

2V0-16.25 Practice Test Online | New 2V0-16.25 Test Test

P.S. Free 2026 VMware 2V0-16.25 dumps are available on Google Drive shared by BraindumpsPass:
<https://drive.google.com/open?id=12A-4wEFApRR9ws7Gu037J2rx1SfvJ2X0>

With the excellent 2V0-16.25 exam braindumps, our company provides you the opportunity to materialize your ambitions with the excellent results. Using our 2V0-16.25 preparation questions will enable you to cover up the entire syllabus within as minimum as 20 to 30 hours only. And we can claim that, as long as you focus on the 2V0-16.25 training engine, you will pass for sure. And the benefit from our 2V0-16.25 learning guide is enormous for your career enhancement.

We all known that most candidates will worry about the quality of our product, In order to guarantee quality of our 2V0-16.25 study materials, all workers of our company are working together, just for a common goal, to produce a high-quality product; it is our 2V0-16.25 exam questions. If you purchase our 2V0-16.25 Guide Torrent, we can guarantee that we will provide you with quality products, reasonable price and professional after sales service. I think our 2V0-16.25 test torrent will be a better choice for you than other study materials.

VMware 2V0-16.25 Dumps [2026] – Everything You Need to Know 2V0-16.25 Exam Questions

Most candidates show their passion on our 2V0-16.25 guide materials, because we guarantee all of the customers, if they unfortunately fail the 2V0-16.25 exam, they will receive a full fund or a substitution such as another set of 2V0-16.25 Study Materials of our company. We treat our customers in good faith and sincerely hope them succeed in getting what they want with our 2V0-16.25 practice quiz.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator is tasked with creating a custom VMware Cloud Foundation (VCF) Operations Web Certificate. What are three requirements to which the certificate must conform to be used with VCF Operations? (Choose three.)

- A. In the certificate file, the server certificate must be first in the order of certificates.
- B. In the certificate file, all certificates and the private key must be in PFX format.
- C. In the certificate file, all certificates and the private key must be in PEM format.
- D. In the certificate file, the server certificate must be last in the order of certificates.
- E. The certificate file must include the server certificate, a private key, and all issuing certificates.
- F. The VCF Operations certificate cannot use the Subject Alternative Name (SAN) extension.

Answer: A,C,E

Explanation:

VCF Operations requires that custom SSL certificates meet these requirements:

- * Certificates and private key must be in PEM format. (A)
- * The server certificate must be listed first in the file. (D)
- * The file must include the server certificate, private key, and full certificate chain (issuing/intermediate/root CA). (E)

Why others are wrong:

- * B. Server certificate last# Incorrect, it must be first.
- * C. Cannot use SAN extension# Incorrect, SAN is supported and recommended.
- * F. PFX format# Not supported for VCF Operations.

NEW QUESTION # 18

An administrator must configure identity access for VMware vSphere Foundation (VVF) to allow admin accounts from the enterprise Active Directory domain corp.local to log in using domain credentials. Security requires authentication to use the default Active Directory protocol, without federation.

Which configuration step is required to enable Active Directory users to authenticate to vCenter?

- A. Configure a trusted identity provider using OpenID Connect (OIDC).
- B. Add the domain controller certificate to the Trusted Root store in vCenter.
- C. Configure Identity Federation using SAML with corp.local.
- **D. Add Active Directory over LDAP as an identity source.**

Answer: D

Explanation:

To allow Active Directory domain users (corp.local) to authenticate in vCenter with domain credentials:

- * The correct method is configuring Active Directory over LDAP as an identity source. (D)
- * This uses the default AD protocol (LDAP/Kerberos) without requiring SAML or OIDC federation.

Other options:

- * A. Adding domain controller certificate# Needed for LDAPS but not the main step.
- * B. Identity Federation with SAML# Requires federation, not allowed per requirements.
- * C. OpenID Connect (OIDC)# Used for external IdPs, not traditional AD auth.

NEW QUESTION # 19

An administrator is tasked to optimize storage utilization in an existing VMware vSAN Original Storage Architecture (OSA) cluster.

The cluster has the following configuration:

- * Eight-node cluster with 1 disk group per node.
- * Virtual machines (VMs) are configured with 1 failure - RAID-1 storage policy.
- * Storage utilization is at 70%.

Which action can the administrator take to reduce the existing storage utilization with the minimum impact to the cluster?

- **A. Change the storage policy to 2 failure - RAID-6.**
- B. Enable Deduplication and Compression on the cluster.
- C. Enable Compression only on the cluster.
- D. Change the storage policy to 3 failure - RAID-1.

Answer: A

Explanation:

In vSAN Original Storage Architecture (OSA) cluster, the choice of storage policy directly impacts storage efficiency and resilience:

- * Current Setup:
- * Eight-node cluster, 1 disk group per node.
- * VMs are using FTT=1 RAID-1 (mirroring) policy.
- * Storage utilization is already at 70%.
- * RAID-1 (Mirroring):

- * Each piece of data is mirrored, requiring 2x storage capacity.
- * Space efficiency ~50%.
- * RAID-6 (Erasure Coding, FTT=2):
- * Requires a minimum of 6 hosts, satisfied here with 8.
- * Uses erasure coding instead of full mirroring, giving ~67% space efficiency.
- * Provides resilience against 2 host failures while using less space than RAID-1.

Thus, switching from RAID-1 FTT=1 to RAID-6 FTT=2 reduces overall storage utilization while still improving resilience.

Why not the other options?

- * A. Enable Deduplication and Compression## In OSA, enabling this requires a cluster-wide disk group reformat, which is disruptive and not the minimal impact choice.
- * B. Change policy to 3 failure - RAID-1## Increases redundancy but consumes much more capacity, worsening utilization.
- * C. Enable Compression only## Not available in OSA (only in ESA). OSA supports deduplication + compression together, not compression-only.
- * D. Change to 2 failure - RAID-6## Meets resilience requirements, reduces storage usage, and is supported on 8-node OSA clusters.

NEW QUESTION # 20

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- **A. Trend**
- B. Distribution
- C. Table
- D. Text

Answer: A

Explanation:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

- * Trend view displays data over time, showing both past and predicted future behavior.
- * This makes them ideal for capacity planning, performance forecasting, and demand analysis.
- * Table (A) # Shows raw values but lacks predictive visualization.
- * Distribution (B) # Useful for comparing values across objects but not for time-based or forecasted trends.
- * Text (C) # Displays static values or metrics, not historical/forecasting data.

NEW QUESTION # 21

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- **A. Virtual Machine Power User**
- B. Administrator
- C. Virtual Machine User
- D. Virtual Machine Console User

Answer: A

Explanation:

The requirement is to follow least privilege while granting specific VM operations:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

The Virtual Machine Power User role is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.

Other roles:

- * Administrator (A): Grants full environment control # too broad.
- * Virtual Machine Console User (B): Limited to console access, cannot power on/off or snapshot.
- * Virtual Machine User (C): Can interact with VMs but lacks snapshot privileges.

NEW QUESTION # 22

.....

As is known to us, a good product is not only reflected in the strict management system, complete quality guarantee system but also the fine pre-sale and after-sale service system. In order to provide the best 2V0-16.25 test training guide for all people, our company already established the integrate quality manage system, before sell serve and promise after sale. If you buy the 2V0-16.25 Exam Dumps from our company, we can make sure that you will have the right to enjoy the 24 hours full-time online service. In order to help the customers solve the problem at any moment, our server staff will be online all the time.

New 2V0-16.25 Test Test: <https://www.braindumps.com/VMware/2V0-16.25-practice-exam-dumps.html>

Notices When you register at BraindumpsPass New 2V0-16.25 Test Test website, you agree to receive notices from BraindumpsPass New 2V0-16.25 Test Test by email, by mail at the addresses included in the contact information you provide to the Company, Now, you do not worry any more, VCP-VVF Admin 2V0-16.25 valid exam cram will solve your confusion and drag you out of the misery, VMware 2V0-16.25 Practice Test Online We promise you here that all your operations on our website are safe and guaranteed.

But after you get beyond the basics, the incredible depth of this 2V0-16.25 tool and the variety of ways that it can be used to create materials can be somewhat daunting. You might find the Discussion tool interesting because of its ability to be modified through New 2V0-16.25 Test Test the Design Sandbox (see Note) From within the Discussion tool, select the Designer menu option and choose Open Design Sandbox.

Comprehensive VMware 2V0-16.25 Exam Questions in PDF Format

Notices When you register at BraindumpsPass website, you agree to receive 2V0-16.25 Latest Braindumps Pdf notices from BraindumpsPass by email, by mail at the addresses included in the contact information you provide to the Company.

Now, you do not worry any more, VCP-VVF Admin 2V0-16.25 Valid Exam Cram will solve your confusion and drag you out of the misery, We promise you here that all your operations on our website are safe and guaranteed.

It is not an exaggeration to say, our 2V0-16.25 test braindumps are better than any the same kind product in the world, We provide 24-hours online customer service which replies the client's questions and doubts about our 2V0-16.25 training quiz and solve their problems.
