Free PDF Microsoft - Reliable SC-401 Questions

The price for SC-401 training materials is reasonable, and no matter you are a student at school or an employee in the company, you can afford it. Besides, SC-401 exam materials are high quality and accuracy, for we have a professional team to collect and research the latest information for the exam. In addition, SC-401 Exam Braindumps cover most of knowledge points for the exam, and you can master most of the knowledge through learning. We offer you free update for 365 days after purchasing, and the update version for SC-401 training materials will be sent to your email automatically.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 2	<ul style="list-style-type: none">• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Topic 3	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 4	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q251-Q256):

NEW QUESTION # 251

You have a data loss prevention (DIP) policy that applies to the Devices location. The policy protects documents that contain United States passport numbers. Users report that they cannot upload documents to a travel management website because of the policy. You need to ensure that the users can upload the documents to the travel management website. The solution must prevent the protected content from being uploaded to other locations.

Which Microsoft 365 Endpoint data loss prevention (Endpoint DLP) setting should you configure?

- A. Unallowed browsers
- **B. Service domains**
- C. File path exclusions
- D. Unallowed apps

Answer: B

Explanation:

The issue: Users cannot upload documents with U.S. passport numbers to a legitimate travel management website because Endpoint DLP is blocking it.

Solution: Configure Service domains in Endpoint DLP # this allows defining specific trusted domains where uploads of sensitive information are permitted while still blocking uploads to other, non-approved domains.

Why not others?

Unallowed browsers: Restricts/blocklists browsers, not the issue here.

File path exclusions: Excludes local folders/paths from monitoring, irrelevant to web uploads.

Unallowed apps: Restricts desktop apps, not browser-based sites.

Reference:

Microsoft Learn: Configure service domains for Endpoint DLP

NEW QUESTION # 252

You have a Microsoft 365 E5 subscription that contains four users named User1, User2, User3, and User4 and a file named File1.docx. File1 has a sensitivity label applied. The label is configured as shown in the following table.

User	Permission
User1	Owner
User2	Editor
User3	Restricted Editor
User4	Viewer

Which users can summarize File1 by using Microsoft 365 Copilot?

- A. User1 only
- **B. User1 and User2 only**
- C. User1, User2, User3, and User4
- D. User1, User2, and User3 only

Answer: B

Explanation:

Step 1 - Understand the scenario

- * We have a Microsoft 365 E5 subscription with Copilot available.
- * File1.docx has a sensitivity label applied.
- * The sensitivity label controls usage rights (Owner, Editor, Restricted Editor, Viewer).
- * The question: Which users can summarize File1 with Microsoft 365 Copilot?

Step 2 - Sensitivity labels and usage rights

When a sensitivity label is configured to apply encryption with usage rights, each role has different levels of access:

- * Owner: Full control (read, edit, reshare, extract, etc.).
- * Editor: Can read, edit, and copy content.
- * Restricted Editor: Can read and edit in place, but cannot copy, print, or extract content.
- * Viewer: Can only read (view) the content.

Reference: Rights included in usage rights for sensitivity labels

Step 3 - Copilot's requirements for summarization

Microsoft 365 Copilot requires that the user has the ability to read and extract text from the document in order to generate a summary.

- * Owners and Editors: # Can both read and extract # Copilot works.
 - * Restricted Editors: # Cannot copy/extract text # Copilot cannot summarize.
 - * Viewers: # Can only view # Copilot cannot process content for summarization.
- # Reference: Microsoft 365 Copilot and sensitivity labels

"Users must have extract and copy rights in order for Microsoft 365 Copilot to process and summarize labeled documents." Step 4

- Apply to the case

- * User1 (Owner) # Can summarize.
- * User2 (Editor) # Can summarize.
- * User3 (Restricted Editor) # Cannot summarize.
- * User4 (Viewer) # Cannot summarize.

NEW QUESTION # 253

You have a Microsoft 365 ES subscription that contains the devices shown in the following table.

Name	Platform	Chipset
Device1	Windows 10	x64
Device2	Windows 11	ARM64
Device3	Windows 10	x86

You publish Microsoft Purview Information Protection sensitivity labels.

You plan to deploy the information protection client to the devices. The solution must ensure that the labels can be applied to sensitive images and documents. On which devices can you install the information protection client, and what should users use to apply labels?

To answer, select the appropriate options in the answer area.

Answer Area

Devices: Device1 only, Device1 and Device2 only, Device1 and Device3 only, Device1, Device2, and Device3

Use: File Explorer, Microsoft Word, The Microsoft Defender portal, The Microsoft Purview portal, The Settings app

Microsoft

NEW QUESTION # 254

You have a Microsoft 365 E5 tenant that contains a user named User1. User1 is assigned the Compliance Administrator role. User1 cannot view the regular expression in the IP Address sensitive info type. You need to ensure that User1 can view the regular expression. What should you do?

- A. Assign User1 to the Reviewer role group
- B. Instruct User1 to use the Test function on the sensitive info type.
- C. Create a copy of the IP Address sensitive info type and instruct User1 to edit the copy.
- D. Assign User1 the Global Reader role.

Answer: C

NEW QUESTION # 255

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 contains the files shown in the following table.

Name	Author
File1.docx	User1
File2.docx	User2
File3.docx	USER1

In the Microsoft Purview portal, you create a content search named Content1 and configure the search conditions as shown in the following exhibit.

Define your search conditions

Query language-country/region: None 

Query builder

KQL editor

-Author:USER1

0 errors detected

Which files will be returned by Content1?

- A. File1 .docx and File3.docx only
- B. File1 .docx, File2.docx, and File3.docx
- C. File3.docx only
- D. File1.docx and File2.docx only
- E. File2.docx only

Answer: C
