ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q36-Q41):

NEW QUESTION # 36

The color band at the top of the project card in Project Workspace displays what project attribute?

- A. Risk
- **B. Status**
- C. State
- D. Issues

Answer: B

Explanation:

According to the ServiceNow documentation¹, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:

B . Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band².

C . State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band³.

D . Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band⁴.

NEW QUESTION # 37

When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only one (1) rate type can apply
- **B. Only if the capability is enabled in the Time Sheet Policies**
- C. Only if the capability is enabled in the Project Preferences
- D. Only if this capability is enabled in the Project Record

Answer: B

Explanation:

According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate types for different tasks, such as standard, overtime, or travel. The other options are not correct, as they are not the places where

the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

NEW QUESTION # 38

If the 'Move project for WIP projects' property is enabled, project tasks associated with the project are also moved, except for tasks in which of the following states?

Choose 2 answers

- A. Work in Progress
- B. Pending
- C. Open
- D. Closed

Answer: A,D

Explanation:

According to the Planning Console document, if the 'Move project for WIP projects' property is enabled, project tasks associated with the project are also moved, except for tasks in the Work in Progress or Closed states. The other options are not correct, as tasks in the Pending or Open states are moved along with the project.

NEW QUESTION # 39

The project property to update actual effort from time card is controlled at what level?

- A. Portfolio Level.
- B. Application Level (Global).
- C. Program Level.
- D. Project Level.

Answer: D

Explanation:

Explanation

According to the ServiceNow documentation¹, the project property to update actual effort from time card is controlled at the project level. This property is called Update actual effort from time card and it determines if the Actual effort field on the Dates tab should be updated based on the hours entered from time cards for the project. If set to Yes, the Actual effort field is read-only on the Project and Project Task forms. If set to No, the Actual effort field is editable on the Project and Project Task forms.

NEW QUESTION # 40

If Scenario Planning for PPM is installed, a portfolio manager can access the Portfolio Planning Workbench by navigating to which of the following?

Choose 2 answers

- A. Portfolio Planning Workbench module
- B. Project module
- C. Program Workbench
- D. Portfolio Planning related link

Answer: A,D

Explanation:

Explanation

According to the Scenario Planning for PPM document, a portfolio manager can access the Portfolio Planning Workbench by navigating to either the Portfolio Planning related link on the portfolio form or the Portfolio Planning Workbench module under the Portfolio Planning application menu. The other options are not correct, as they do not lead to the Portfolio Planning Workbench. The Project module is under the Project Portfolio Management application menu and the Program Workbench is under the Program
