

Exam Dumps DP-900 Collection, DP-900 Reliable Study Notes

DOWNLOAD the newest Prep4SureReview DP-900 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1FtfUvqdKHCvSuK8JsxrevQ6sBFv8LcFH>

With the development of the times, civilization is in progress, as well as Prep4SureReview. In order to help you get the DP-900 exam certification to own a bright future as soon as possible, and you can get well-paid, Prep4SureReview has always been working hard. With efforts for years, the passing rate of Prep4SureReview DP-900 Certification Exam has reached as high as 100%. Choose Prep4SureReview is to choose success

DP-900 soft test simulator is popular by many people since it can be applied in nearly all electronic products. If you download and install on the personal computer first time, and then copy to your USB flash disk. You can use DP-900 soft test simulator on any other computer as you like offline. Besides, it supports Mobil and Ipad. If you don't delete it, you can use and practice forever. Microsoft DP-900 soft test simulator can set timed exam and simulate the real scene with the real test, so that you can practice like the real test many times.

Trustable Exam Dumps DP-900 Collection - 100% Pass DP-900 Exam

There is no denying that no exam is easy because it means a lot of consumption of time and effort. Especially for the upcoming DP-900 exam, although a large number of people to take the exam every year, only a part of them can pass. If you are also worried about the exam at this moment, please take a look at our DP-900 Study Materials which have become the leader in this career on

the market. And if you have a try on our DP-900 preparation quiz, you will be satisfied.

Microsoft DP-900 Exam is ideal for professionals who want to demonstrate their expertise in Microsoft Azure data services. DP-900 exam covers a wide range of topics, including core data concepts, relational data services, non-relational data services, analytics services, and Azure data solutions. Microsoft Azure Data Fundamentals certification validates the candidate's knowledge of fundamental concepts, skills, and tools required to build and maintain data solutions using Azure Data services.

Microsoft Azure Data Fundamentals Sample Questions (Q61-Q66):

NEW QUESTION # 61

You have a banking application that transfers money in to and out of accounts.
Of which type of solution is this is an example?

- A. online transaction processing (OLTP)
- B. a data warehouse
- C. extract transform, and load (ETL)
- D. online analytical processing (OLAP)

Answer: A

NEW QUESTION # 62

Hotspot Question

For each of the following statements, select yes if the statement is true, Otherwise select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure Databricks can consume data from Azure SQL Database	<input type="radio"/>	<input type="radio"/>
Azure Databricks can consume data from Azure Event Hubs	<input type="radio"/>	<input type="radio"/>
Azure Databricks can consume data from Azure Cosmos DB	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Azure Databricks can consume data from Azure SQL Database	<input checked="" type="radio"/>	<input type="radio"/>
Azure Databricks can consume data from Azure Event Hubs	<input checked="" type="radio"/>	<input type="radio"/>
Azure Databricks can consume data from Azure Cosmos DB	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: Yes

Azure Databricks can consume data from SQL Databases using JDBC and from SQL Databases using the Apache Spark connector.

The Apache Spark connector for Azure SQL Database and SQL Server enables these databases to act as input data sources and output data sinks for Apache Spark jobs.

Box 2: Yes

You can stream data into Azure Databricks using Event Hubs.

Box 3: Yes

You can run Spark jobs with data stored in Azure Cosmos DB using the Cosmos DB Spark connector. Cosmos can be used for batch and stream processing, and as a serving layer for low latency access.

You can use the connector with Azure Databricks or Azure HDInsight, which provide managed Spark clusters on Azure.

Reference:

<https://docs.microsoft.com/en-us/azure/databricks/data/data-sources/sql-databases-azure>

<https://docs.microsoft.com/en-us/azure/databricks/scenarios/databricks-stream-from-eventhubs>

NEW QUESTION # 63

You need to create an Azure Storage account.

Data in the account must replica outside the Azure region automatically.

Which two types of replica can you us for the storage account? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one pint.

- A. locally-redundant storage (LRS)
- B. read-access geo-redundant storage (RA_GRS)
- C. geo-redundant storage (GRS)
- D. zone-redundant storage (ZRS)

Answer: B,C

Explanation:

Azure Storage offers two options for copying your data to a secondary region:

With GRS or GZRS, the data in the secondary region isn't available for read or write access unless there is a failover to the secondary region. For read access to the secondary region, configure your storage account to use read-access geo-redundant storage (RA-GRS) or read-access geo-zone-redundant storage (RA-GZRS).

Reference:

<https://docs.microsoft.com/en-us/azure/storage/common/storage-redundancy#redundancy-in-a-secondary-region>

NEW QUESTION # 64

Your company needs to design a database that shows how changes traffic in one area of a network affect other components on the network.

Which type of data store should you use?

- A. Document
- B. columnar
- C. Key/value
- D. Graph

Answer: D

Explanation:

Explanation

Data as it appears in the real world is naturally connected. Traditional data modeling focuses on defining entities separately and computing their relationships at runtime. While this model has its advantages, highly connected data can be challenging to manage under its constraints.

A graph database approach relies on persisting relationships in the storage layer instead, which leads to highly efficient graph retrieval operations. Azure Cosmos DB's Gremlin API supports the property graph model.

NEW QUESTION # 65

Match the types of workloads the appropriate scenario.

To answer, drag the appropriate workload type from the column on the left to its scenario on the right. Each workload type may be used once, more than once or not at all.

NOTE: Each correct match is worth one point.

Workload Types		Answer Area						
Batch	Micro-batch	Streaming						
		<table border="1"> <tr> <td>Workload Type</td> <td>Data for a product catalog will be loaded every 12 hours to a data warehouse.</td> </tr> <tr> <td>Workload Type</td> <td>Data for online purchases will be loaded to a data warehouse as the purchases occur.</td> </tr> <tr> <td>Workload Type</td> <td>Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.</td> </tr> </table>	Workload Type	Data for a product catalog will be loaded every 12 hours to a data warehouse.	Workload Type	Data for online purchases will be loaded to a data warehouse as the purchases occur.	Workload Type	Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.
Workload Type	Data for a product catalog will be loaded every 12 hours to a data warehouse.							
Workload Type	Data for online purchases will be loaded to a data warehouse as the purchases occur.							
Workload Type	Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.							

Answer:

Explanation:

Workload Types		Answer Area						
Batch	Micro-batch	Streaming						
		<table border="1"> <tr> <td>Batch</td> <td>Data for a product catalog will be loaded every 12 hours to a data warehouse.</td> </tr> <tr> <td>Streaming</td> <td>Data for online purchases will be loaded to a data warehouse as the purchases occur.</td> </tr> <tr> <td>Micro-batch</td> <td>Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.</td> </tr> </table>	Batch	Data for a product catalog will be loaded every 12 hours to a data warehouse.	Streaming	Data for online purchases will be loaded to a data warehouse as the purchases occur.	Micro-batch	Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.
Batch	Data for a product catalog will be loaded every 12 hours to a data warehouse.

Micro-batch	Updates to inventory data will be loaded to a data warehouse every 1,000 transactions.							

NEW QUESTION # 66

.....

Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our DP-900 study materials and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our DP-900 Study Materials, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our DP-900 study materials you will feel that our DP-900 study materials' name matches with the reality.
