation.

**Answer: B**

Explanation:

References:

#### NEW QUESTION # 28

The project you are working on has two applications: BankerInsight and Pega Finance. You are working on the BankerInsight application method. Which three elements are not available to be used on the application method's design surface? (Choose Three)

- **A. Pega Finance controls.**
- **B. Automations that are not scoped within BankerInsight.**
- C. BankerInsight controls.
- D. External data sources.
- **E. Globals.**

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

"After adding the application method, Pega Robot Studio includes the application in the Palette. External elements are not available underneath the application, such as:

\* Globals

\* Other applications

\* Automations that are not scoped within the application"

In other words: when you are working within an application method under a specific application (such as BankerInsight), you cannot include items from the global scope (Globals), you cannot include items from other applications (such as Pega Finance controls belong to a different application), nor can you include automations that are not scoped to the same application (automations outside

BankerInsight).

Why each option is correct/incorrect:

- \* A. Automations that are not scoped within BankerInsight - Not available (Correct). According to the extract, "Automations that are not scoped within the application" are listed as external elements that cannot be used.
  - \* B. BankerInsight controls - Available. Controls belonging to the same application are within scope, so you can use these.
  - \* C. External data sources - The documentation snippet does not explicitly list "external data sources" as unavailable under the application method. So by the extract we cannot verify it as not available - thus we do not choose it.
  - \* D. Pega Finance controls - Not available. These belong to a different application (Pega Finance), so they fall under "Other applications" which are external to the current application and so cannot be used.
  - \* E. Globals - Not available. Explicitly listed in the documentation as external elements not available underneath the application.
- If you like, I can check whether "External data sources" are allowed or not in that context and provide a more detailed explanation with additional reference pages.

### NEW QUESTION # 29

Which of the following controls cannot be added to the Windows form?

- A. ProgressBar
- B. ComboBox
- C. PictureBox
- **D. Pointer**

**Answer: D**

### NEW QUESTION # 30

While setting up Start My Day, the user makes some changes in the Manage Applications window to prioritize and manage the applications that are configured to launch using the Start My Day functionality.

Which of the following applications does the user see on the desktop after using the Start My Day functionality?

- A. Pega Finance, CRM, Notepad, BankerInsight
- B. CRM, BankerInsight
- **C. Pega Finance, Notepad, BankerInsight**
- D. CRM, Notepad, BankerInsight

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the Start My Day (SMD) functionality allows a user to define and launch all required applications at once when starting work. The configuration of these applications is performed in the Manage Applications window, where each application can be individually enabled or disabled for automatic startup.

According to the Pega Robotics System Design and Implementation Guide, in the section "Start My Day Configuration and Manage Applications", the documentation specifies the following:

"Applications configured for Start My Day will launch automatically when the Start My Day feature is invoked.

The Manage Applications dialog lists all project applications and determines which ones are launched using the 'Enabled' checkbox.

Only applications marked as enabled will be started when the user initiates Start My Day. Applications that are listed but not enabled remain closed." The screenshot in the question shows the following configuration under the Manage Applications window:

Application

Enabled

Type

Path  
Pega Finance  
Yes  
Adapter  
BankerInsight  
Yes  
Adapter  
C:\Program Files (x86)\CRM Setup\CRM.exe  
CRM  
No  
Exe  
C:\Program Files (x86)\CRM Setup\CRM.exe  
Notepad  
Yes  
Exe  
C:\Windows\notepad.exe

From this configuration, the Enabled column indicates that the following applications will start automatically when Start My Day is triggered:

- \* Pega Finance
- \* BankerInsight
- \* Notepad

The CRM application is not enabled and therefore will not launch.

Option Analysis:

- \* Option A (Pega Finance, Notepad, BankerInsight): Correct, as these are the enabled applications.
- \* Option B (CRM, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option C (CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.
- \* Option D (Pega Finance, CRM, Notepad, BankerInsight): Incorrect, because CRM is not enabled.

Therefore, the correct answer is A. Pega Finance, Notepad, BankerInsight.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Start My Day (SMD) Configuration and Application Management section (Pega Robotics 19.1 and later).

## NEW QUESTION # 31

.....

The rapid development of information will not infringe on the learning value of our PEGACPRSA22V1 exam questions, because our customers will have the privilege to enjoy the free update for one year. You will receive the renewal of PEGACPRSA22V1 study files through the email. And our PEGACPRSA22V1 study files have three different version can meet your demands. Firstly, PDF version is easy to read and print. Secondly software version does not limit to the number of installed computers, and it simulates the real PEGACPRSA22V1 Actual Test guide, but it can only run on Windows operating system. Thirdly, online version supports for any electronic equipment and also supports offline use at the same time. For the first time, you need to open PEGACPRSA22V1 exam questions in online environment, and then you can use it offline. All in all, helping our candidates to pass the exam successfully is what we always looking for. PEGACPRSA22V1 actual test guide is your best choice.
